

How to Verify MCA (Microsoft Customer Agreement) Status - Customer Guide

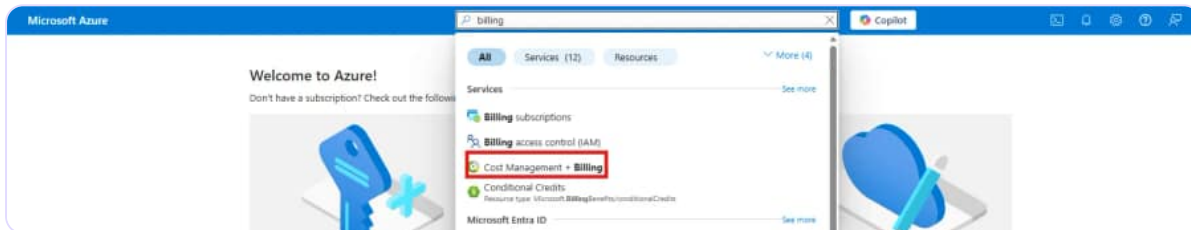

docs.wetransact.io/how-to-verify-mca-microsoft-customer-agreement-status-customer-guide

Step 1 – Go to the Azure Portal

Sign in at portal.azure.com using your work account.

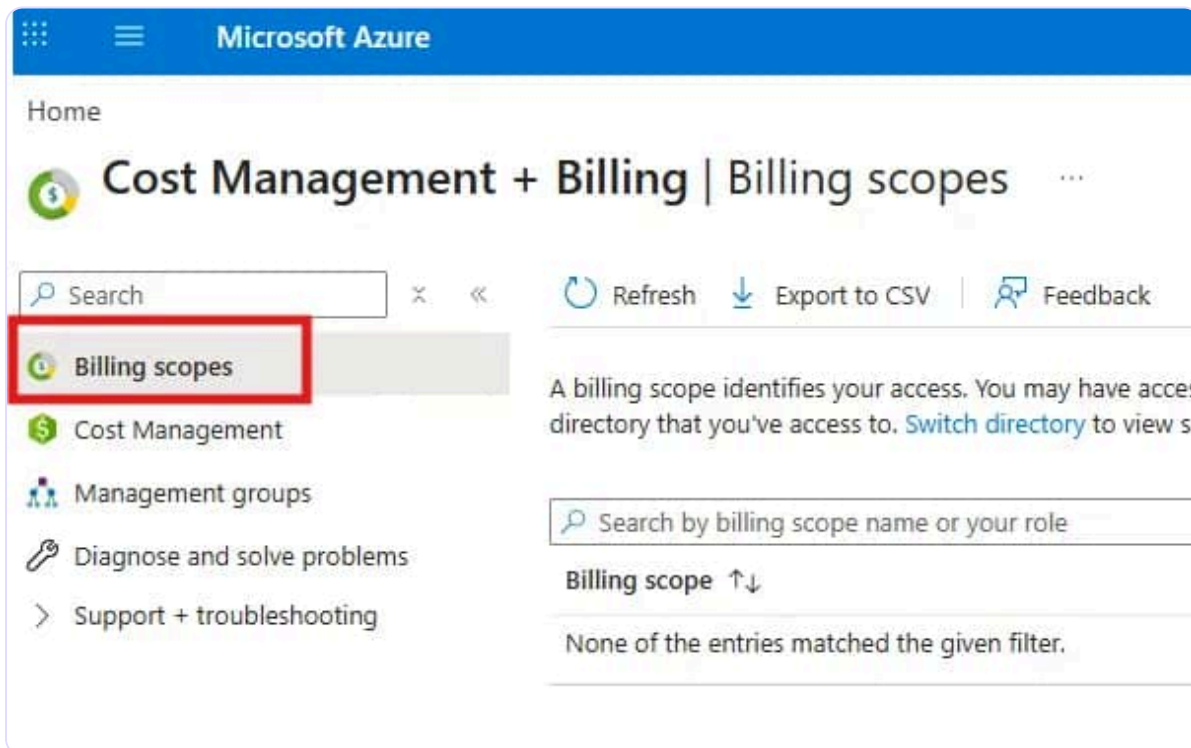

Step 2 – Search for "billing"

In the top search bar, type billing and click **Cost Management + Billing** from the results.

Step 3 – Check the Billing account type column

In the Billing Scopes table, look for the **Billing account type** column. If it shows **Microsoft Customer Agreement**, your customer has an MCA.

Step 4 – Confirm MCA status

If the value reads **Microsoft Customer Agreement**, MCA is confirmed. Your customer will receive their invoice the **next day**, and your payout timeline shortens to ~30–45 days instead of the standard 60–90 days.

A billing scope identifies your access. You may have access to multiple billing scopes. For example, you may have a billing account that you use for y billing account. The table below lists the scopes in **WeTransact** directory that you've access to. [Switch directory](#) to view scopes in other directories. I

☐ As a Global administrator, check this box to view all Microsoft Customer Agreement (MCA) scopes in WeTransact (wetransact.io) directory (by d

Search by billing scope name or your role

Billing scope ↑↓	Billing scope type ↑↓	Billing account ↑↓	Billing account type ↑↓
WeTransact.io	Billing account	WeTransact.io	Microsoft Customer Agreement

Note: If you only have access to one billing scope, go to **Settings** → **Properties** instead – the type will be shown on the properties page.
