

How to Assign Yourself as a Subscription Owner Without Prior Access (As a Global Admin)?

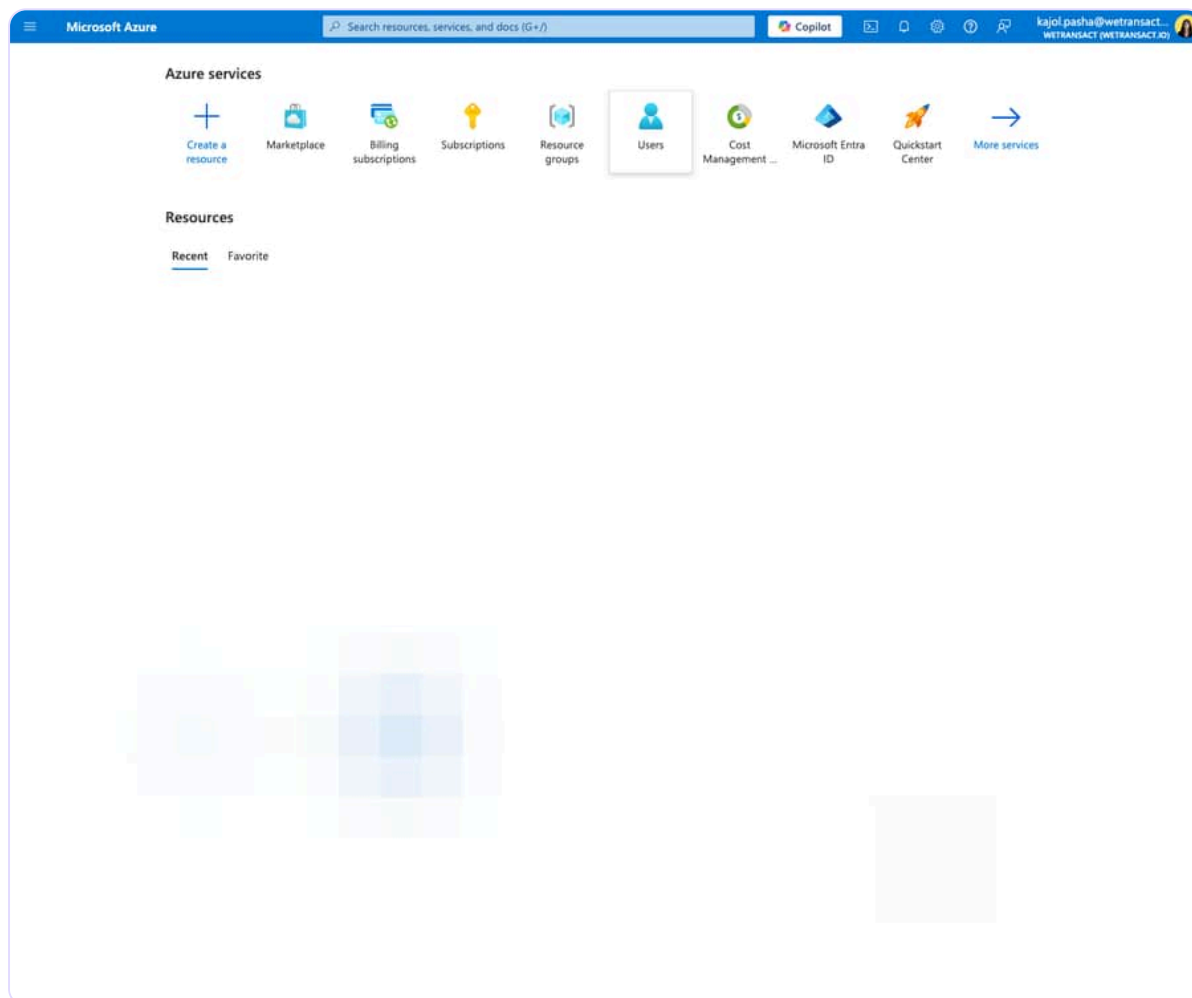

docs.wetransact.io/how-to-assign-yourself-as-a-subscription-owner-without-prior-access-as-a-global-admin

As a Global Admin, you can assign yourself as a subscription owner without prior access by elevating your permissions in Azure, taking ownership of the subscription, and granting yourself full management rights to perform necessary actions. Please follow the steps below:

Sign in to Azure portal

● Click on Users

The goal here is to confirm your account is listed under Global Administrators.

The screenshot shows the Microsoft Azure portal interface for managing users in a tenant named 'WeTransact'. The top navigation bar includes the Microsoft Azure logo, a search bar, and the user profile 'kajol.pasha@wetransact...'. The main content area is titled 'Users' and features a search bar with the text 'kajol' and a filter icon. Below the search bar, a message states 'Azure Active Directory is now Microsoft Entra ID'. A table of users is displayed with columns: Display name, User principal name, User type, On-premises sy..., Identities, Company name, and Creation time. The table shows 9 users found. The left sidebar contains navigation links for 'All users', 'Audit logs', 'Sign-in logs', 'Diagnose and solve problems', 'Deleted users', 'Password reset', 'User settings', 'Bulk operation results', and 'New support request'.

Click on Assigned roles

The screenshot displays the Microsoft Azure portal interface. At the top, the header bar includes the 'Microsoft Azure' logo, a search bar, and the user's profile 'Kajol Pasha' with the email 'kajol.pasha@wetransact.io'. The left-hand navigation pane lists various user management options, with 'Assigned roles' highlighted. The main content area is titled 'Kajol Pasha' and shows the 'Assigned roles' tab selected. Below the user's profile picture and name, there is a section for 'Assigned roles' which is currently blank, suggesting no roles are assigned. At the bottom of the main area, there is a 'Quick actions' section with a button labeled 'Edit properties'.

Navigate to 'Tenant Properties'

Now that you have given yourself 'Privileged role admin' rights, the next step is to grant yourself Owner access to all subscriptions.

Tenant Properties should look like this

The screenshot displays the 'Tenant Properties' page in the Microsoft Azure portal. The page is titled 'Home' and features a search bar at the top. The user is logged in as 'kajol.pasha@wetransact.io'.

The 'Name' field is set to 'WeTransact'. The 'Country or region' field is empty. The 'Data location' field is empty. The 'Notification language' field is empty. The 'Tenant ID' field is empty. The 'Technical contact' field is empty. The 'Global privacy contact' field is empty. The 'Privacy statement URL' field is empty.

Access management for Azure resources

Kajol Pasha (kajol.pasha@wetransact.io) can manage access to all Azure subscriptions and management groups in this tenant.
[Learn more](#)

☐ No

Security defaults

Security defaults are basic identity security mechanisms recommended by Microsoft. When enabled, these recommendations will be automatically enforced in your organization. Administrators and users will be better protected from common identity-related attacks.
[Learn more](#)

Information: Your organization is currently using Conditional Access policies which prevents you from enabling security defaults. You can use Conditional Access to configure custom policies that enable the same behavior provided by security defaults.
[Manage Conditional Access](#)

At the bottom of the page, there are 'Save' and 'Discard' buttons.

● Once toggle has been turned on, click on Save

The screenshot shows the Microsoft Azure portal interface. At the top, there's a blue header with the 'Microsoft Azure' logo, a search bar, and a 'Copilot' button. The user's profile 'kajol.pasha@wetransact.io' is visible in the top right. The main content area is titled 'Home' and displays a list of settings for a tenant named 'WeTransact'. The settings include 'Country or region', 'Data location', 'Notification language', 'Tenant ID', 'Technical contact', 'Global privacy contact', and 'Privacy statement URL'. Below these, the 'Access management for Azure resources' section is shown, indicating that 'Kajol Pasha (kajol.pasha@wetransact.io) can manage access to all Azure subscriptions and management groups in this tenant.' A red circle highlights the 'Yes' toggle switch. At the bottom, there are 'Save' and 'Discard' buttons. A 'Security defaults' section is also visible, explaining that security defaults are basic identity security mechanisms recommended by Microsoft, and a note states that the organization is currently using Conditional Access policies which prevents enabling security defaults.

● Click on Sign out and then sign back in.

Now that you have given yourself the rights to be owner on all subscriptions, sign in and out to ensure these changes take effect. After that, you will need to assign yourself as an owner to the subscription (follow next steps)

Add role assignment

Role Members Conditions Review + assign

Selected role Owner

What user can do

- ☒ Allow user to only assign selected roles to selected principals (fewer privileges)
- ☐ Allow user to assign all roles except privileged administrator roles Owner, UAA, RBAC (Recommended)
- ☒ Allow user to assign all roles (highly privileged)

Condition + Select roles and principals

Microsoft recommends to add a condition to constrain what roles the principal can assign and to what principal types. For example, Alice can only assign the Virtual Machine Contributor role to Service Principals. [Learn more](#)

Owner

What user can do

☐ Allow user to only assign selected roles to selected principals (fewer privileges)

☐ Allow user to assign all roles except privileged administrator roles Owner, UAA, RBAC (Recommended)

☒ Allow user to assign all roles (highly privileged)

Owner is a privileged admin role that grants privileged administrator access, such as the ability to assign roles to other users. Microsoft recommends that you add a condition to narrow the permissions of this role to least privilege.
