

Invite External Users in Azure Portal

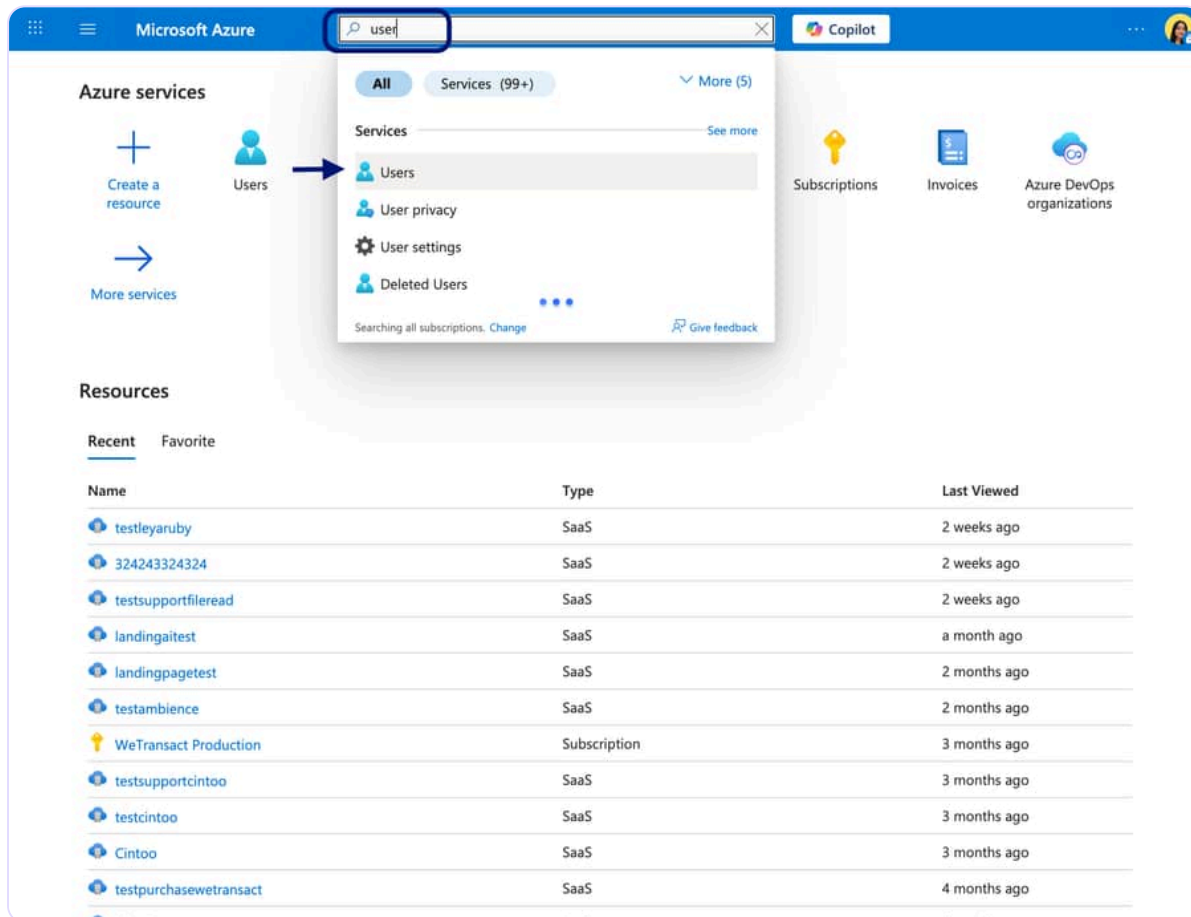

docs.wetransact.io/invite-external-users-in-azure-portal

If you are unable to add WeTransact users (support@wetransact.io and bot@wetransact.io) directly in Partner Center – for example, because your account does not yet have the required admin permissions – you can invite them as external users through the Azure Portal instead.

This is the recommended workaround in those cases. Once the users have been added in Azure, you will then return to Partner Center to assign them the appropriate roles, as outlined in the steps below.

1 Sign in to Azure portal (<https://azure.microsoft.com>)

2 Search Users

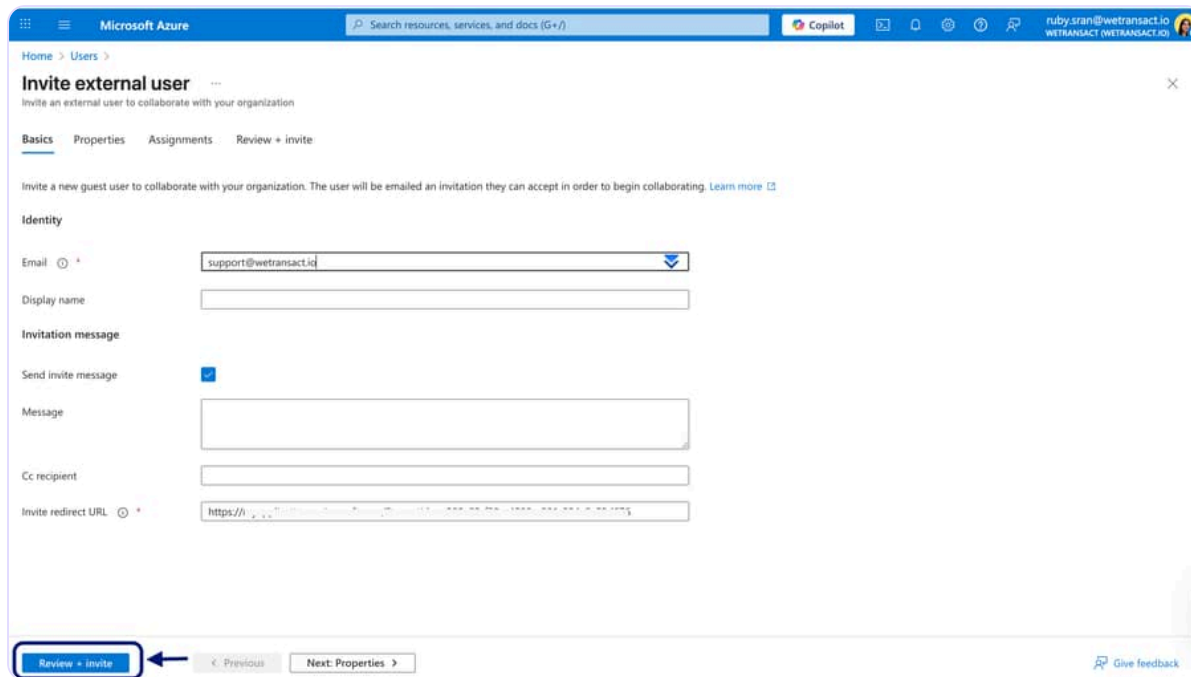

The screenshot shows the Microsoft Azure portal interface. At the top, there's a search bar with the text 'user' entered. A dropdown menu is visible, showing search results for 'user'. The results include 'Users', 'User privacy', 'User settings', and 'Deleted Users'. The 'Users' option is highlighted. Below the search bar, the 'Azure services' section is visible, with a 'Users' icon and a blue arrow pointing to the search results. The 'Resources' section is also visible, showing a list of resources with columns for Name, Type, and Last Viewed. The resources listed include various test environments and a 'WeTransact Production' subscription.

Name	Type	Last Viewed
testleyaruby	SaaS	2 weeks ago
324243324324	SaaS	2 weeks ago
testsupportfilerread	SaaS	2 weeks ago
landingaitest	SaaS	a month ago
landingpagetest	SaaS	2 months ago
testambience	SaaS	2 months ago
WeTransact Production	Subscription	3 months ago
testsupportcintoo	SaaS	3 months ago
testcintoo	SaaS	3 months ago
Cintoo	SaaS	3 months ago
testpurchasewetransact	SaaS	4 months ago

The screenshot shows the Microsoft Azure portal interface. At the top, there's a blue header with the Microsoft Azure logo, a search bar, and a 'Copilot' button. Below the header, the 'Users' page is displayed. A blue arrow points to the 'New user' button in the top navigation bar. The page shows a list of users with columns for selection, display name, user principal name, user type, is agent, and on-premises status. The first user is '3M 30-i...' with a blue profile picture. The second user is '3M 30...' with a black profile picture. The third user is '3M 30...' with a red profile picture. The fourth user is '3M 30...' with a blue profile picture. The fifth user is 'AZ A...' with a purple profile picture. The sixth user is 'A ac...' with a red profile picture. The seventh user is 'AW Ag...' with a red profile picture. The eighth user is 'Alfa G...' with a yellow profile picture. The ninth user is 'Alf...' with a black profile picture. The tenth user is 'A...' with a blue profile picture. The eleventh user is 'AP A...' with a green profile picture. The twelfth user is 'AP A...' with a green profile picture.

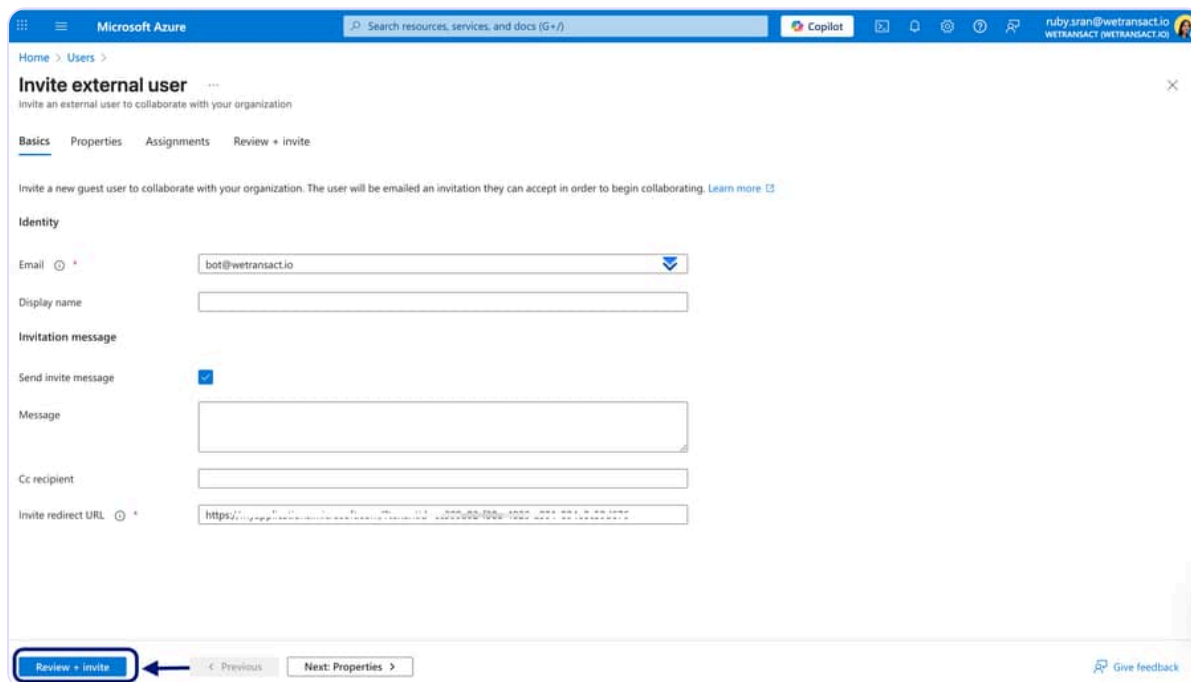

The screenshot shows the 'Users' management page in the Microsoft Azure portal. The 'New user' dropdown menu is open, displaying two options: 'Create new user' (with a subtext 'Create a new internal user in your organization') and 'Invite external user' (with a subtext 'Invite an external user to collaborate with your organization'). A blue arrow points to the 'Invite external user' option. The background shows a table of existing users with columns for 'User principal name', 'User type', 'Is Agent', and 'On-premises'. The table lists several users, including members and guests, with their respective email addresses and user types.

Type 'support@wetransact.io' and click on 'review + invite'

The screenshot shows the 'Invite external user' page in the Microsoft Azure portal. The page has a blue header with the 'Microsoft Azure' logo and a search bar. Below the header, there's a breadcrumb trail 'Home > Users >'. The main title is 'Invite external user' with a subtitle 'Invite an external user to collaborate with your organization'. There are four tabs: 'Basics', 'Properties', 'Assignments', and 'Review + invite'. The 'Basics' tab is selected. The form contains the following fields: 'Email' (with a dropdown arrow) containing 'support@wetransact.io', 'Display name' (empty), 'Invitation message' (empty), 'Send invite message' (checked), 'Message' (empty), 'Cc recipient' (empty), and 'Invite redirect URL' (containing a long URL). At the bottom, there are three buttons: 'Review + invite' (highlighted with a red box and an arrow), '< Previous', and 'Next: Properties >'. A 'Give feedback' link is also present.

Type 'bot@wetransact.io' and click on 'review + invite'

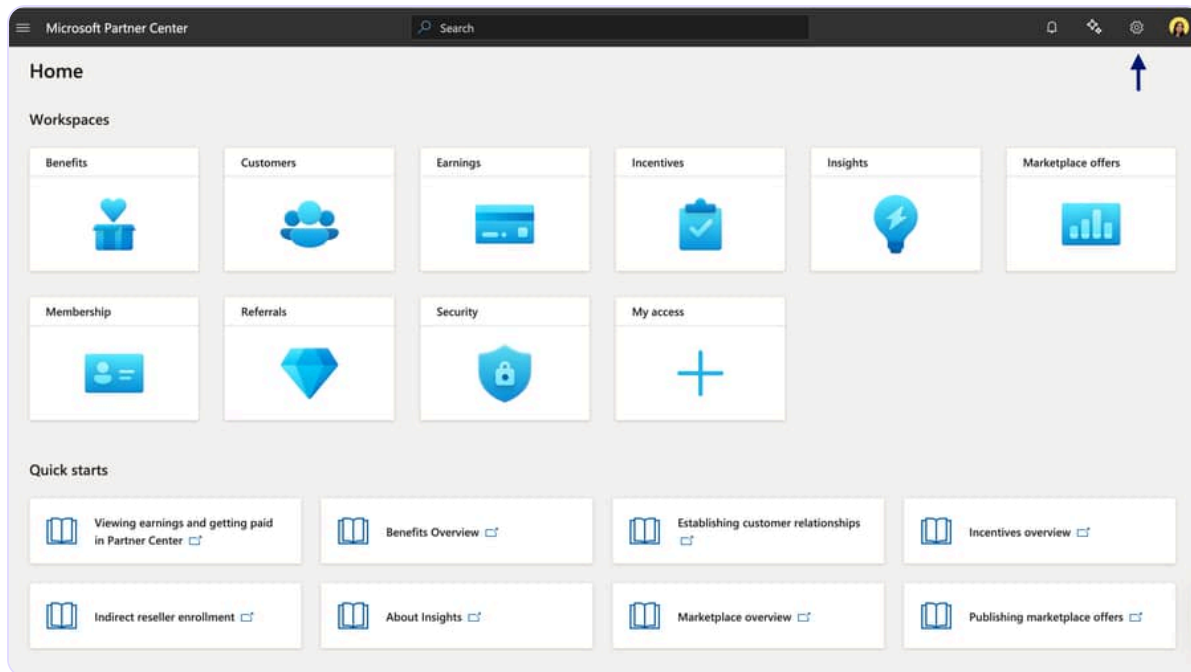

The screenshot shows the 'Invite external user' page in the Microsoft Azure portal, similar to the previous one but with the email 'bot@wetransact.io' entered in the 'Email' field. The 'Review + invite' button is highlighted with a red box and an arrow.

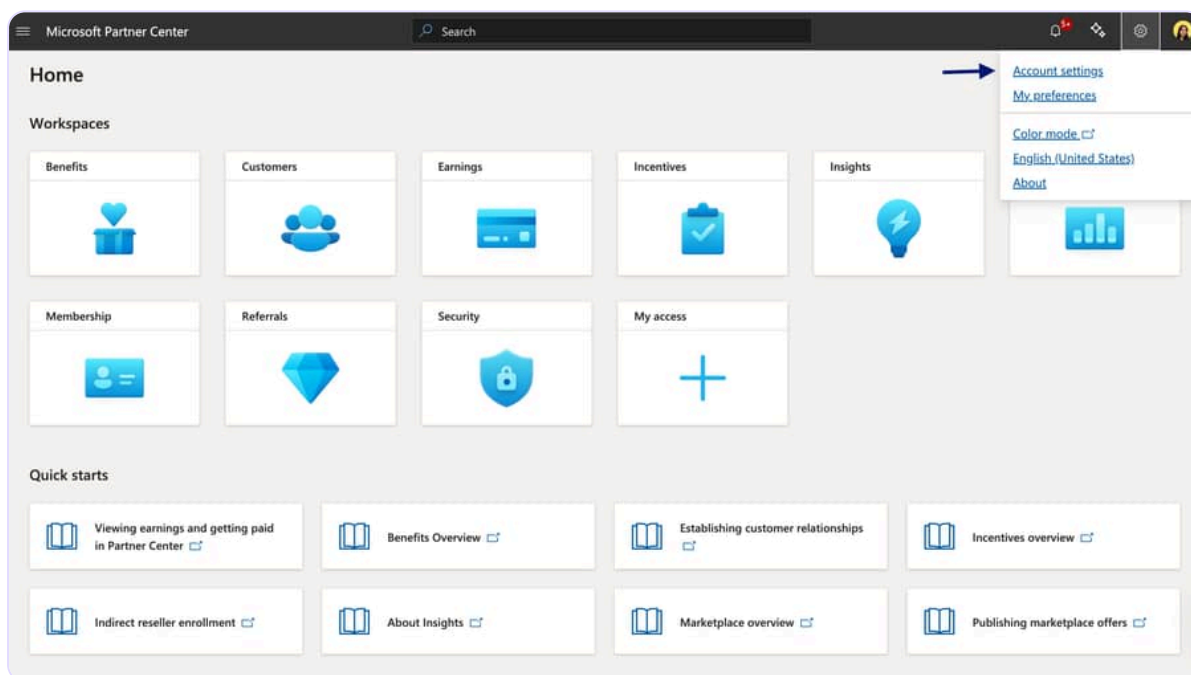

Once you add the users, Sign in to Partner center (<https://partner.microsoft.com/>) to assign roles to these external users

Go to Partner center and sign In, follow the steps below.

● Click on Settings

● Click on Account settings

● Click 'User mangement' and Search 'support@wetransact.io' in the search bar and click on the email 'support@wetransact.io'

● Scroll down on this page and assign the roles, 'developer,business and finance' and click on 'Update'

● Click 'User mangement' and Search 'bot@wetransact.io' in the search bar and Click on the email.

● Scroll down on this page and assign the roles, 'developer,business and finance' and click on 'Update'
