

How can I verify a user's rights to complete a purchase?

docs.wetransact.io/how-can-i-verify-a-users-rights-to-complete-a-purchase

To complete a purchase on Azure Marketplace, a user must have either **Owner** or **Contributor** rights on the target subscription. You can quickly verify whether a user has the correct permissions by following these steps:

● **Log in to your Azure portal, search Subscriptions and click on it.**

● **Click on the subscription you want to use for the purchase.**

Select Access Control (IAM)

The screenshot shows the Microsoft Azure portal interface. On the left, the 'Subscriptions' list is visible, with 'WeTransact Production' selected. The main content area displays the 'Access control (IAM)' page for this subscription. A pink arrow points to the 'Access control (IAM)' link in the left-hand navigation menu. The page includes tabs for 'Check access', 'Role assignments', 'Roles', and 'Deny assignments'. The 'My access' section is visible, showing the user's level of access to the resource. Below this, there are sections for 'Grant access to this resource', 'View access to this resource', 'View deny assignments', and 'Create a custom role'.

Click on View my access

This screenshot shows the same 'Access control (IAM)' page as the previous one, but with a pink arrow pointing to the 'View my access' button in the 'My access' section. The button is highlighted with a pink box. The rest of the page content remains the same.

You can see the roles assigned to this user.

To complete a purchase you will need either **owner** or **contributor** rights.
