

How to Create New Pricing Options?

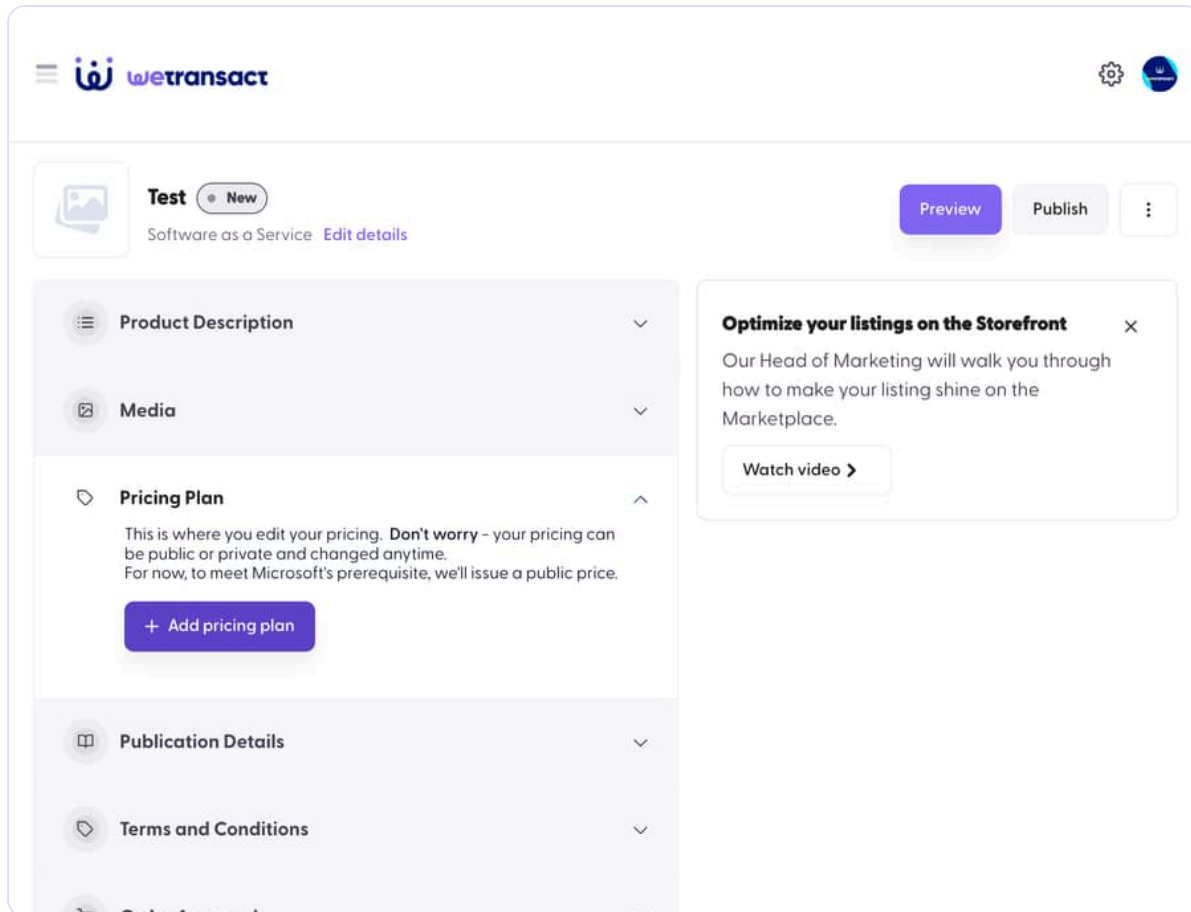

docs.wetransact.io/how-to-create-new-pricing-options

Creating new pricing options in the WeTransact portal allows you to offer flexible purchase choices for your solution. Simply open your product in the portal, navigate to the **Pricing** section and follow these steps:

● Click on Product Listings on the left hand side menu

● Scroll down to the "Pricing Plan" and select Add pricing plan"

The screenshot shows the Wetransact dashboard interface. At the top left is the Wetransact logo. At the top right are a settings gear icon and a user profile icon. Below the header, there's a section for a 'Test' listing, labeled 'New' and 'Software as a Service', with 'Edit details' link. To the right of this are 'Preview' and 'Publish' buttons. A sidebar on the left contains a list of sections: 'Product Description', 'Media', 'Pricing Plan' (which is expanded), 'Publication Details', 'Terms and Conditions', and 'Order Approval'. The 'Pricing Plan' section is active and shows a message: 'This is where you edit your pricing. Don't worry - your pricing can be public or private and changed anytime. For now, to meet Microsoft's prerequisite, we'll issue a public price.' Below this message is a purple button labeled '+ Add pricing plan'. On the right side of the dashboard, there's a notification box titled 'Optimize your listings on the Storefront' with a close button (X). The text inside says 'Our Head of Marketing will walk you through how to make your listing shine on the Marketplace.' and includes a 'Watch video >' button.

● Name the pricing plan and add a description, Go next.

☒ I want to sell this product everywhere Microsoft handles tax for me - Public Plan Default

Your offer will be displayed to this [list of countries](#). This is perfect for publishers who do not want to handle tax admin.

☐ I want to sell everywhere - Public Plan 🌐

You can sell in 144 countries, but Microsoft only handles taxes in [68 of them](#). For the remaining countries, you will be responsible for managing taxes.

☐ I want to sell to a specific geography - Public Plan

Select the countries where you want to sell. Before proceeding, check if Microsoft manages taxes in [those countries](#).

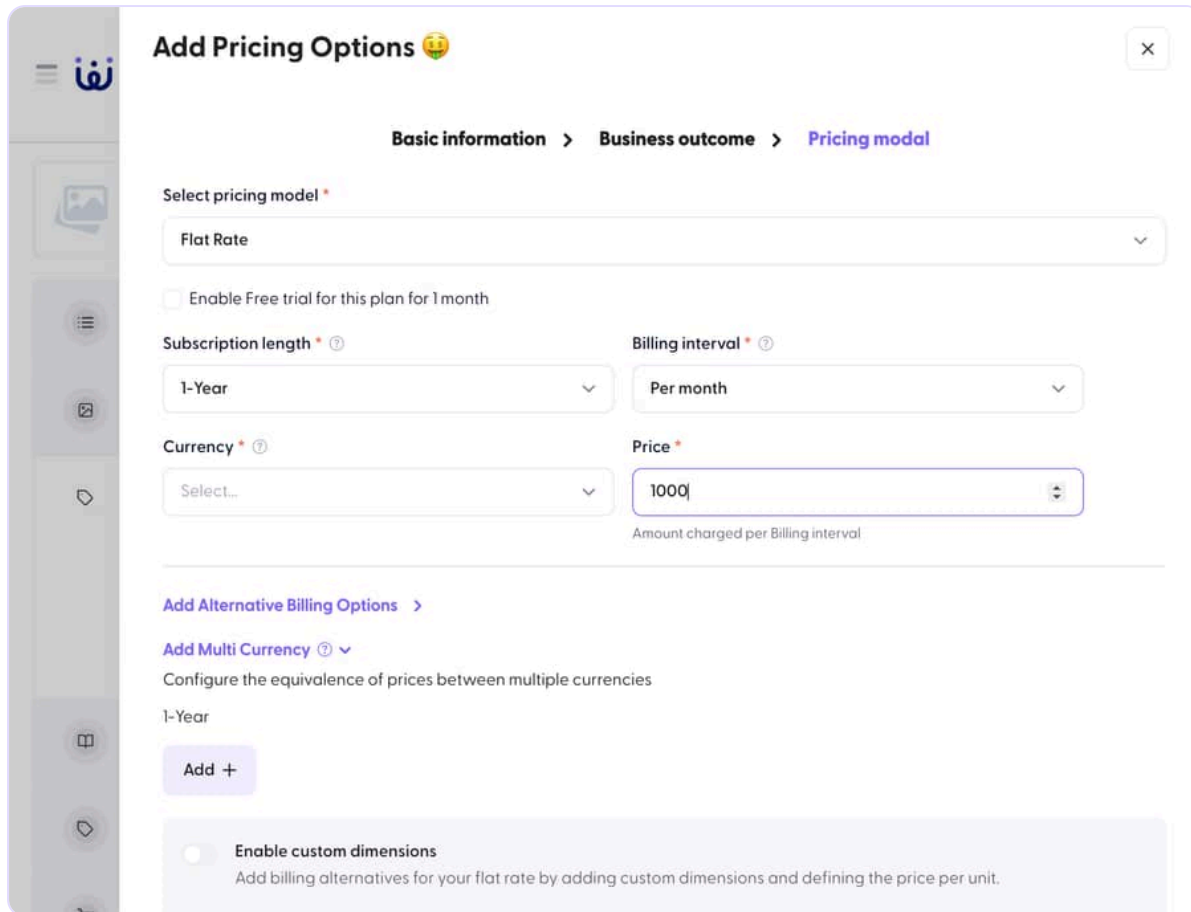

☐ I want to sell to a specific customer using private pricing - Private Plan ⚙️
(This option is greyed out for now. It will be available once your offer is published.)

This is a straightforward route to do a custom and private transaction.

☐ Enable custom dimensions

Add billing alternatives for your flat rate by adding custom dimensions and defining the price per unit.

● Click on "Add pricing"

The screenshot shows the 'Add Pricing Options' modal in the Wetransact dashboard. The modal is titled 'Add Pricing Options' with a close button (X) in the top right corner. It contains the following fields and options:

- Subscription length ***: A dropdown menu with '1-Year' selected.
- Billing interval ***: A dropdown menu with 'Per month' selected.
- Currency ***: A dropdown menu with 'EUR' selected.
- Price ***: A text input field with '1000' entered. Below the field, it says 'Amount charged per Billing interval'.

Below these fields, there are three links: 'Add Alternative Billing Options >', 'Add Multi Currency ⓘ', and 'Configure the equivalence of prices between multiple currencies'. Under 'Configure the equivalence of prices between multiple currencies', there is a section for '1-Year' with an 'Add +' button. Below this, there is a checkbox labeled 'Enable custom dimensions' with the text 'Add billing alternatives for your flat rate by adding custom dimensions and defining the price per unit.' At the bottom of the modal, there is a 'Back' button and an 'Add Pricing Plan' button, which is highlighted with a red box and a red arrow pointing to it.

Make sure to scroll back up to the top of your screen and click 'Publish' after you've completed the steps!
