

How to Find a Billing ID?

docs.wetransact.io/how-to-find-a-billing-id

Finding your Billing ID helps you identify the unique billing account number needed when creating a private offer, ensuring the offer is correctly linked to the customer's payment account.

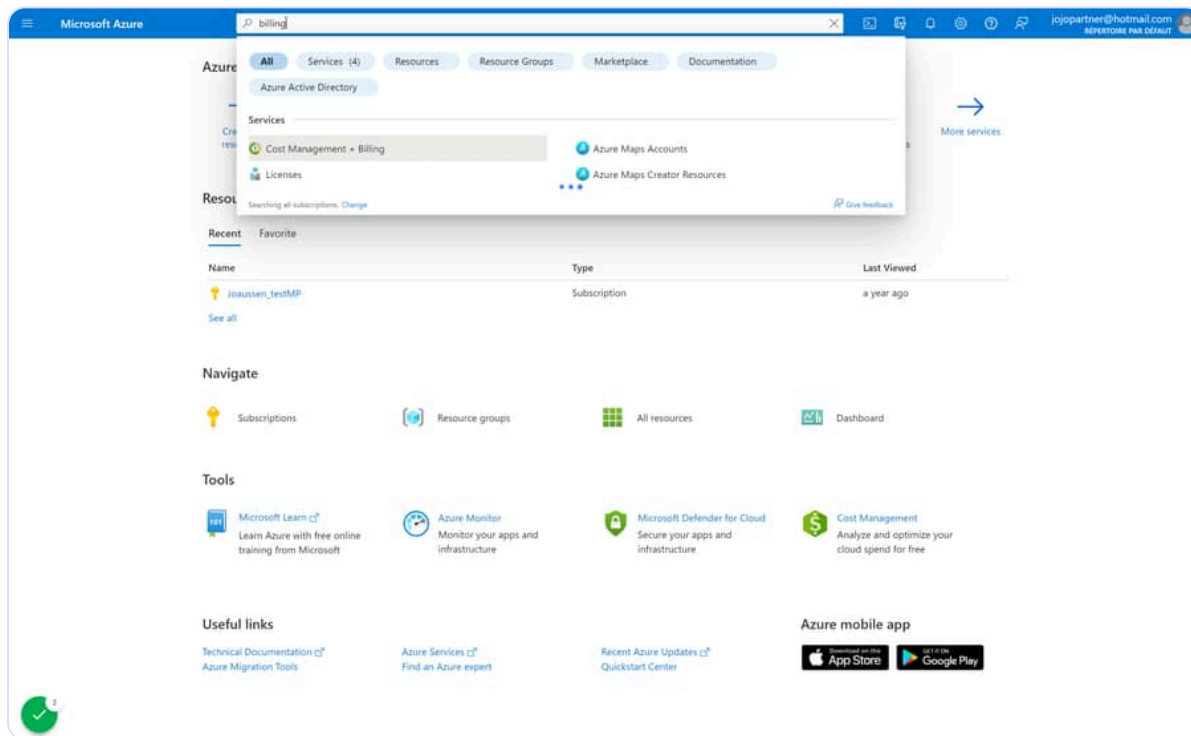

The user will need access to any Azure Subscription to view the Billing Profile. Any user assigned a role on the Azure Subscription (such as Owner, Contributor, or Reader) will be able to view the Billing Profile details.

Not sure who your Global Admin is?

Find out here [👉https://docs.wetransact.io/find-out-who-the-azure-global-admin-is](https://docs.wetransact.io/find-out-who-the-azure-global-admin-is)

● [Go to Home - Microsoft Azure](#)

● Type "billing" in the Search bar. Click on "Cost Management + Billing"

● Click on the billing scope in question.

Navigate to 'settings', then "Properties" field

Microsoft Azure

- Properties**
- Exports
- Cost allocation (preview)
- Transfer requests
- Get help + troubleshooting
- Open support request

A billing scope identifies your access. You may have access to multiple billing scopes. For example, you may have a billing account that you use for your personal projects and have access to your organization's billing account. The table below lists the scopes in **Répertoire par défaut** directory that you've access to. [Switch directory](#) to view scopes in other directories. [Learn more](#)

☐ As a Global administrator, check this box to view all Microsoft Customer Agreement (MCA) scopes in Répertoire par défaut directory (by default, you only see the scopes that you've access to)

Search

Billing scope	Billing scope type	Billing account	Billing account type	My Role
Johan Aussenac	Billing account	Johan Aussenac	Microsoft Customer Agreement	Billing account owner

The "ID" field contains the "Billing ID" you are looking for. You can copy it in your clipboard
