- Monitoring

Authentication method policies

Use authentication methods policies to configure the authentication methods your users may register and use. If a user is in scope for a method, they may use it to authenticate and for password reset (some methods aren't supported for some scenarios). [Learn more](#)

Migration status: In progress (change) [Begin automated guide](#)

Method	Target	Enabled
Built-In		
Passkey (FIDO2)		No
Microsoft Authenticator	All users	Yes
SMS		No
Temporary Access Pass		No

Step 4 – Enable Microsoft Authenticator

1. In the list, locate **Microsoft Authenticator**
2. Click on it to open the settings
3. Set **Enable** to **Yes**
4. Set **Target** to **All Users** (or select specific users/groups as needed)
5. Click **Save**

 Microsoft Authenticator is now enabled for your tenant.
