WeTransact SalesForce Installation Guide

docs.wetransact.io/wetransact-salesforce-installation-guide

By Leya Zheng

This guide is intended for Salesforce Admins or technical users responsible for setting up the WeTransact Salesforce integration. If you're a Sales or Marketing user looking to create Co-Sell deals or Private Offers, please refer to the SalesForce - Creating Co-Sell Deals & Private Offers

🟣 Overview

This package connects Salesforce with WeTransact, enabling automated syncing of Co-Sell and Private Offer records. You'll be able to create offers, retrieve statuses, and keep your data aligned with minimal manual work.

🟣 Requirements

Before you begin, make sure you have:

- Salesforce Administrator access
- Access to install AppExchange applications
- Your WeTransact API credentials (provided by WeTransact)

💡 **Note**

The installation should be completed by a Salesforce Administrator.

🟣 Install the Package

Click the WeTransact Salesforce Installation link, install for admin, and wait until complete.

🟣 Video : Salesforce WeTransact Installation Demo

The video below provides a full walkthrough of the installation and configuration process.

A step-by-step written guide is also available below.

🟣 Step-by-Step

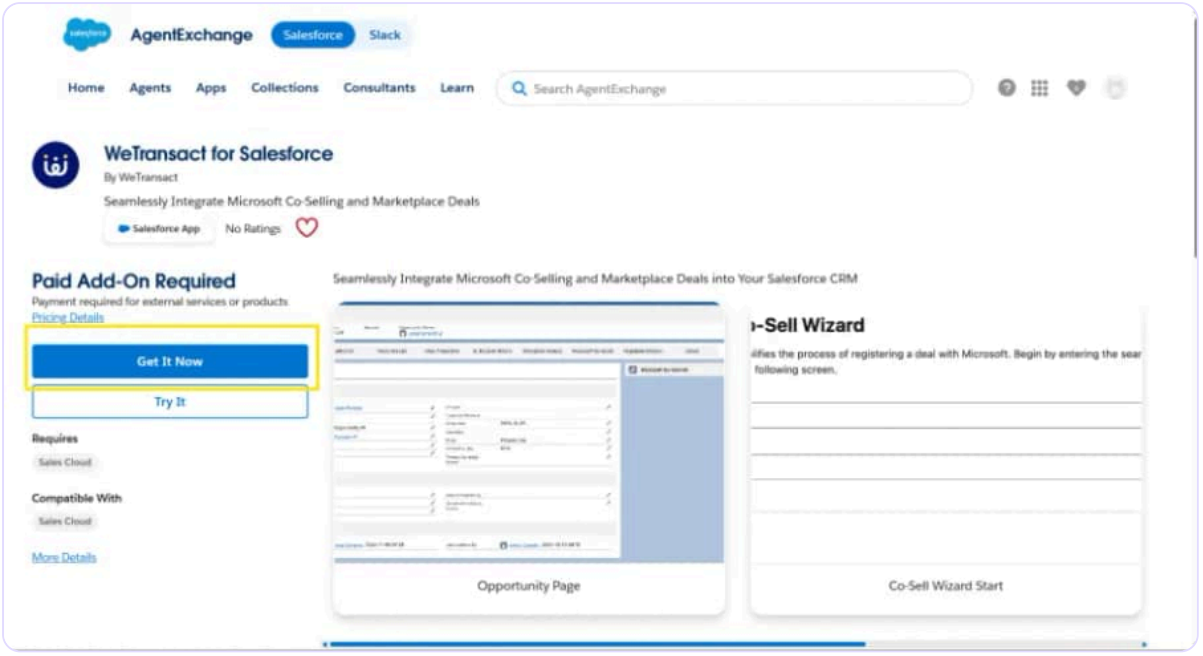

Salesforce Installation Guide

Install the WeTransact Salesforce App and configure it for Co-Sell and Private Offer management.

Step 1 : Install the WeTransact App

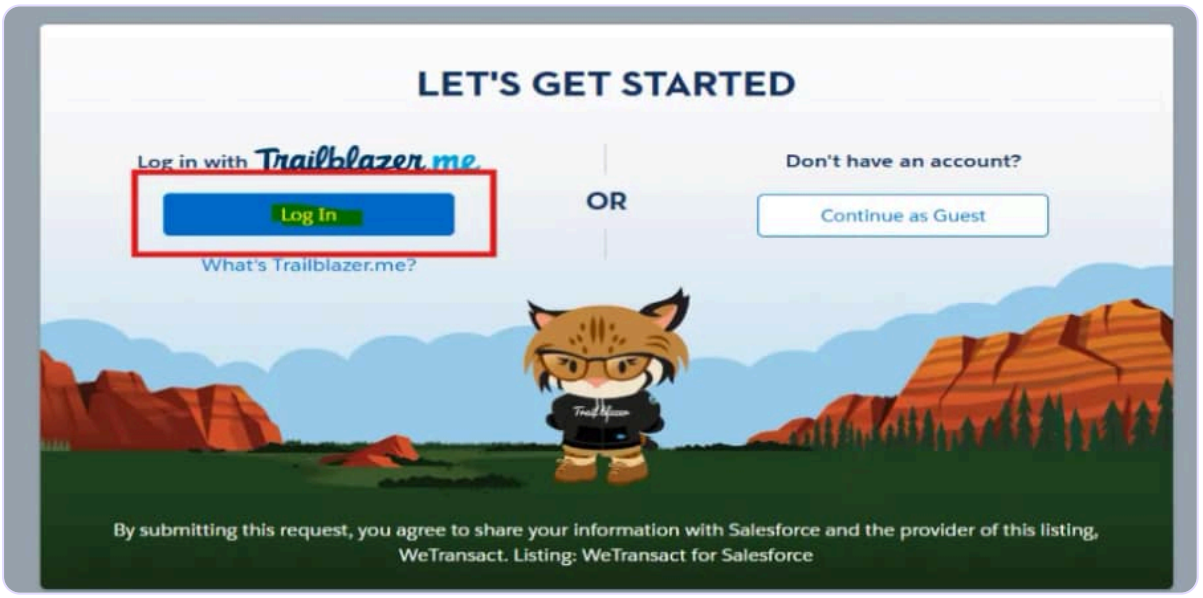

Open the Salesforce AppExchange listing: [WeTransact Salesforce Installation link]

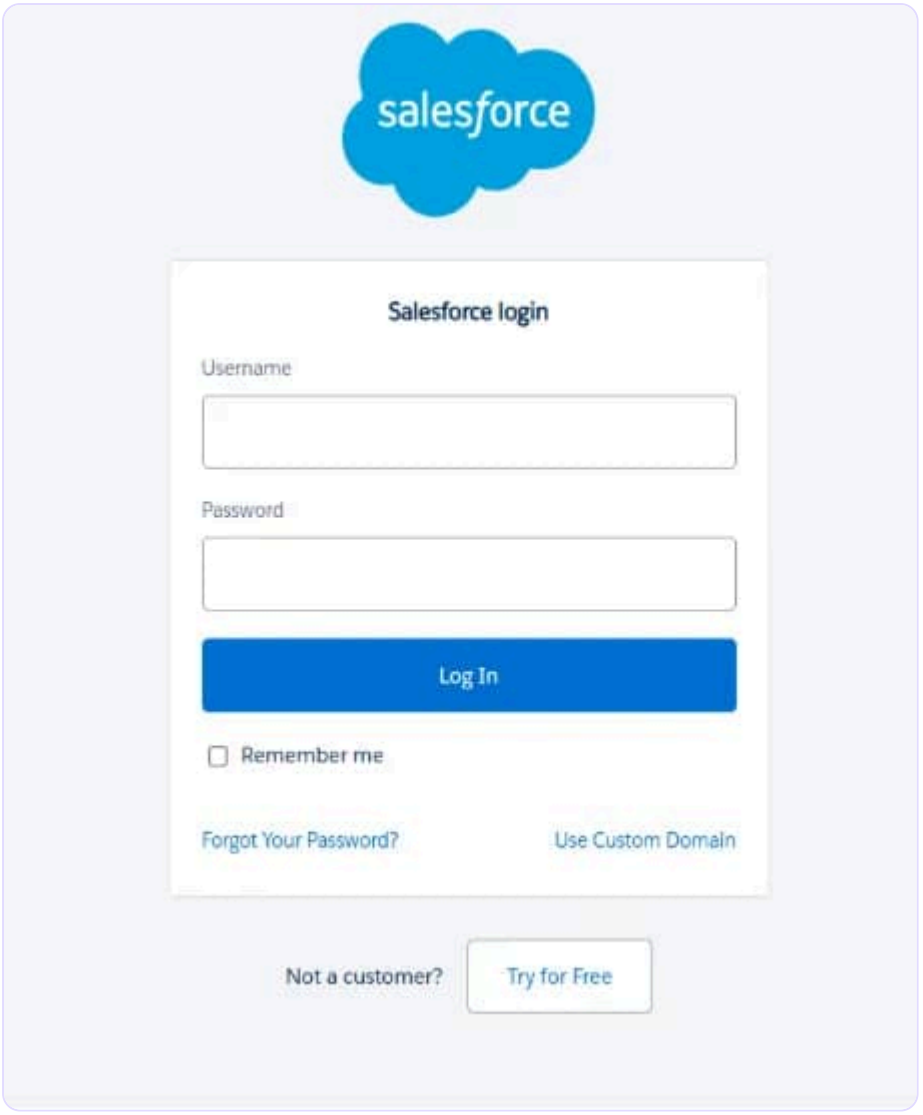

Click Get It Now.

Step 2: Log in to Salesforce

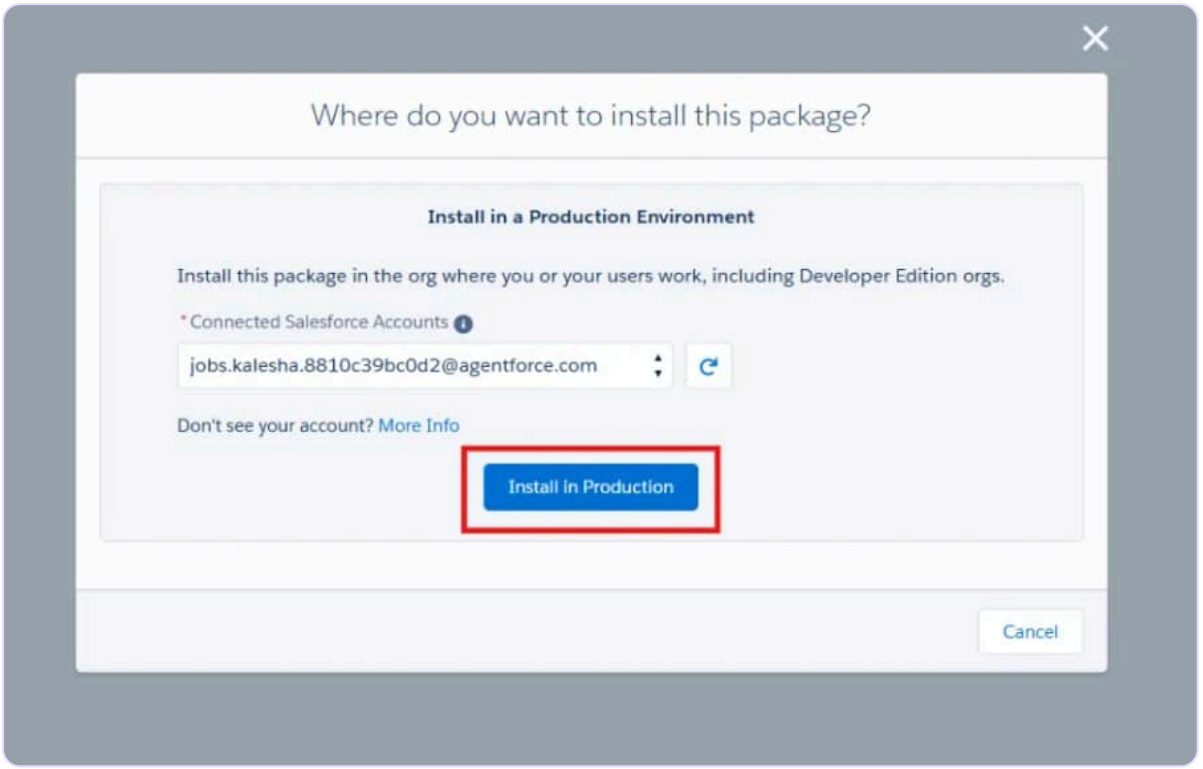

Click Login and authenticate with your Salesforce Administrator account.

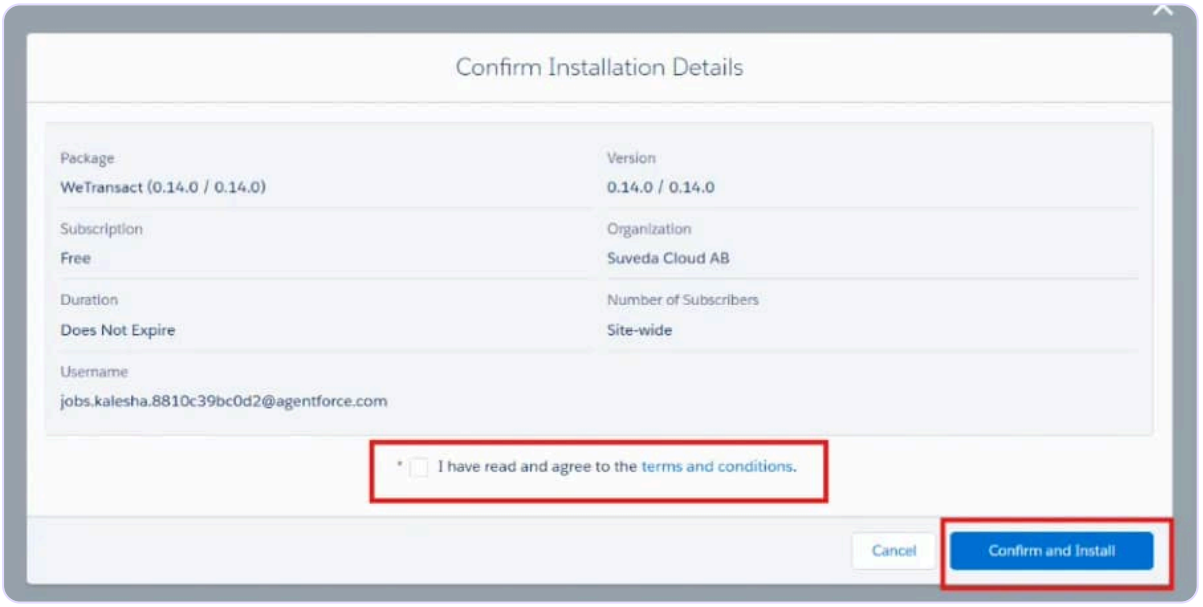

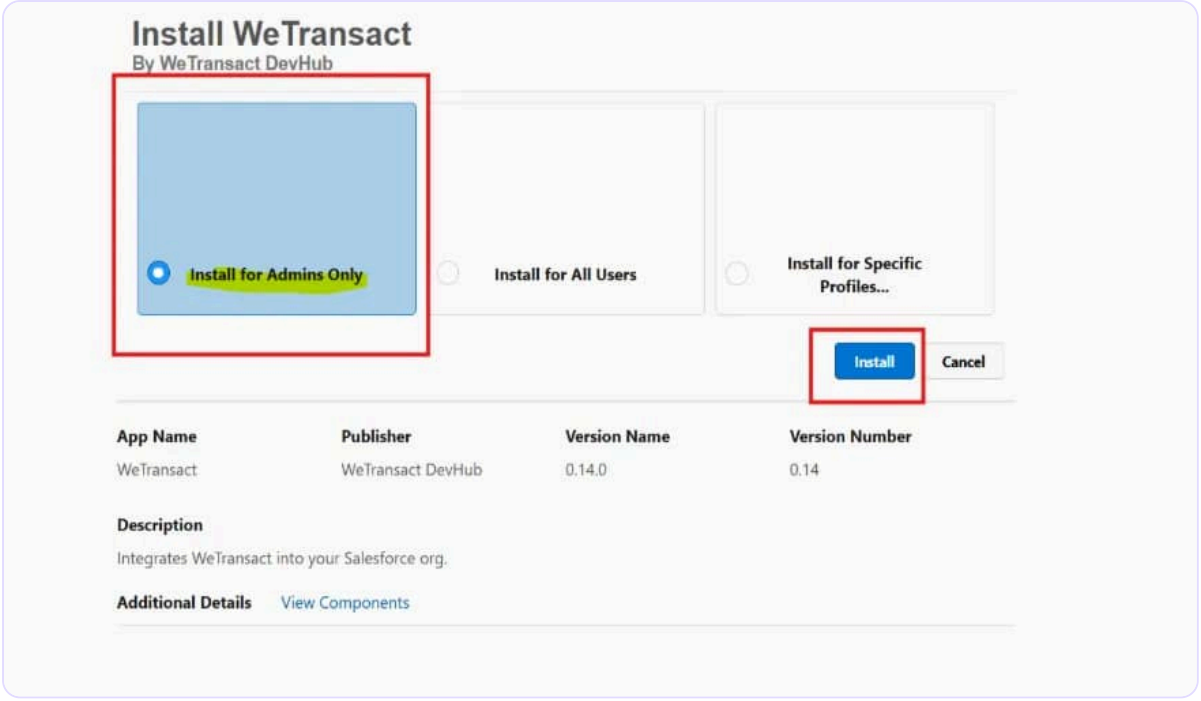

Step 3: Install the Package

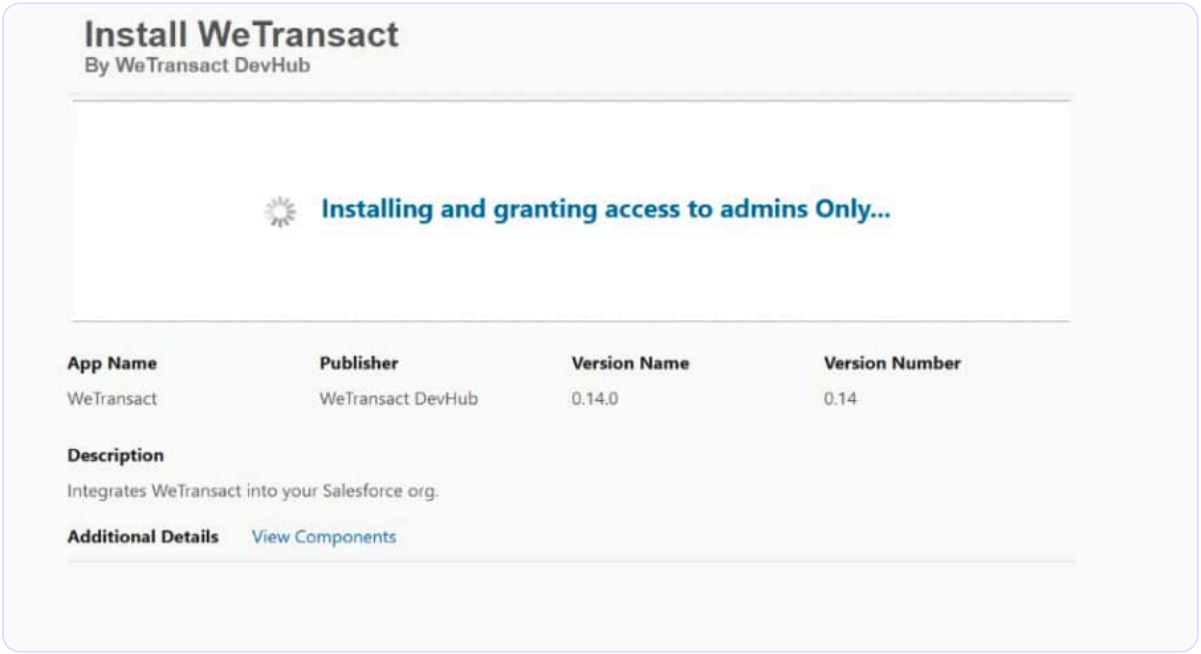

Choose: Install in Production

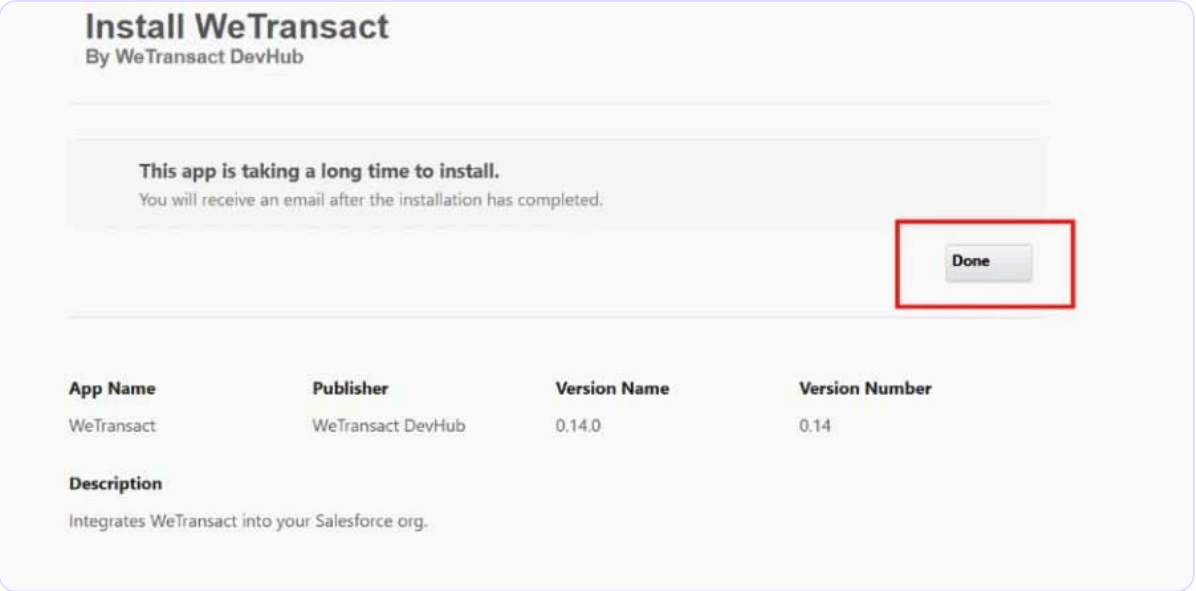

Select: Install for Admins Only, Click Install. Wait until the installation finishes.

After installation completes, click Done.

Step 4: Verify Installation

Navigate to: Setup → Installed Packages. Verify that WeTransact appears in the Installed Packages list.

√ Success

If the package appears, the installation completed successfully.

Step 5: Assign Permissions

All access is granted through Permission Set Groups (PSGs). Assign the appropriate Permission Set Groups based on the user's role.

💡 **Permission Set Groups**

WeTransact – Admin Access

Grants full administrative access to credentials, logs, flow configuration, and manual execution.

WeTransact Private Offer – User Access

Grants access to create and manage Private Offers from the Opportunity page.

WeTransact Co-Sell – User Access

Grants access to create and manage Co-Sell records from the Opportunity page.

Bulk-Assign Permission Set Groups

Use this method to assign or remove a Permission Set Group for multiple users at once.

💡 **Tip**

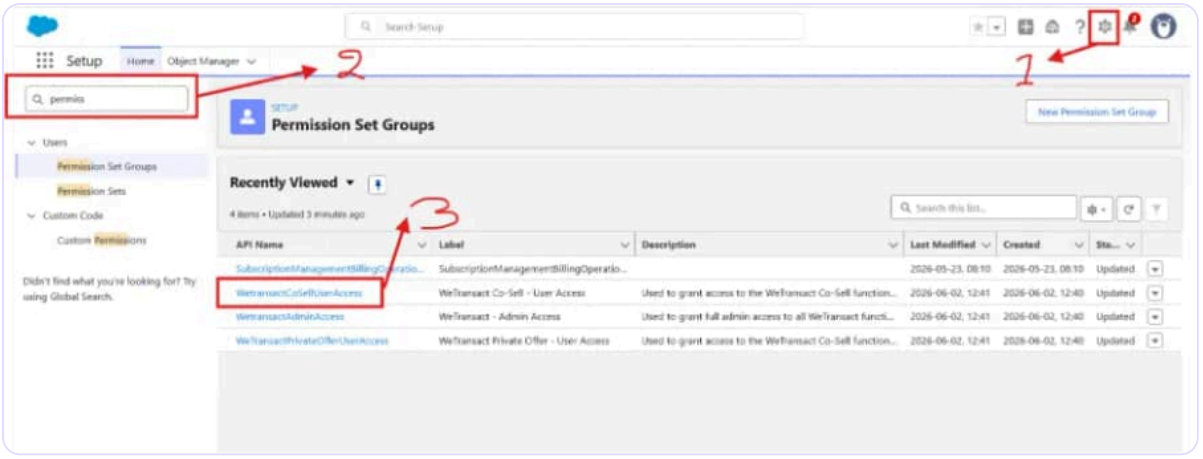

Permission Sets can also be assigned individually from each User record.

1. Open Permission Set Groups

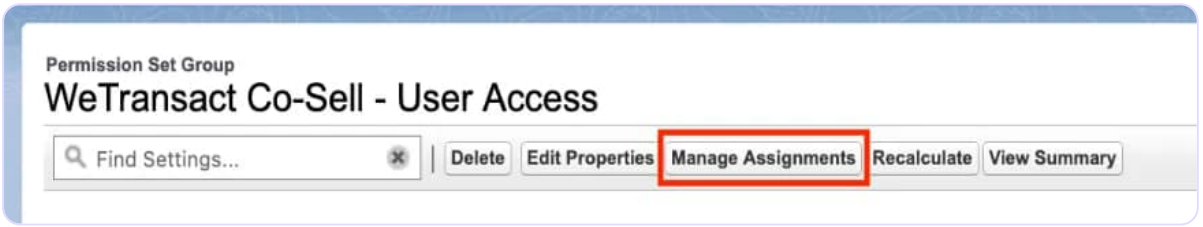

Navigate to: Setup → Permission Set Groups

2. Open the Permission Set Group

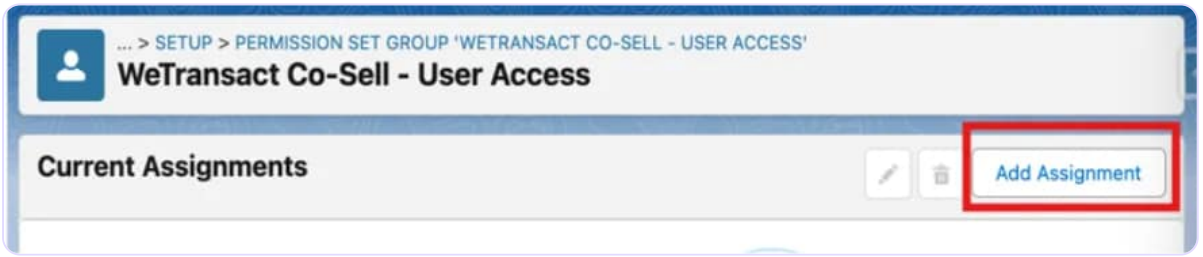

For example: **WeTransact Co-Sell – User Access**

3. Click Manage Assignments

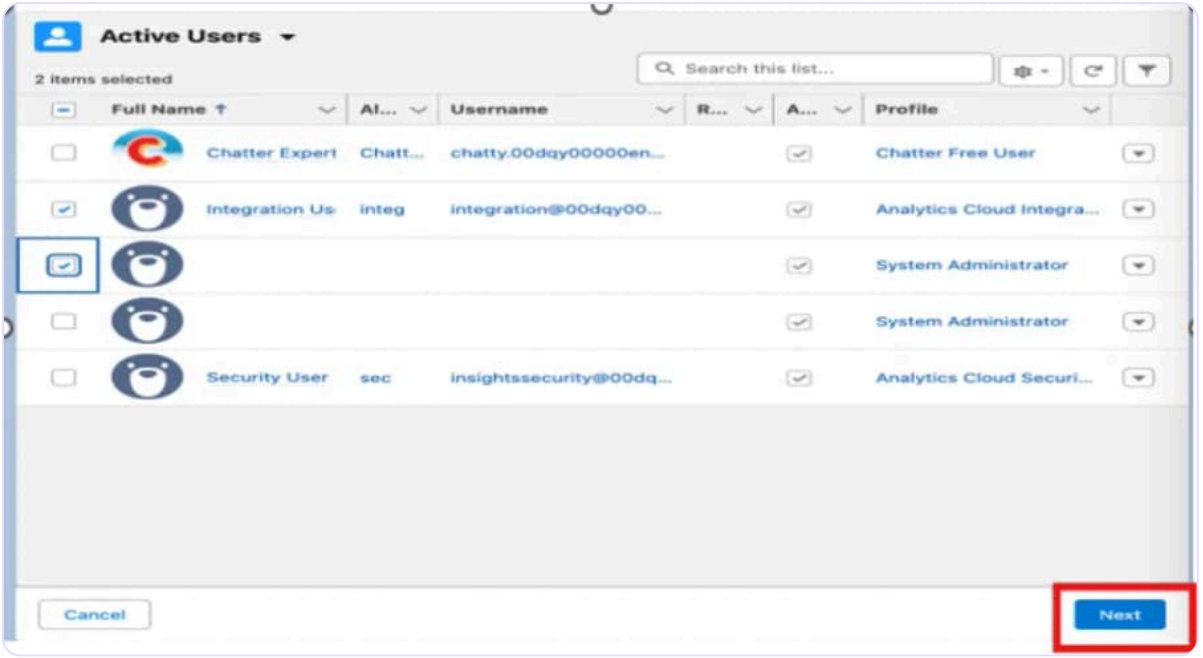

4. Click Add Assignments

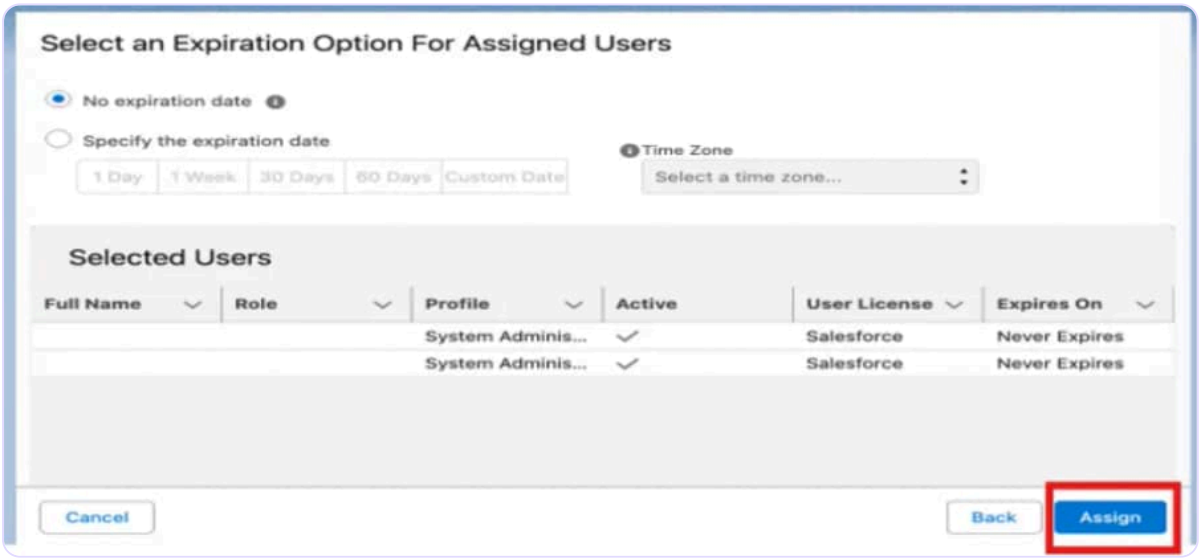

5. Select Users

Choose the users that should receive access. Click Next.

6. Assign Permissions

Click **Assign**.

💡 **Note**

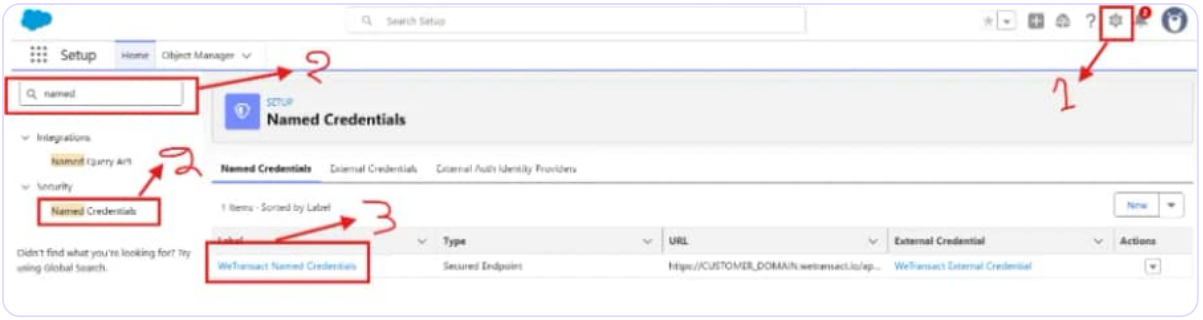

Repeat these steps for the remaining Permission Set Groups if required.

Step 6: Configure the API Connection

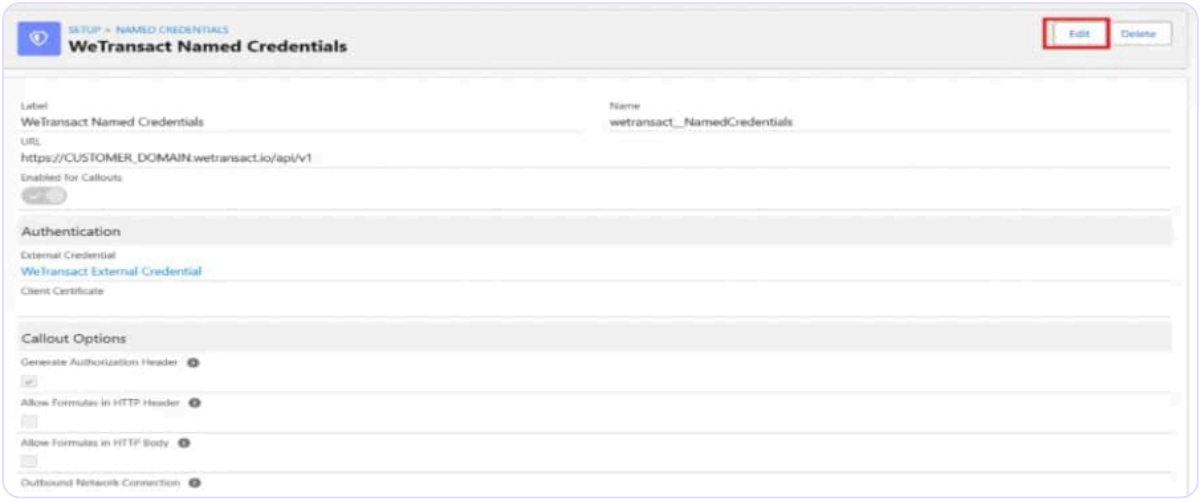

The Salesforce App communicates with WeTransact through Named Credentials.

Navigate to: **Setup** → **Named Credentials**

Open: **WeTransact Named Credential**

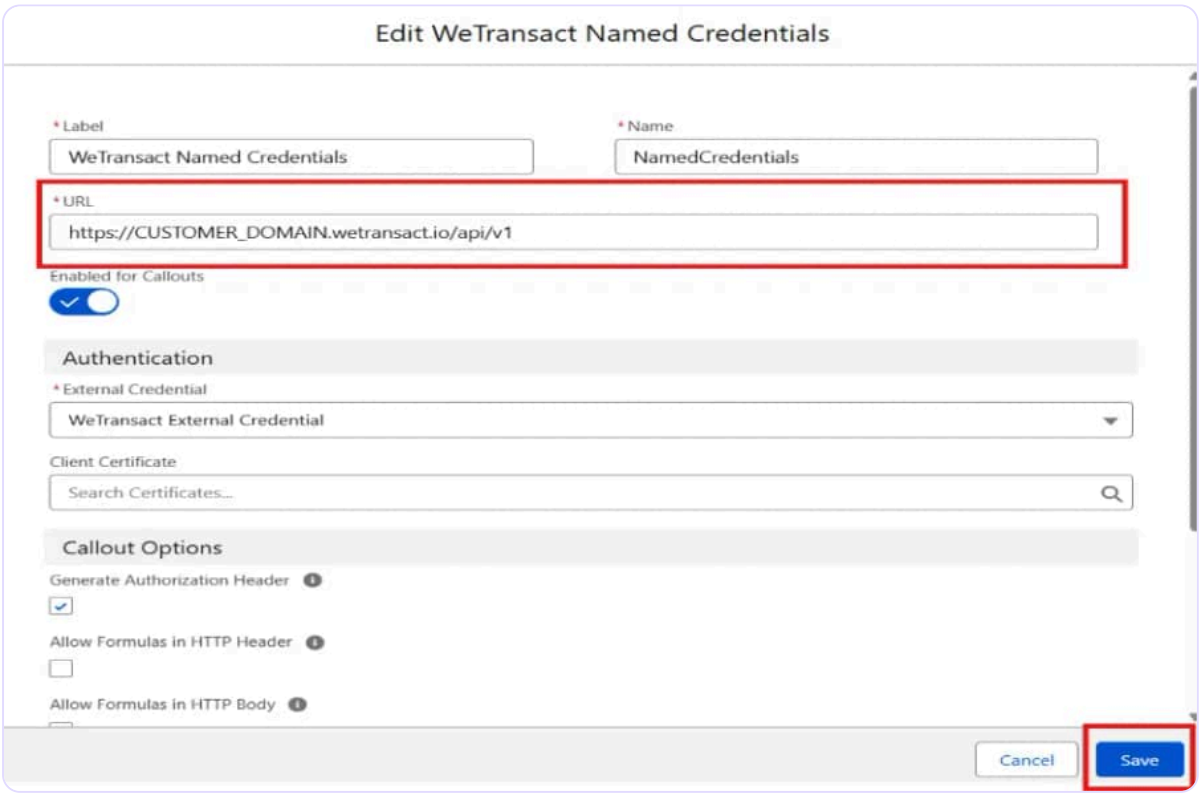

Click Edit.

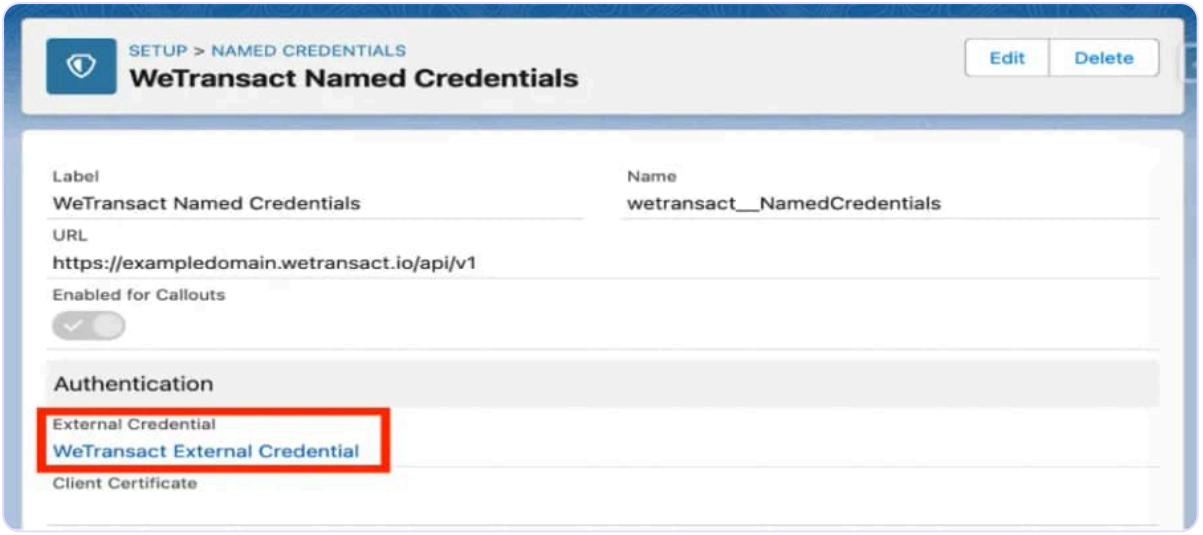

Update the endpoint to:

1https://api.archera.wetransact.io/api/v1

Click Save.

Next, open: WeTransact External Credential

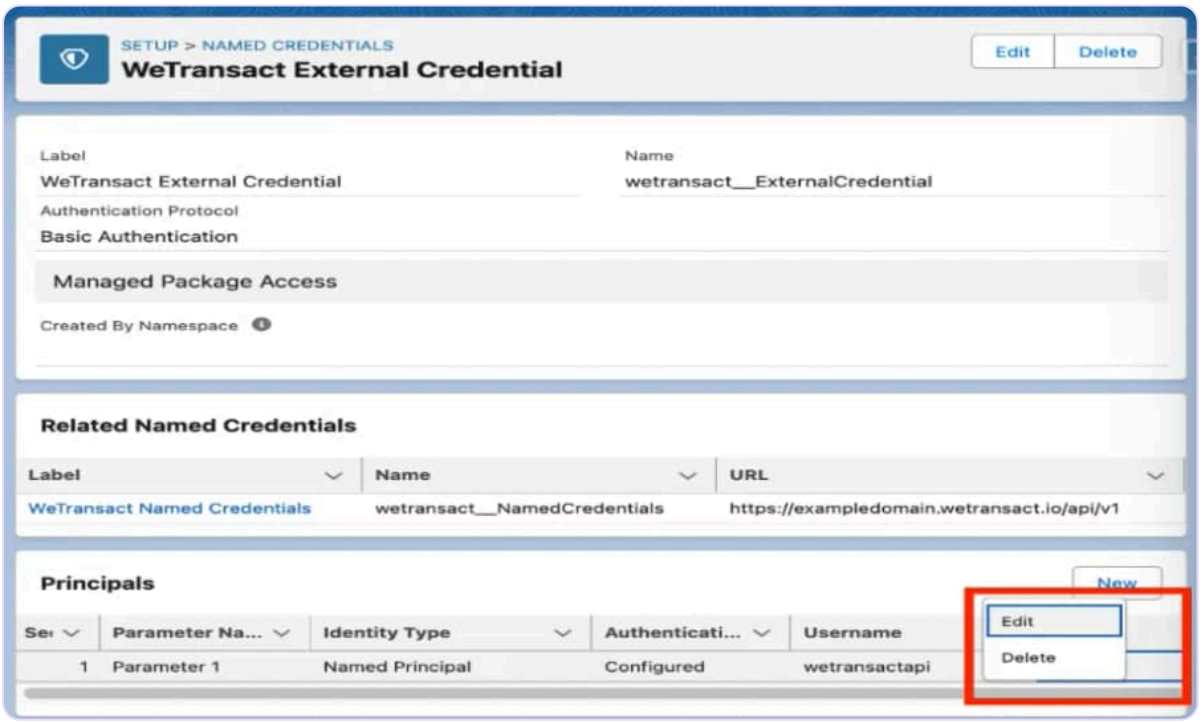

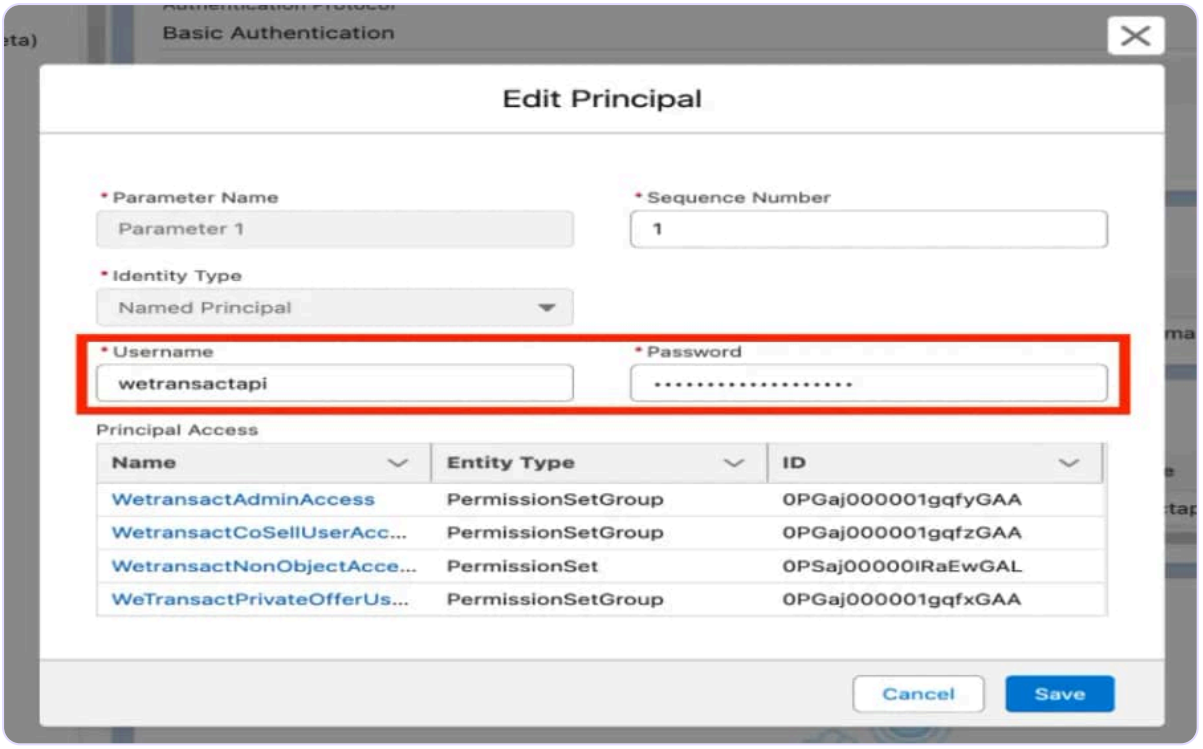

Edit the Principal.

Please go to your WeTransact Portal → Settings → Integrations → CRM API Token Generator → Generate

Enter:

- Username
- API Token

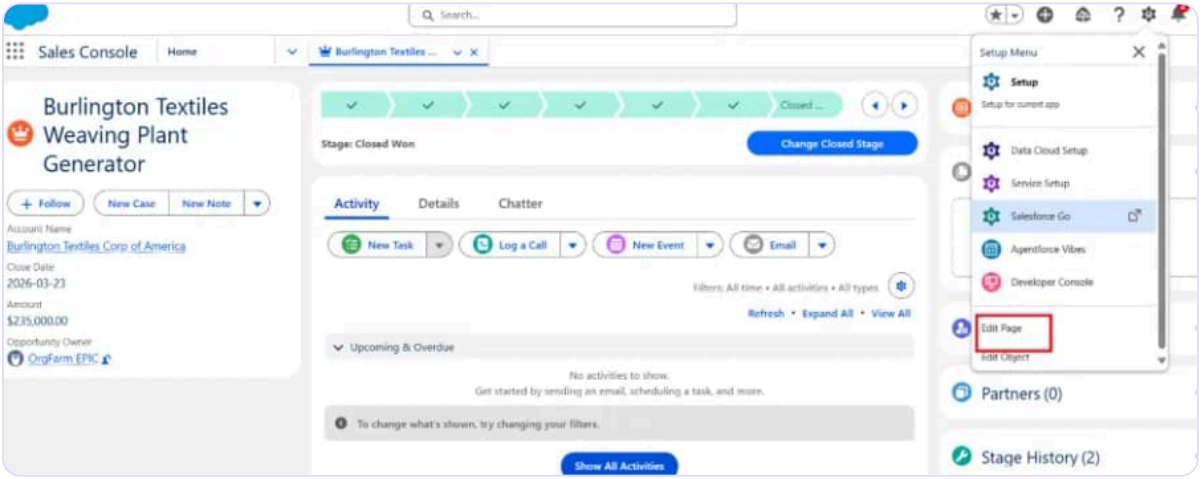

✅ **Success**

Salesforce is now connected to the WeTransact API.

Step 7: Add the Co-Sell Wizard to Opportunity Pages

Open any Opportunity.

Select: ⚙️ → **Edit Page**

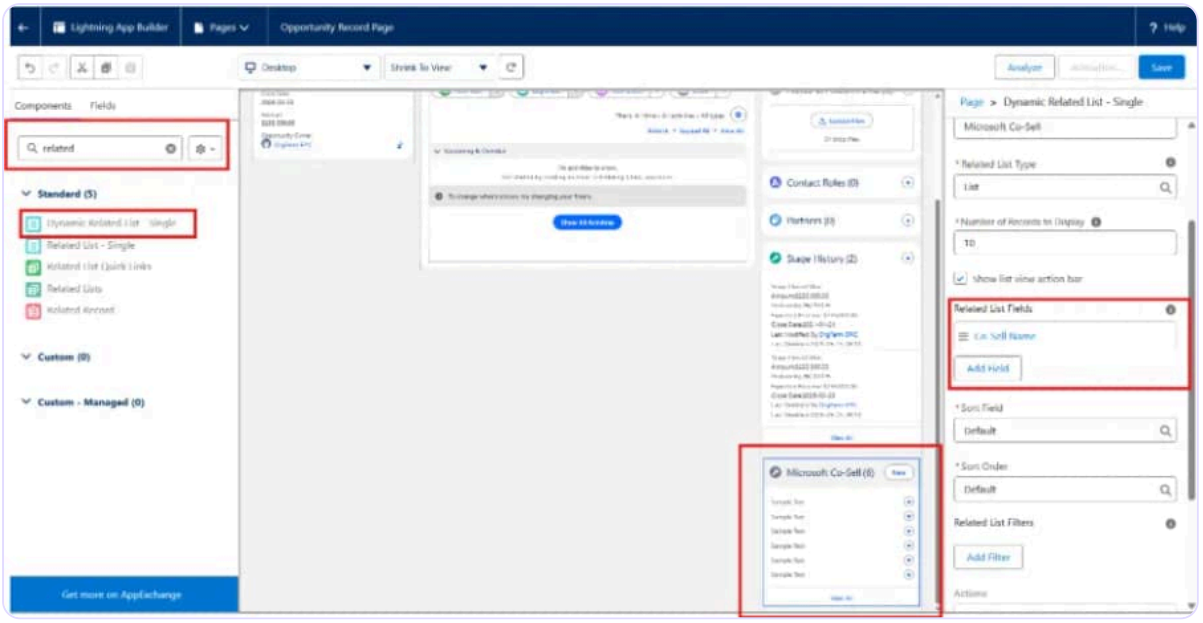

Search for: Dynamic Related List – Single

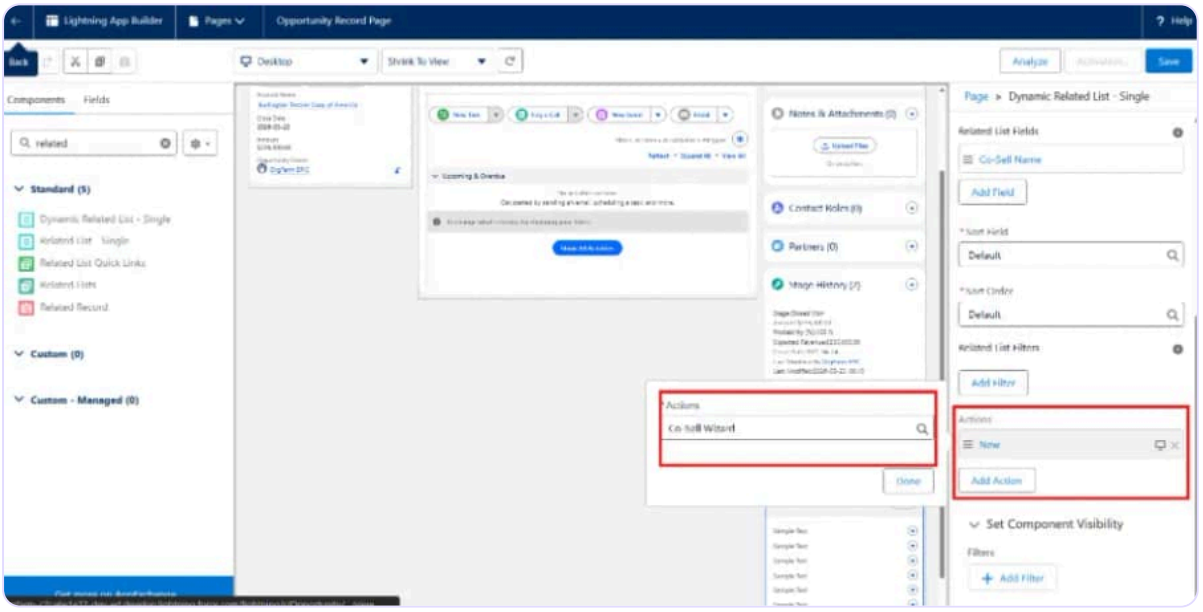

Drag it onto the page.

Add the following fields:

- Deal/Offer Name
- Deal/Offer Status
- Sync Status

Replace the New action with: Co-Sell Wizard

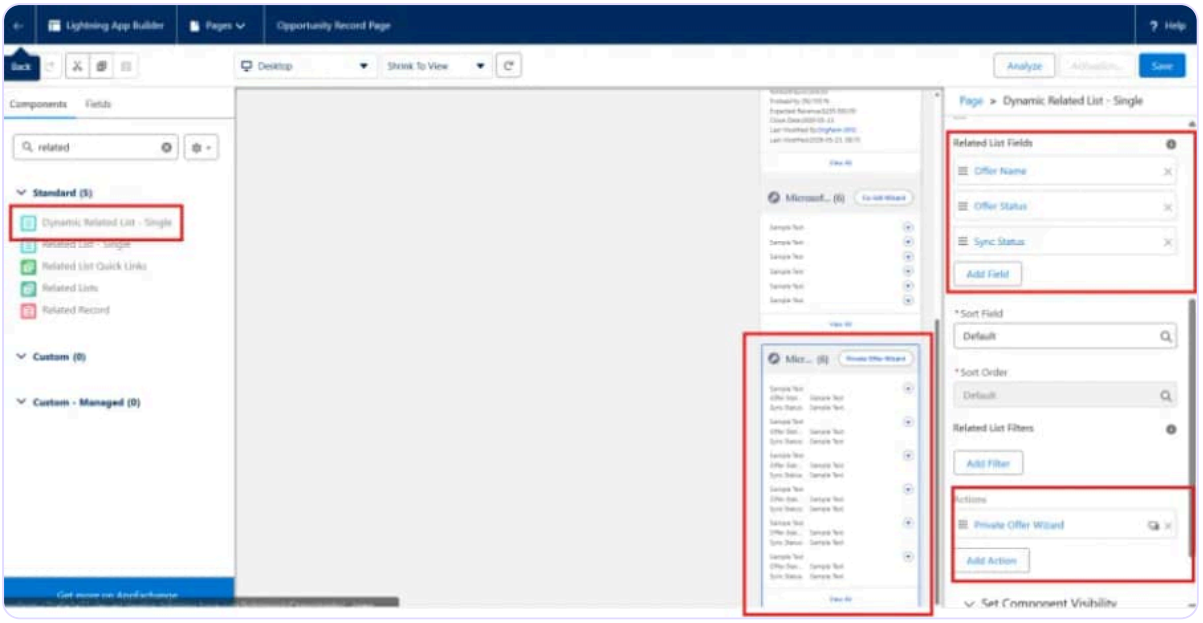

Step 8: Add the Private Offer Wizard

Repeat the previous steps. Add another Dynamic Related List – Single.

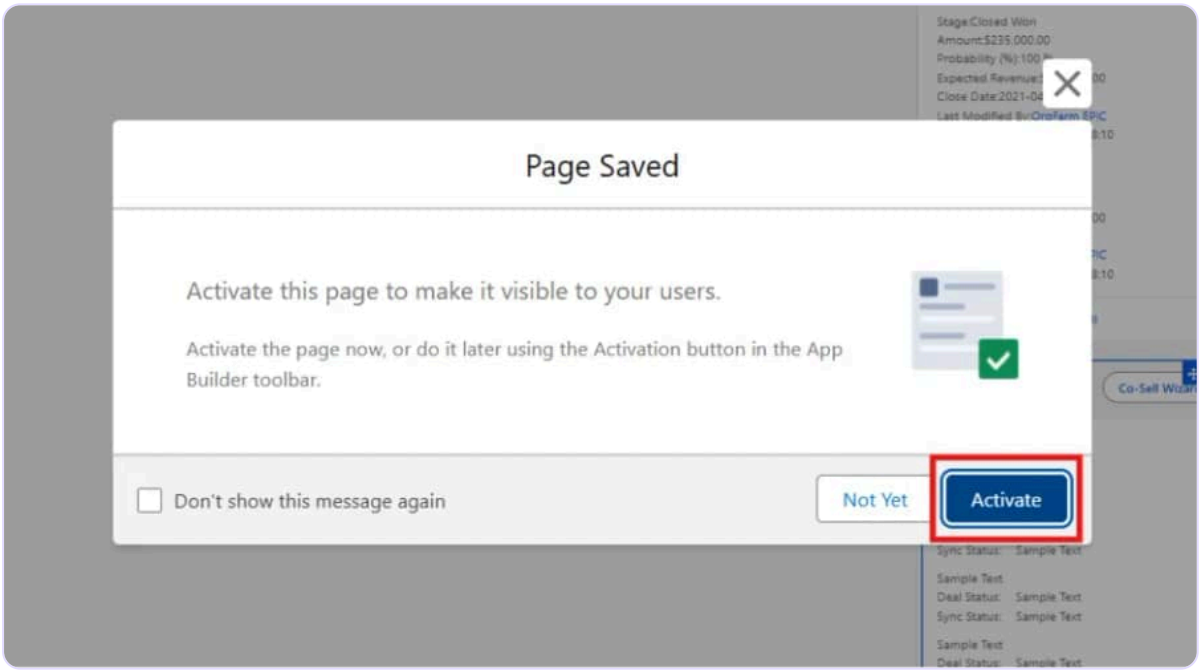

Use these fields:

- Offer Name
- Offer Status
- Sync Status

Replace the New action with: Private Offer Wizard

Save and Activate the page

Verify the Installation

Open any Opportunity.

You should now see:

- √ Co-Sell Wizard
- √ Private Offer Wizard

Both should appear and be ready for use.

Installation Complete 🎉

The WeTransact Salesforce App is now installed and fully configured.

🟣 Support

We hope you were able to successfully follow the steps outlined above. If you face any issue please do not hesitate in reaching out to your WeTransact representative.
