

Partner Center, day-to-day

docs.wetransact.io/partner-center-day-to-day

I have added WeTransact, but support/bot can't log in.

It appears there are policies or restrictions in place that are preventing the required action from being completed. These may exist in one of three areas outlined below. Let us guide you through identifying and resolving the issue. Please check below:

How to Delete and Re-add support and bot?

Sign in to the [Microsoft Partner Center](#) and follow the steps below to re-add WeTransact access.

[Read More>](#)

Invite External Users in Azure Portal

If you are unable to add WeTransact users (support@wetransact.io and bot@wetransact.io) directly in Partner Center – for example, because your account does not yet have the required admin permissions – you can invite them as external users through the Azure Portal instead.

How to update the primary contact email address in legal info?

Updating the primary contact email in Legal Info ensures Microsoft can reach the right person for compliance, tax, and account-related communications, keeping your Partner Center profile accurate and up to date.

[Read More>](#)

Account Verification Email Not Received by Primary Contact

During the legal information verification step in Partner Center, the primary contact may not receive the verification email. If left unresolved, this can become a significant blocker to completing account setup.

How to create a new users in Partner Center?

This guide walks you through creating a new user directly in Partner Center. This is the standard approach when you need to add a team member to your Partner Center account – whether that's a colleague who needs access to manage listings, view reports, or handle account settings. Note that only users with Global Admin or Account Admin permissions can create new users in Partner Center.

[Read More>](#)

The steps to be followed by your global admin to give you the necessary level of rights.

Your Global Admin can assign you the required roles and permissions in Partner Center, ensuring you have the access needed to manage offers, enroll in programs, and perform Marketplace transactions. Follow the steps below:

[Read More>](#)

How to Add a Location and Publisher Account in Partner Center?

Adding a location and publisher account in Partner Center lets you operate in different regions, meet local compliance requirements, and manage offers under the correct legal entity, ensuring accurate listings and payouts.

How to Create a Microsoft Support Ticket Without a Partner Center Account

If you do not have a Partner Center account, you can still raise a support ticket directly with Microsoft using the link below:

[Read More>](#)

How to find an object ID of a user?

You might need an object ID for your support ticket. The Microsoft team asks for the object ID of the user for the owner user role request.

[Read More>](#)

How to find PartnerGlobal ID?

To find the PartnerGlobal ID please follow the steps below:

[Read More>](#)

How to check Microsoft Entra application roles?

Checking Entra app roles ensures the correct permissions are assigned, allowing it to access and sync data between your Partner Center account and the WeTransact portal without issues.
