

Invite External Users in Azure Portal

docs.wetransact.io/invite-external-users-in-azure-portal

If you are unable to add WeTransact users (support@wetransact.io and bot@wetransact.io) directly in Partner Center – for example, because your account does not yet have the required admin permissions – you can invite them as external users through the Azure Portal instead.

This is the recommended workaround in those cases. Once the users have been added in Azure, you will then return to Partner Center to assign them the appropriate roles, as outlined in the steps below.

1 Sign in to Azure portal (<https://azure.microsoft.com>)

2 Search Users

The screenshot shows the Microsoft Azure portal interface. The top navigation bar includes the 'Microsoft Azure' logo, a search bar with the text 'user', and the 'Copilot' button. The main content area is divided into two sections: 'Azure services' and 'Resources'.

In the 'Azure services' section, there is a 'Users' icon with a blue arrow pointing to it. A search dropdown menu is open, showing the following options:

- All
- Services (99+) More (5)
- Users
- User privacy
- User settings
- Deleted Users

The 'Resources' section is titled 'Recent' and 'Favorite'. It contains a table with the following columns: Name, Type, and Last Viewed.

Name	Type	Last Viewed
testleyaruby	SaaS	2 weeks ago
324243324324	SaaS	2 weeks ago
testsupportfilerread	SaaS	2 weeks ago
landingaitest	SaaS	a month ago
landingpagetest	SaaS	2 months ago
testambience	SaaS	2 months ago
WeTransact Production	Subscription	3 months ago
testsupportcintoo	SaaS	3 months ago
testcintoo	SaaS	3 months ago
Cintoo	SaaS	3 months ago
testpurchasewetransact	SaaS	4 months ago

Click on New user

The screenshot shows the Microsoft Azure portal interface. At the top, there's a navigation bar with 'Microsoft Azure', a search bar, and a 'Copilot' button. Below this, the 'Users' page is displayed for the 'WeTransact' subscription. A blue arrow points to the '+ New user' button in the top toolbar. The left sidebar contains a list of navigation options: 'All users', 'Audit logs', 'Sign-in logs', 'Diagnose and solve problems', 'Deleted users', 'Password reset', 'User settings', 'Bulk operation results', 'Bulk operation results (Preview)', and 'New support request'. The main area shows a table of users with columns: 'Display name', 'User principal name', 'User type', 'Is Agent', and 'On-premises'. A message at the top of the table states 'Azure Active Directory is now Microsoft Entra ID'. Below the message, it says '347 users found'. The table lists several users, including '3M 30...', '3M 30...', '3M 30...', '3M 30...', 'AZ A...', 'A ac...', 'AW Ag...', 'Alfred Gu...', 'A...', 'A...', 'A...', 'AP A...', and 'AP A...'. Each user entry has a checkbox on the left and a document icon on the right.

Click on Invite external user...

The screenshot shows the Microsoft Azure portal interface, similar to the previous one. The 'New user' button in the top toolbar is clicked, and a dropdown menu is visible. The menu has two options: 'Create new user' (with a subtext 'Create a new internal user in your organization') and 'Invite external user' (with a subtext 'Invite an external user to collaborate with your organization'). A blue arrow points to the 'Invite external user' option. The background shows the same 'Users' page with the table of users.

Type 'support@wetransact.io' and click on 'review + invite'

The screenshot shows the 'Invite external user' page in the Microsoft Azure portal. The page has a blue header with the 'Microsoft Azure' logo and a search bar. Below the header, there's a breadcrumb trail 'Home > Users >'. The main title is 'Invite external user' with a subtitle 'Invite an external user to collaborate with your organization'. There are four tabs: 'Basics', 'Properties', 'Assignments', and 'Review + invite'. The 'Basics' tab is selected. The page contains several form fields: 'Email' (with a dropdown arrow), 'Display name', 'Invitation message', 'Send invite message' (a checkbox), 'Message', 'Cc recipient', and 'Invite redirect URL'. The 'Email' field is filled with 'support@wetransact.io'. At the bottom, there are three buttons: 'Review + invite' (highlighted with a red box and an arrow), '< Previous', and 'Next: Properties >'. A 'Give feedback' link is also present.

Type 'bot@wetransact.io' and click on 'review + invite'

This screenshot is identical to the one above, showing the 'Invite external user' page in the Microsoft Azure portal. The only difference is that the 'Email' field is now filled with 'bot@wetransact.io'. The 'Review + invite' button is still highlighted with a red box and an arrow.

Once you add the users, Sign in to Partner center (<https://partner.microsoft.com/>) to assign roles to these external users

Go to Partner center and sign In, follow the steps below.

● Click on Settings

● Click on Account settings

● Click 'User mangement' and Search 'support@wetransact.io' in the search bar and click on the email 'support@wetransact.io'

● Scroll down on this page and assign the roles, 'developer,business and finance' and click on 'Update'

● Click 'User mangement' and Search 'bot@wetransact.io' in the search bar and Click on the email.

● Scroll down on this page and assign the roles, 'developer,business and finance' and click on 'Update'
