

How to Create a Microsoft Support Ticket Without a Partner Center Account

docs.wetransact.io/how-to-create-a-microsoft-support-ticket-without-a-partner-center-account

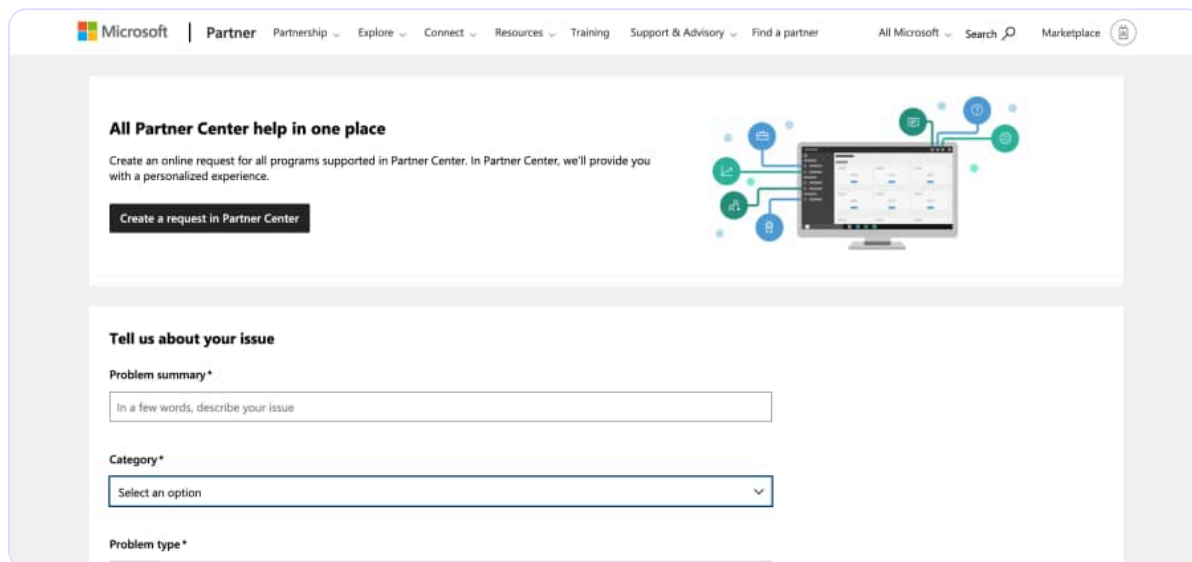

Overview

If you do not have a Partner Center account, you can still raise a support ticket directly with Microsoft using the link below:

 **Microsoft Support:** <https://partner.microsoft.com/en-us/support?stage=1>

Step 1 – Go to Microsoft Support

Visit the link above. You will land on the Microsoft Partner Support page. Scroll down to the **"Tell us about your issue"** section.

The screenshot shows the Microsoft Partner Support page. At the top, there is a navigation bar with the Microsoft logo and various links: Partner, Partnership, Explore, Connect, Resources, Training, Support & Advisory, Find a partner, All Microsoft, Search, and Marketplace. Below the navigation bar, there is a section titled "All Partner Center help in one place" with a subtext: "Create an online request for all programs supported in Partner Center. In Partner Center, we'll provide you with a personalized experience." and a button "Create a request in Partner Center". To the right of this section is a graphic of a computer monitor with various icons around it. Below this, there is a section titled "Tell us about your issue". This section contains three fields: "Problem summary*" with a text input field containing the placeholder "In a few words, describe your issue", "Category*" with a dropdown menu showing "Select an option", and "Problem type*" with a dropdown menu.

Step 2 – Enter your Problem Summary

In the **"Problem summary"** field, type a short description of your issue in a few words (max 255 characters).

Example: *"Stuck in Partner Center configuration page loop"*

Tell us about your issue

Problem summary *

Stuck in Partner center configuration loop
