Forward to **FINANCE TEAM**

Finance – tax, payout and how the money flows

You own the tax and payout profile – the details Microsoft needs to pay the company. It's one form, completed once, alongside the Global Admin in Partner Center.

What to provide (before call 1)

- [ ] **Legal name of the company** – exactly as registered.
- [ ] **Legal address** – the registered office address.
- [ ] **Beneficiary email and contact** – who receives payout statements and tax documents.
- [ ] **IBAN** – or account number for payouts (ACH, SEPA or wire).
- [ ] **Tax ID** – VAT / tax registration number. US entities: EIN, Form 8832 filing status, disregarded-entity status and 1099 / FATCA exemption codes.

FEES

Microsoft keeps **3%** of each transaction – reduced to **1.5%** on private-offer renewals flagged as renewals in Partner Center. No other Marketplace fees.

TAXES

Microsoft is merchant of record in most countries – it calculates, collects and remits VAT / GST / sales tax based on the end customer's location. Only in a small set of publisher-managed countries does that stay with you.

WHEN YOU GET PAID

Microsoft invoices your customer, collects, and pays out on the **15th of the month after collection**. Timing depends on the customer's contract with Microsoft:

· **Microsoft Customer Agreement (standard):** invoiced immediately – roughly one month from purchase to payout.

· **Enterprise Agreement / pay-as-you-go:** invoiced next billing cycle, net 30 – roughly two months.

· **Through a reseller (CSP):** resellers get 60-day terms – roughly four months.

WHAT YOUR CSM DOES

Enters these details into Partner Center with your Global Admin on call 1 – you only supply the information above. We answer any payout or fee questions and monitor Microsoft's validation until the profile is approved.
