

How to find the invoice ID for a customer transaction?

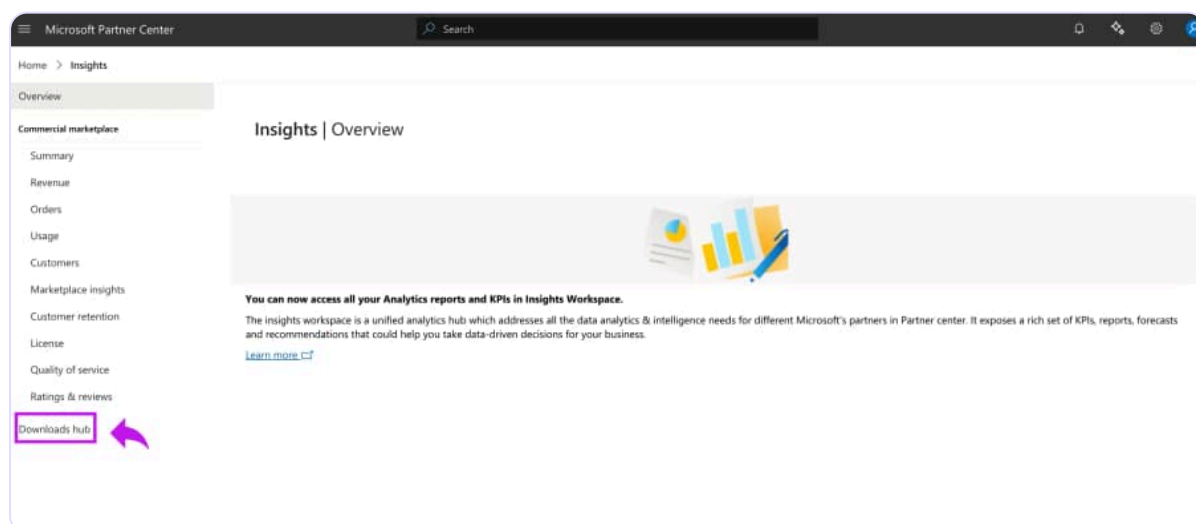

docs.wetransact.io/how-to-find-the-invoice-id-for-a-customer-transaction

As the ISV, you can retrieve the invoice ID for the transaction in Partner Center and share it with your client. With that invoice ID, the client can easily locate and download the corresponding invoice in their own Azure portal.

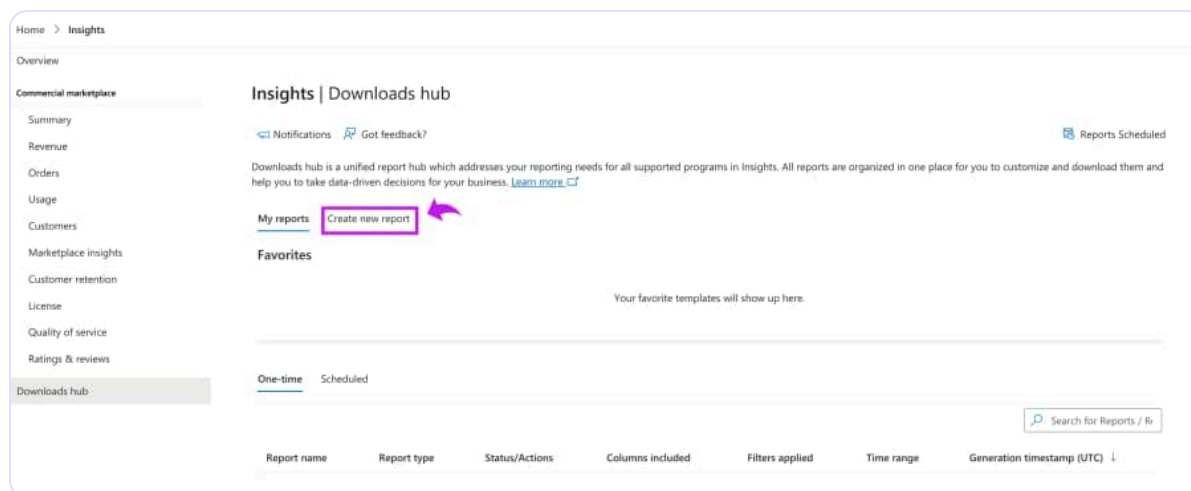

● Sign in to partner center and go to Insights tile

● Select Downloads Hub

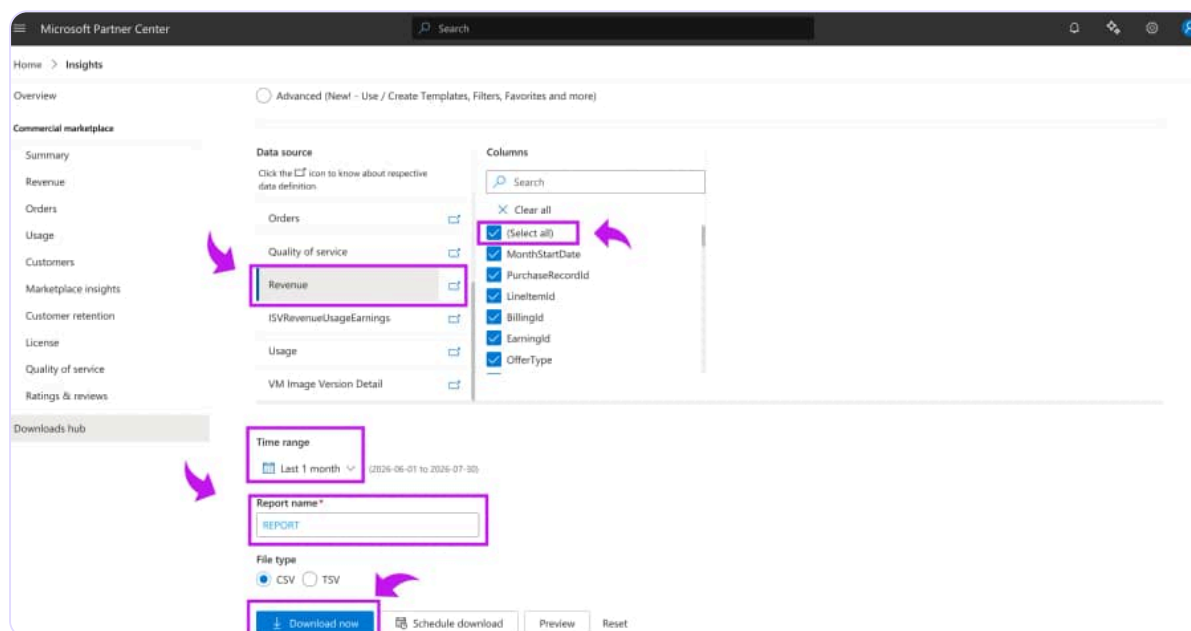

● Click on 'Create new report'

● Select 'Revenue' and in columns 'Select all'

You can select the time range filter and give a name to the report. Click on download

● You will the the report is running it will take 1-2 minutes to get ready to be downloaded.
