

Global Admin – Partner Center setup

You own the Microsoft side of onboarding. Microsoft requires the Global Admin role to complete this setup – no one else in the company can do it for you. Budget about 45 minutes of hands-on work.

What you'll do (on call 1, with your CSM)

- ☐ **Enrol in the commercial marketplace** – create or activate the company's Partner Center account, including the E-SIGN agreement and company details (legal name, address, D-U-N-S number).
- ☐ **Validate the legal information** – confirm the company's legal profile so Microsoft can verify the business.
- ☐ **Give WeTransact access to Partner Center** – step-by-step guide: docs.wetransact.io/step-6-grant-wetransact-access-to-partner-center. This lets us build and manage the listing so you don't have to.
- ☐ **Complete the tax and payout profile** – with the details Finance prepared (legal name, legal address, beneficiary email and contact, IBAN, tax ID).
- ☐ **Azure subscription ID** – have it on hand for the listing's technical configuration.

1

Your call: Partner Center setup (30–45 min) with your WeTransact CSM – all four tasks above are done together on this call. After submission, Microsoft validation takes up to 48 hours; we monitor it and chase anything stuck.

WHAT YOUR CSM DOES

Runs the call and walks you through every click – enrolment, legal validation, access. Submits the tax and payout profile with you, then monitors Microsoft's validation (up to 48 hours) and chases anything stuck. Once access is granted, we configure the listing behind the scenes.

GOOD TO KNOW

If your company has never sold on Microsoft Marketplace before, the account enrolment itself is part of this step – the guide covers every click. Anything unclear, reply to the email this came in or book time with the CSM on the cover page.
