

Create Warmify Email Rule in Outlook

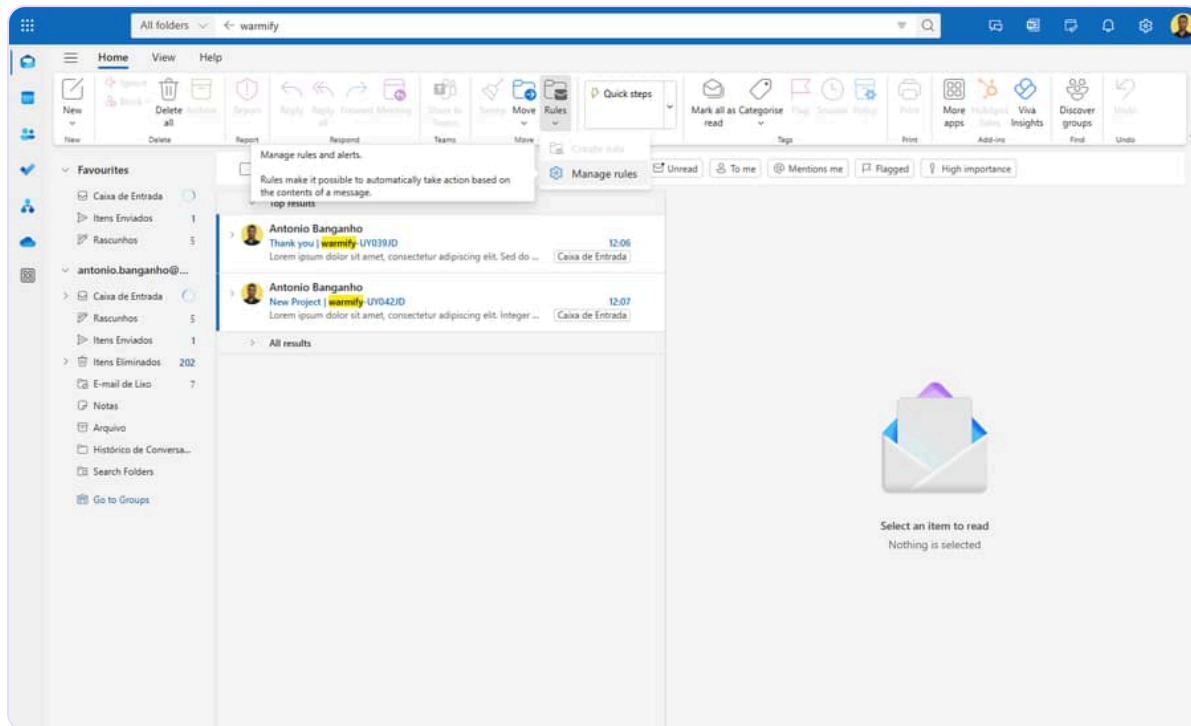

docs.wetransact.io/create-warmify-email-rule-in-outlook

Easily keep your Warmify emails organised by creating a custom rule in Outlook. This ensures all Warmify messages are filtered and never missed.

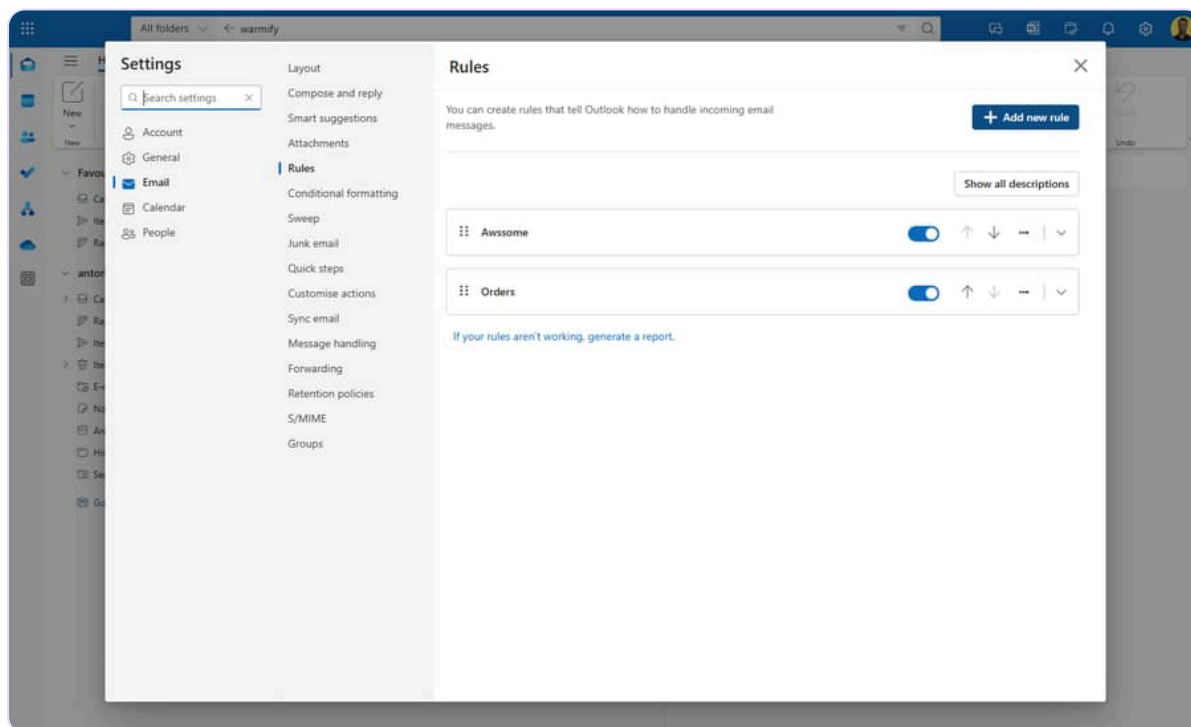

Click on Rules

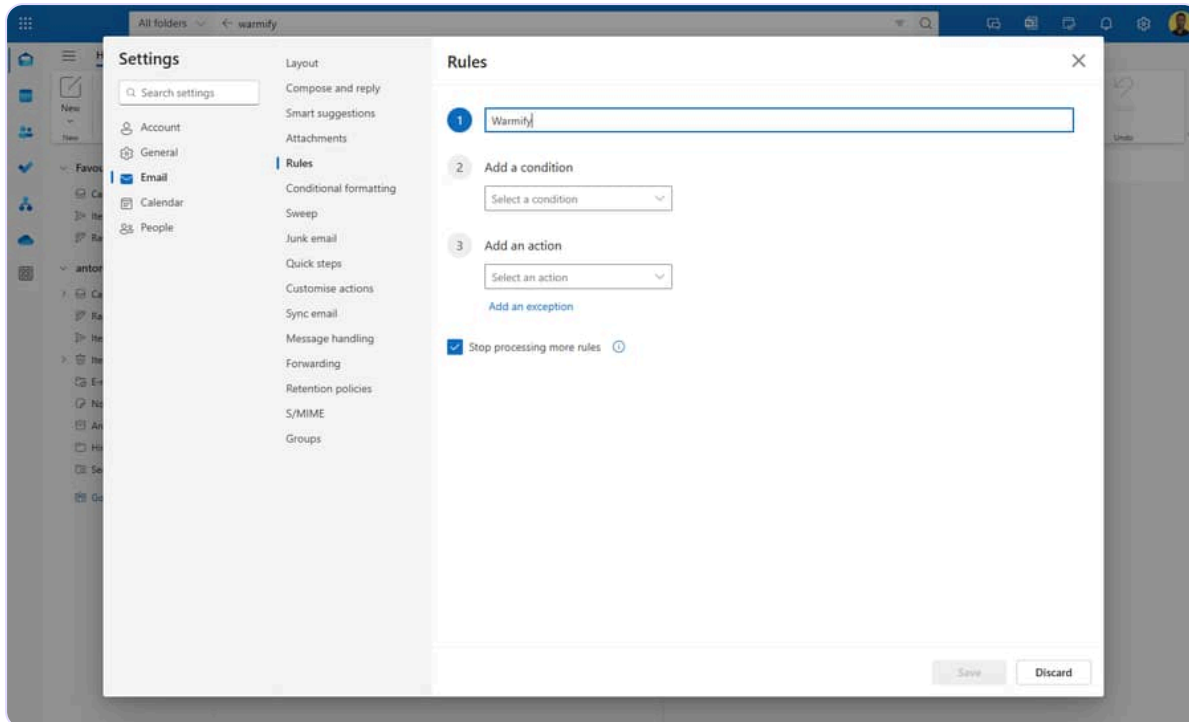

Click on Manage rules

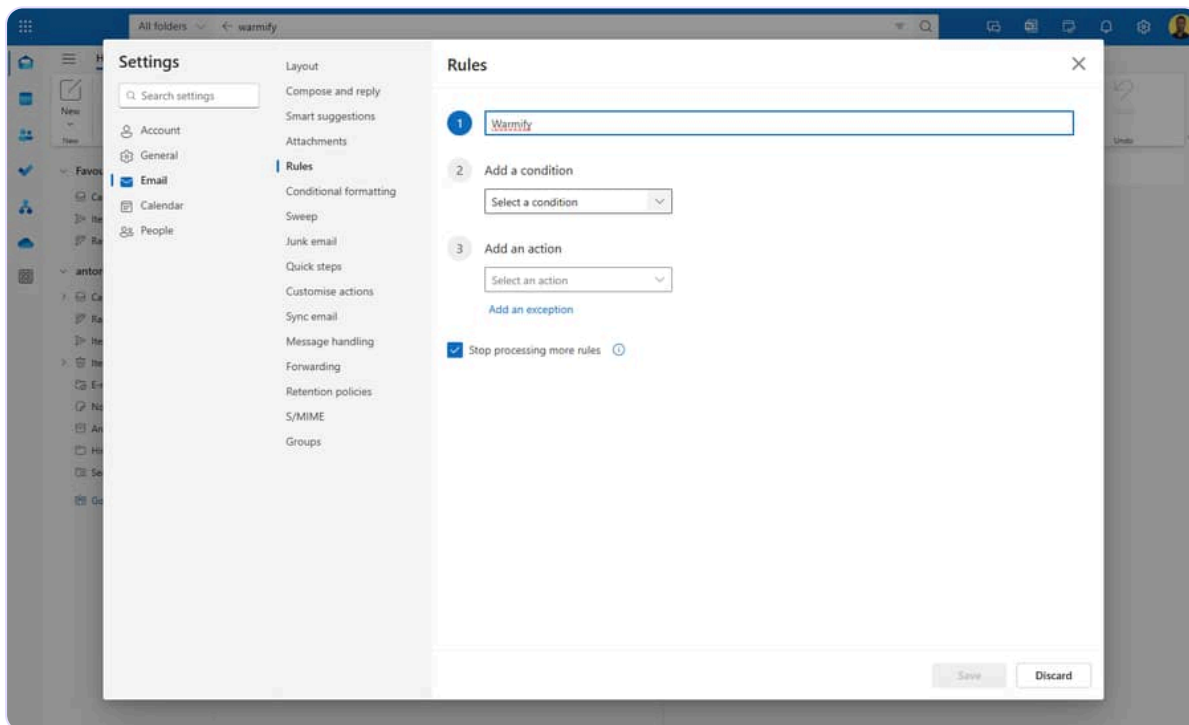

Click on "Add new rule"

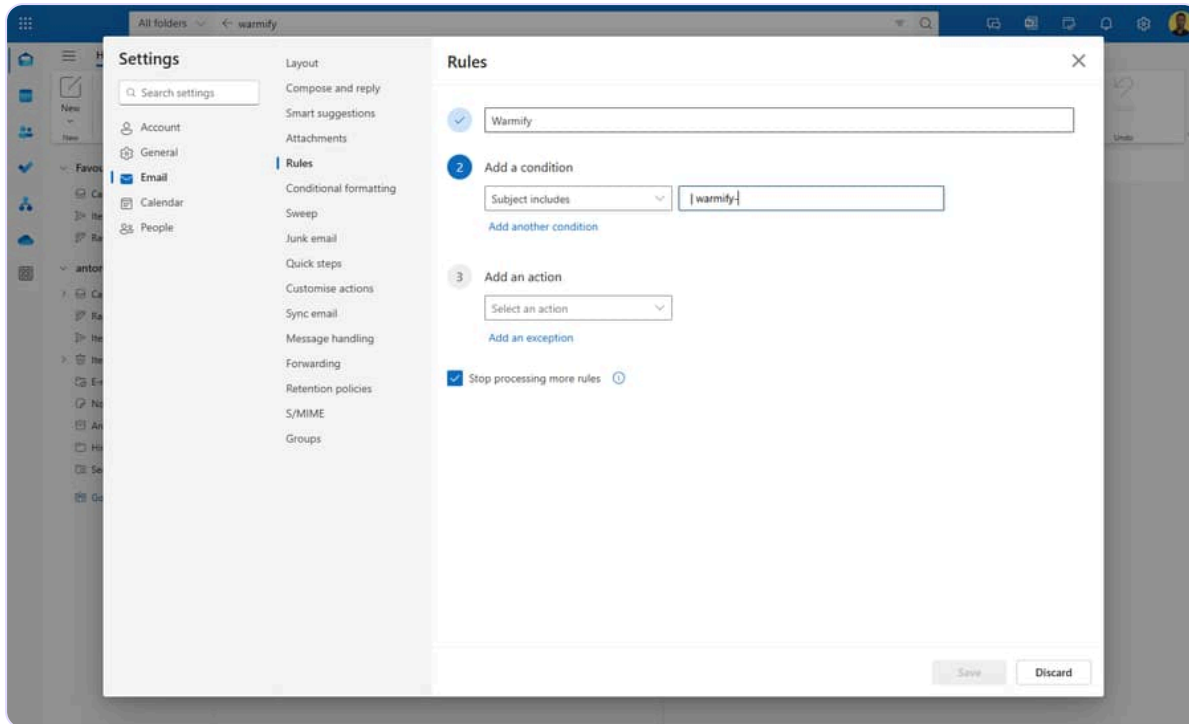

● Set the name of the rule to "Warmify"

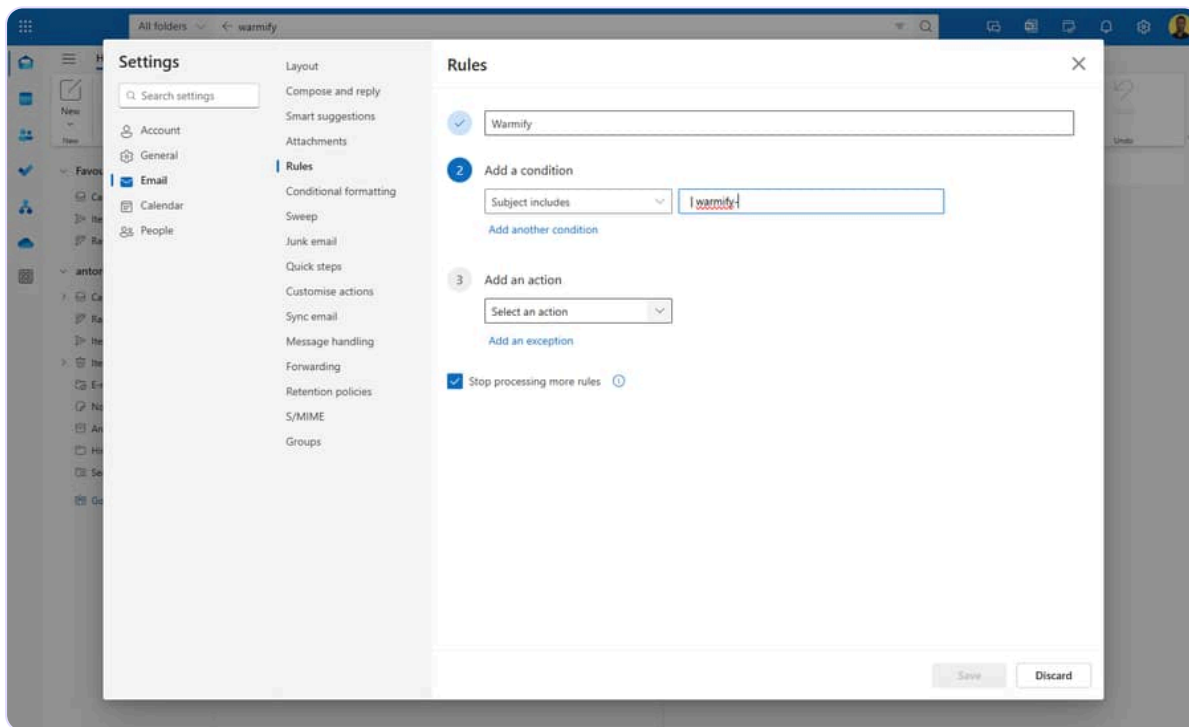

● Select "Subject includes" condition

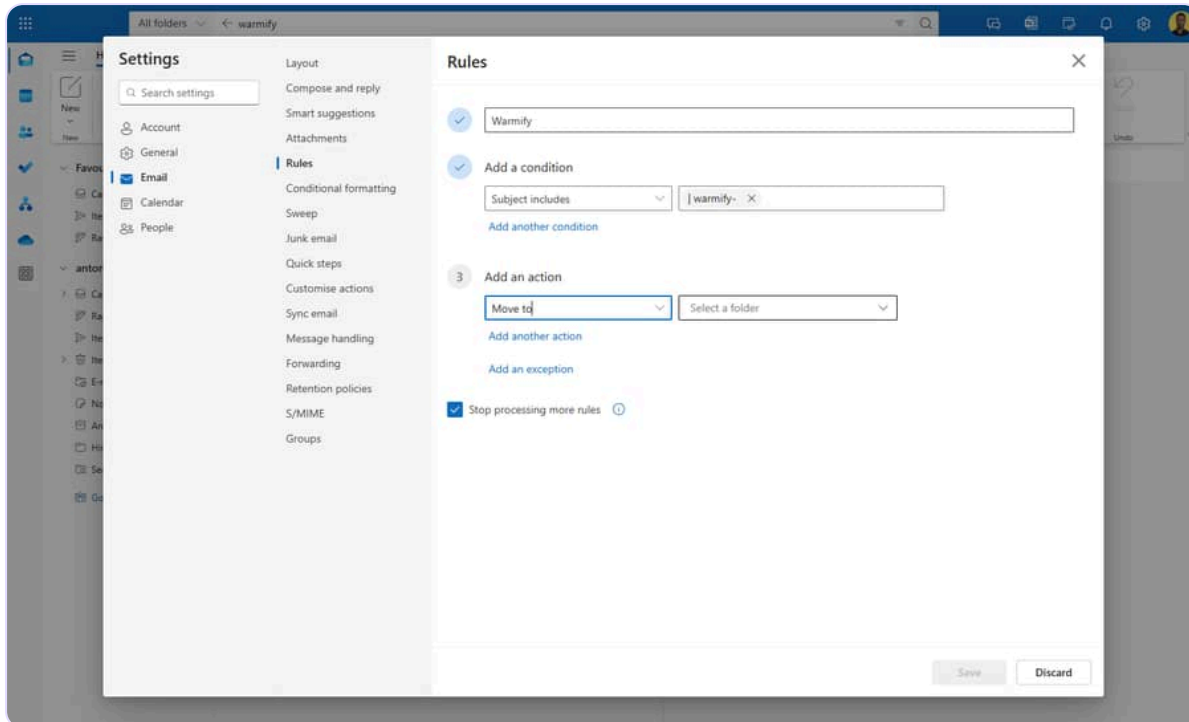

Type "| warmify-"

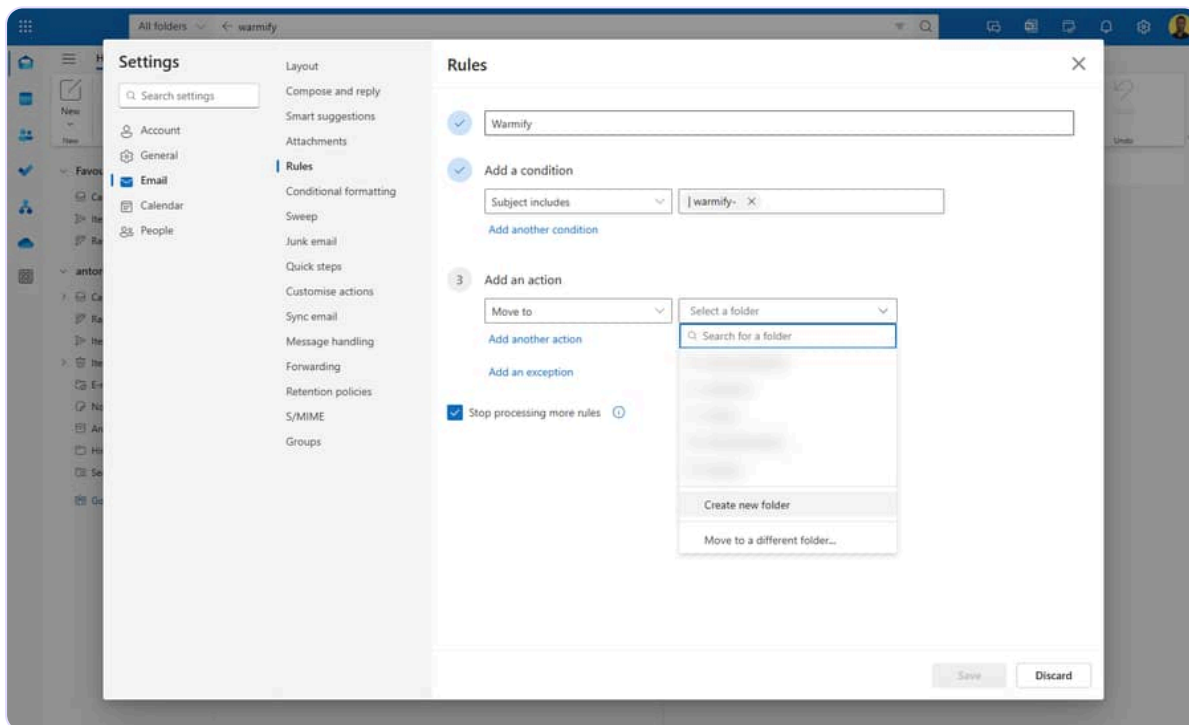

Add action "Move to"

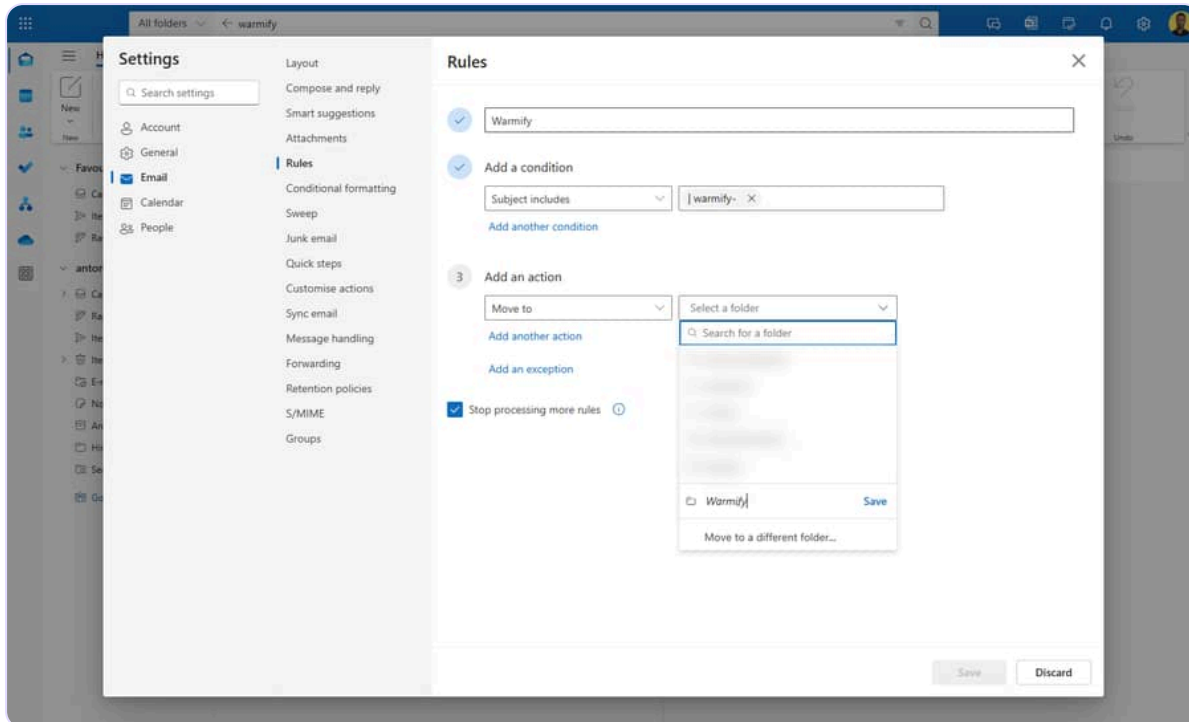

Click on Select a folder

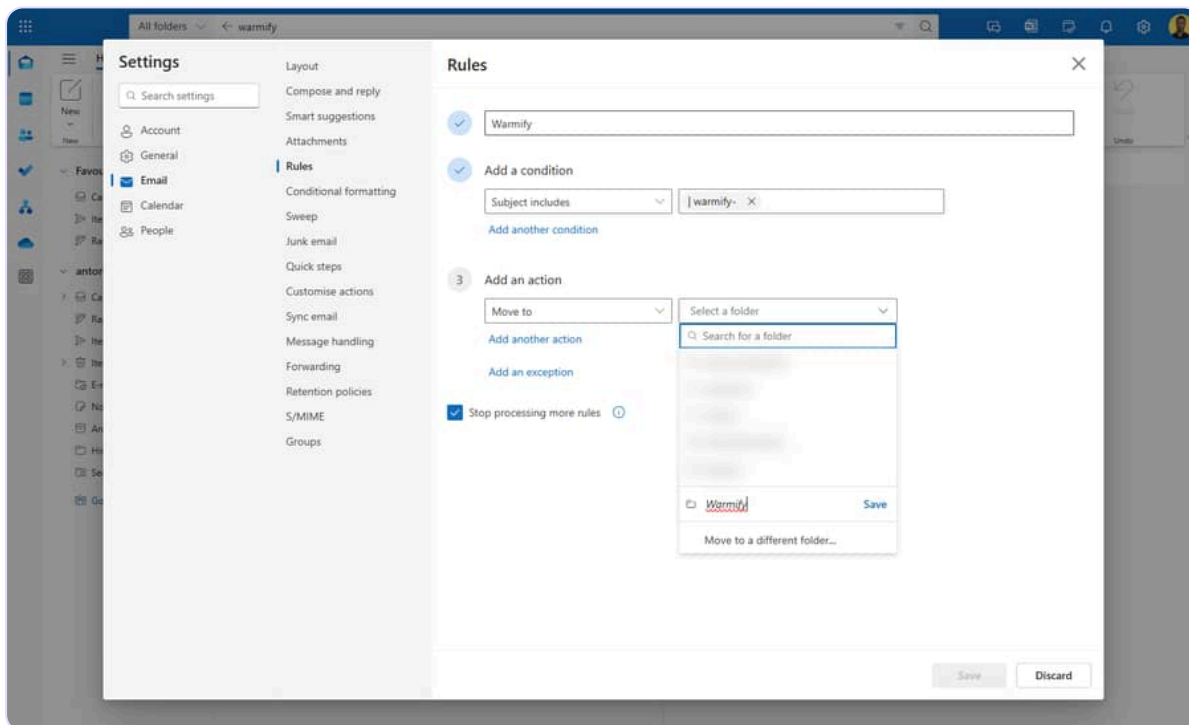

Click on Create new folder

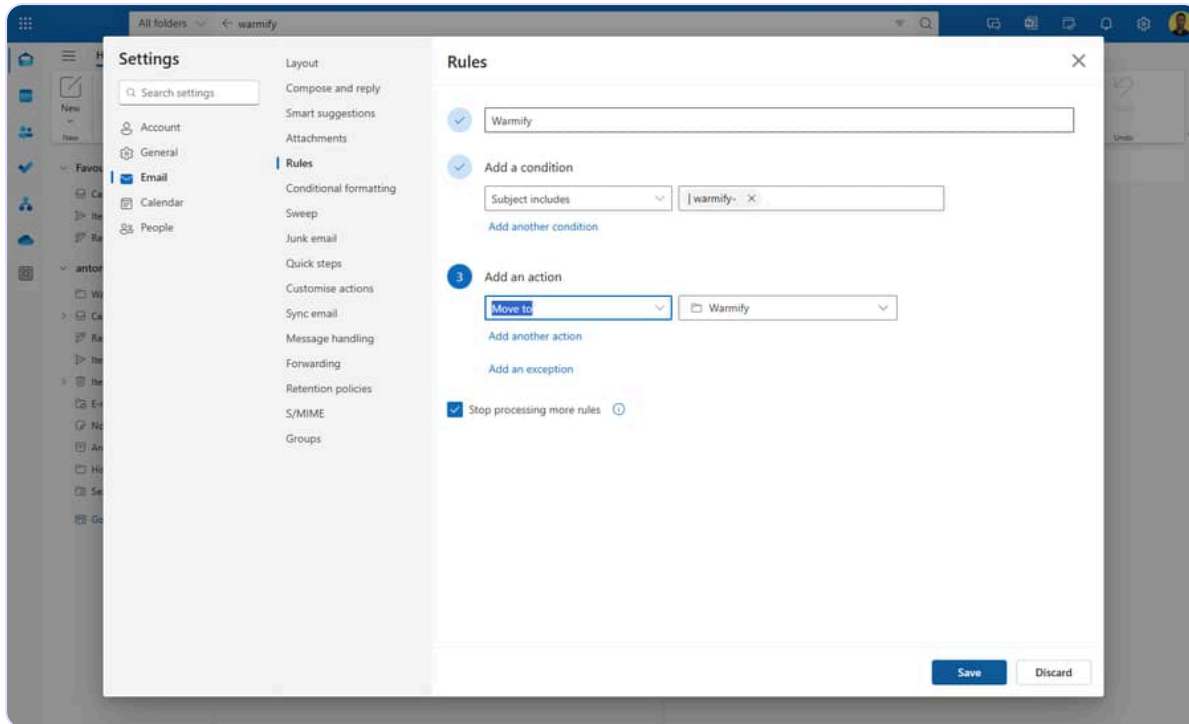

Type "Warmify"

Click on Save

Click on Save
