

How to action admin consent requests?

docs.wetransact.io/how-to-action-admin-consent-requests

Actioning admin consent requests allows a Global Admin to review and approve application permission requests, ensuring secure access to organizational data while maintaining compliance and control. Please follow the steps below:

Head to entra.microsoft.com and log in

● Click on Expand Applications section

Click on Enterprise applications

The screenshot shows the Microsoft Entra admin center interface. The left sidebar contains navigation links: Overview, Users, Groups, Devices, Applications, Enterprise applications (selected), App registrations, Protection, Identity governance, External Identities, Show more, Protection, Identity governance, Verified ID, Permissions Management, and Learn & support. The main content area displays the 'Welcome to Permissions Management' page for WeTransact. It includes a search bar, a 'Home' link, and a 'WeTransact' header. The main heading is 'Welcome to Permissions Management'. Below it, a paragraph describes the service: 'Discover, remediate, and monitor multicloud permission risks. Get multi-dimensional view of your risk by assessing identities, permissions, and resources. Automate least privilege policy enforcement consistently. [Learn more](#)'. There are three buttons: 'Try for free', 'Buy now', and 'Launch portal'. A large graphic of a blue cloud with a yellow shield is centered below the text.

Click on Admin consent requests

The screenshot shows the Microsoft Entra admin center interface. The left sidebar contains navigation links: Overview, Users, Groups, Devices, Applications, Enterprise applications (selected), App registrations, Protection, Identity governance, External Identities, Show more, Protection, Identity governance, Verified ID, Permissions Management, and Learn & support. The main content area displays the 'Enterprise applications | All applications' page for WeTransact. It includes a search bar, a 'Home' link, and a 'WeTransact' header. The main heading is 'Enterprise applications | All applications'. Below it, a paragraph describes the service: 'View, filter, and search applications in your organization that are set up to use your Microsoft Entra tenant as their Identity Provider. The list of applications that are maintained by your organization are in [application registrations](#)'. There are three buttons: 'New application', 'Refresh', and 'Download (Export)'. A search bar is present with the text 'Search by application name or object ID'. Below the search bar, there are two filter buttons: 'Application type == Enterprise Applications' and 'Application ID starts with'. Below the filters, it says '89 applications found'. A table lists the applications with columns: Name, Object ID, Application ID, and Hc. The table contains 10 rows of application data.
