

Create an IP-cosell support ticket (ACR)

docs.wetransact.io/create-an-ip-cosell-support-ticket-acr

Please note the process to solve this issue has changed (16th January 2026), now you should follow Plan A first.

PLAN A: If you have a Microsoft PDM:

Please request to them to request a remapping of the TPID and the Partner ID, this request should come from them. Explain that the ACR is not showing in Partner Center, and hence not able to apply for IP cosell.

Here is a template you can use: Hi {PDM Name},

I'm currently unable to apply for **IP Co-sell** because our **ACR/Azure consumption is not showing in Partner Center** (it appears as 0 in Insights → Azure usage).

To resolve this, could you please submit an internal request to **remap the TPID and the Partner ID** (TPID ↔ Partner ID mapping) so ACR becomes visible in Partner Center and we can proceed with IP Co-sell?

Partner ID (for the remapping request): {paste Partner ID here} {You can find it in Partner Center: **Settings** → **Identifiers** → **Partner ID**.}

thank you!

{your name}

PLAN B: If you do not have a Microsoft PDM:

you should open a support ticket please see below.

1

Prerequisites:

TPID number: this number is Microsoft internal number and only your PDM or AE in Microsoft will be able to give it to you

Partner ID: Go to: Settings in Partner Center => Identifiers => Partner ID

Tenant ID: Go to: Settings in Partner Center => Tenants

Make sure you have the right view permissions in: Settings => User management

Take a screenshot of your Azure consumption not showing in: Partner Center => Insights => Azure usage

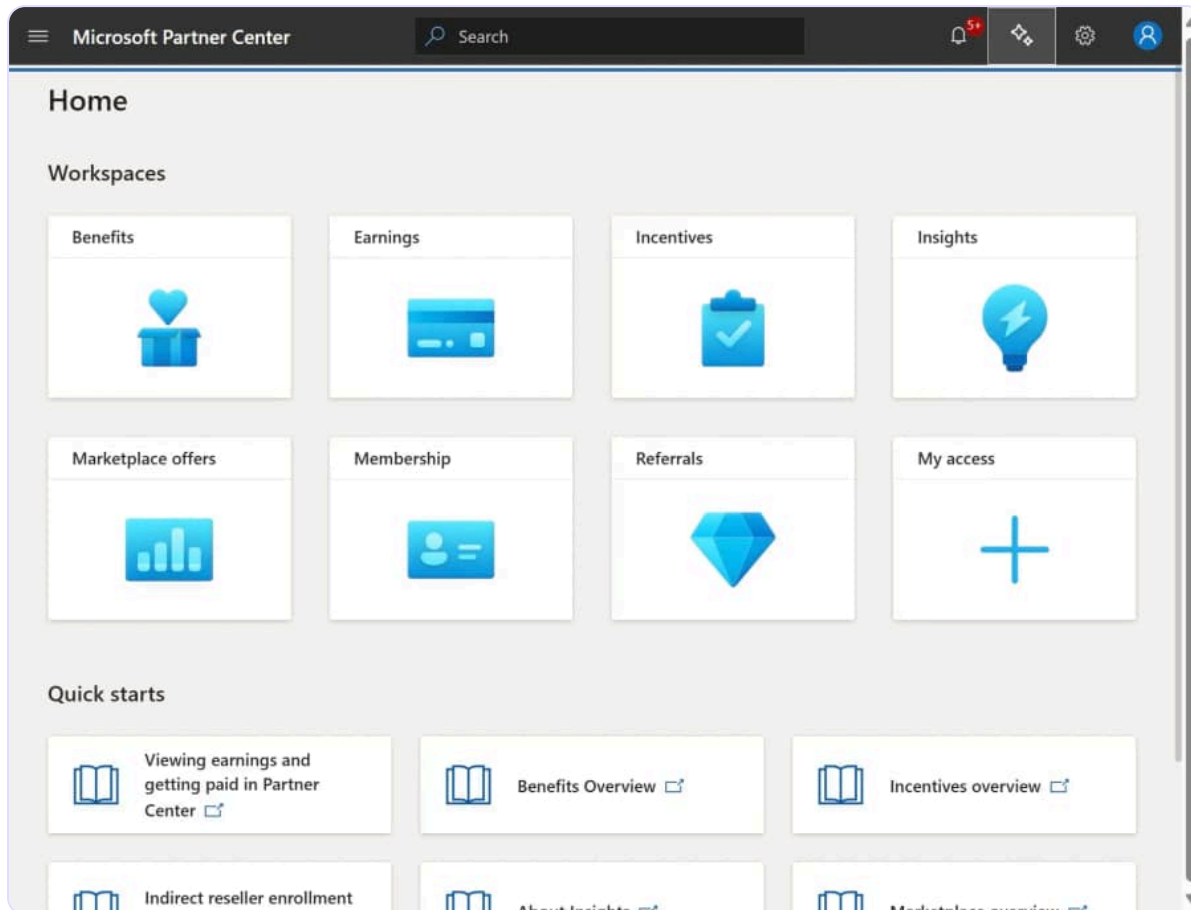

Download a couple of invoices proving your consumption is above 0

WE START

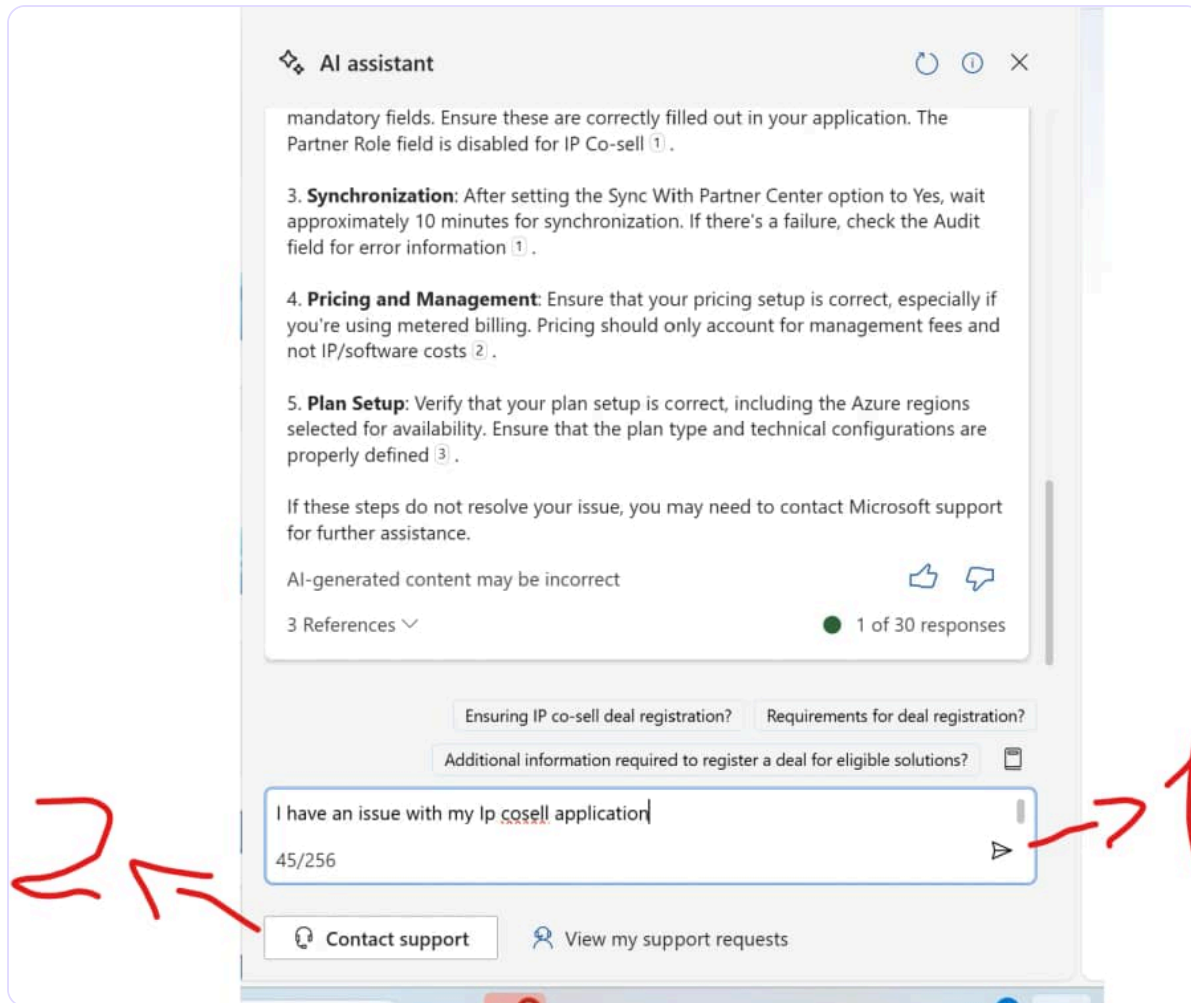

Go to [Microsoft Partner Center - Home](#)

2

Click on the Stars Icon next to the settings icon

3
Send a message in the bot chat, and click "Contact support"

4

After achieving co-sell-ready status, there are three more requirements to achieve *Azure IP co-sell incentive status*:

- Requirement 1: Reach the required revenue threshold. At the *organization level*, generate at least USD100,000 of Azure Consumed Revenue over the trailing 12-month period. This threshold can be reached with a combination of Azure solutions. If the offer is transactable in the commercial marketplace, you can meet this requirement by meeting a billed revenue threshold of USD100,000 over the trailing 12-month period.
- Requirement 2: Pass the Microsoft technical validation for an Azure-based solution. A technical validation must confirm that more than 50% of your offer's infrastructure uses repeatable IP code on Azure. (Transactable Azure VMs and Azure application solutions on the commercial marketplace meet this requirement by default.)
- Requirement 3: Provide a reference architecture diagram. Upload a reference architecture diagram with your co-sell documents in Partner Center for review. For guidance on creating this diagram, see [Reference architecture diagram](#) [↗](#). For information about uploading the diagram, see [Configure co-sell for a commercial marketplace offer](#) [↗](#).
- Requirement 4: Offer Transactability on marketplace. **Effective July 1, 2023**, your new offers (aka solutions) should be transactable on Azure marketplace. This condition is applicable only to get IP co-sell eligible status.

Add problem summary and description using these templates:

Problem summary: [Name of the company] is unable to view Azure Consumption in the Microsoft Partner Center, where the usage appears as 0 despite confirmed revenue generation. This issue typically occurs when the **TPID** and the **Partner ID** are not correctly mapped within Microsoft systems. Hence the IP cosell eligibility does not get approved. We request escalation to ensure the correct mapping between the **Organisation ID / TPID** and **Partner ID**. Please find the information that needs to be linked: TPID: **(needs to be provided by PDM or AE from Microsoft)** Partner ID: **(identifiers)** Tenant ID : **(tenants)** Please find a similar support case which was resolved which will help you find the right path to perform this connection: 2506130040009522 **Description:** Please **escalate this issue** to have the correct **TPID ↔ Partner ID mapping** applied, enabling **IP Co-sell approval** and visibility of Azure Consumption in Partner Center. Similar case for your reference and find the right path of escalation, this ticket was solved: 2506130040009522
