

How to find the MPN ID?

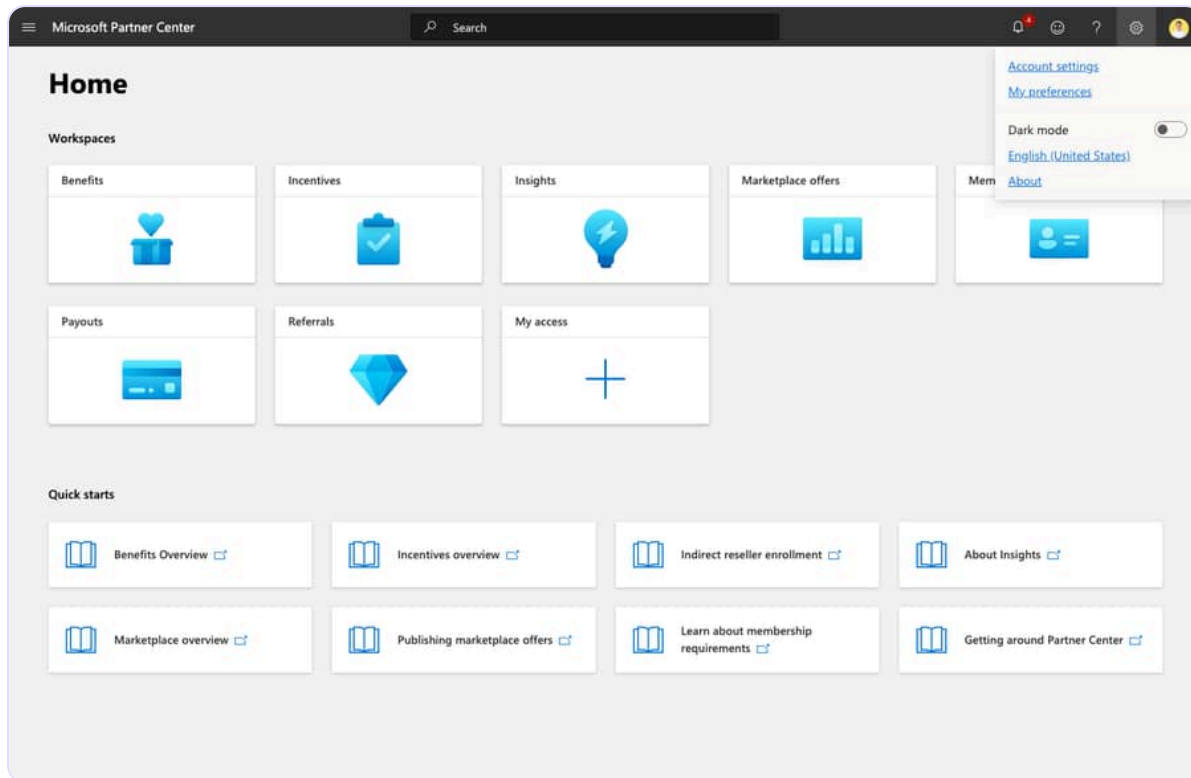

docs.wetransact.io/how-to-find-the-mpn-id

Finding your MPN ID in Partner Center lets you identify your organization's unique Microsoft Partner Network identifier, which is required for program enrollments, support requests, and Marketplace transactions. Please follow the steps below:

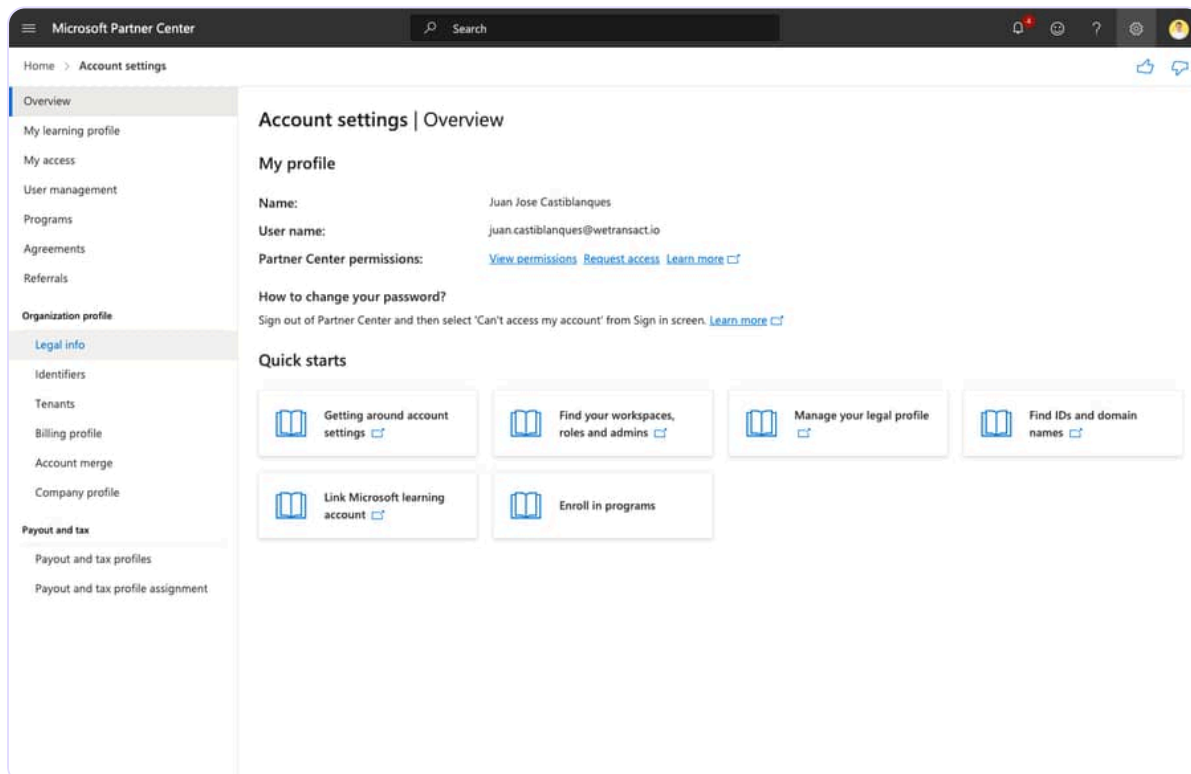

● Click on Settings

Click on Account settings

Click on Legal info

Click on Developer Tab

The screenshot shows the Microsoft Partner Center interface. The top navigation bar includes the Microsoft Partner Center logo, a search bar, and user account icons. The left sidebar lists various account settings categories: Overview, My learning profile, My access, User management, Programs, Agreements, Referrals, Organization profile, Legal info (selected), Identifiers, Tenants, Billing profile, Account merge, Company profile, Payout and tax, Payout and tax profiles, and Payout and tax profile assignment. The main content area is titled 'Account settings | Legal info' and includes a sub-header 'Each tab displays details for aspects of your business.' Below this, there are three tabs: Partner, Reseller, and Developer (selected). The 'Legal business profile' section is active, showing 'Account details' for a 'Company' account type. The 'Vetting status' is 'Authorized'. The 'Publisher IDs' section lists several IDs: Symantec ID (with a 'Learn more' link), Seller ID (82468570), User ID (168444300), Windows publisher ID (WeTransact.io), MPN ID (6660670), and Azure AD tenants (wetransact.io). The 'Commercial Marketplace' section shows the Publisher ID (wetransactio1669903183521) and the Publisher name (with an 'Update' link). A 'Contact info' section is partially visible at the bottom.

Look for MPN ID

This screenshot is identical to the one above, showing the Microsoft Partner Center 'Account settings | Legal info' page with the 'Developer' tab selected. The 'MPN ID' is highlighted in the 'Publisher IDs' section, showing the value '6660670'.
