

# How to configure a SaaS account in Azure Portal?

[docs.wetransact.io/how-to-configure-a-saas-account-in-azure-portal](https://docs.wetransact.io/how-to-configure-a-saas-account-in-azure-portal)

If you need to configure your account after already creating a subscription, follow steps below to find the existing subscription and send in your order.

## ● Sign in to Azure portal

## Type "saas"

The screenshot shows the Microsoft Azure portal interface. At the top, the search bar contains the text "saas". Below the search bar, a dropdown menu displays search results under the "Services" tab. The results include "SaaS", "SaaS (classic)", "NGINXaaS", and "Elastic SANs". To the right of the search results, there are tiles for "Tenant properties", "Cost Management", and "Cost Management", along with a "More services" link. The main content area is currently blank, showing only the headers "Name", "Type", and "Last Viewed". At the bottom, there are sections for "Navigate" (Subscriptions, Resource groups, All resources, Dashboard) and "Tools" (Microsoft Learn, Azure Monitor, Microsoft Defender for Cloud, Cost Management).

SaaS resources were changed to have an experience similar to other ARM resources like VMs and Azure apps. They now belong to resource groups, can be searched in Azure portal global search, etc. If you are searching for your existing SaaS resource, click on this banner to see the previous version of the SaaS list view. Each existing SaaS resource can be migrated to the new experience, via explicit user action.
