

How to find the MPN ID?

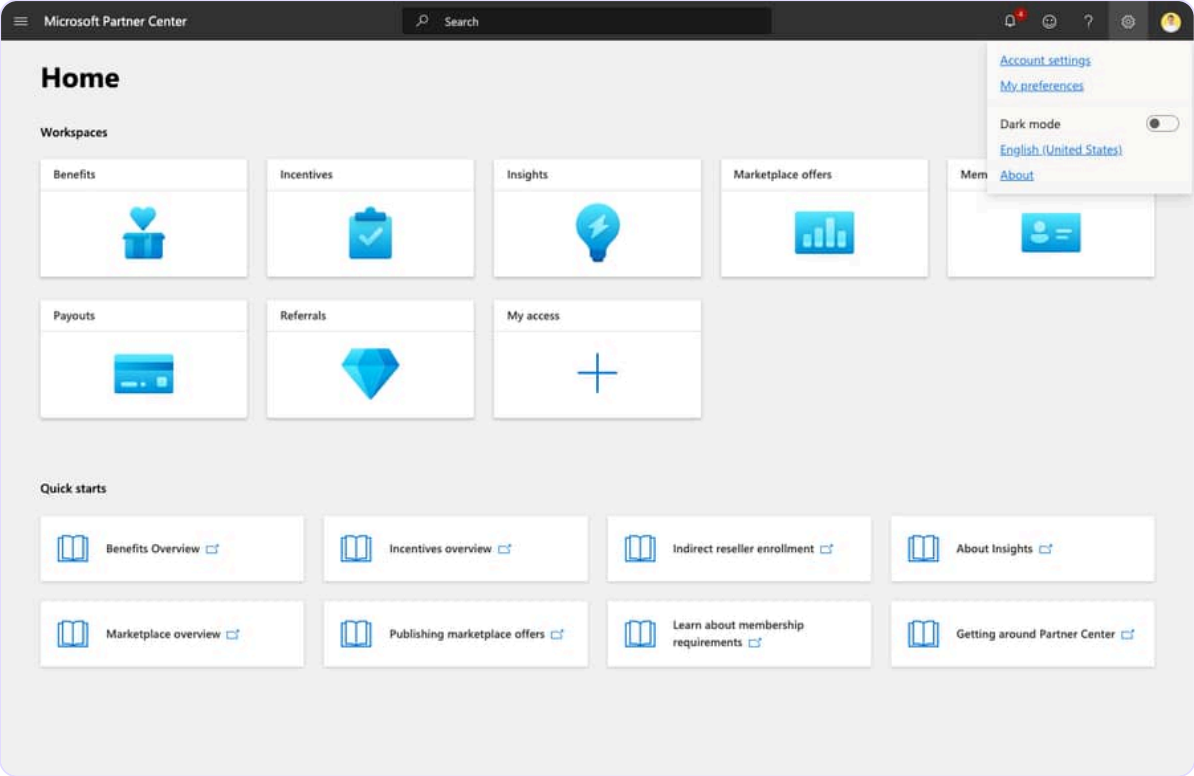

docs.wetransact.io/how-to-find-the-mpn-id

Finding your MPN ID in Partner Center lets you identify your organization's unique Microsoft Partner Network identifier, which is required for program enrollments, support requests, and Marketplace transactions. Please follow the steps below:

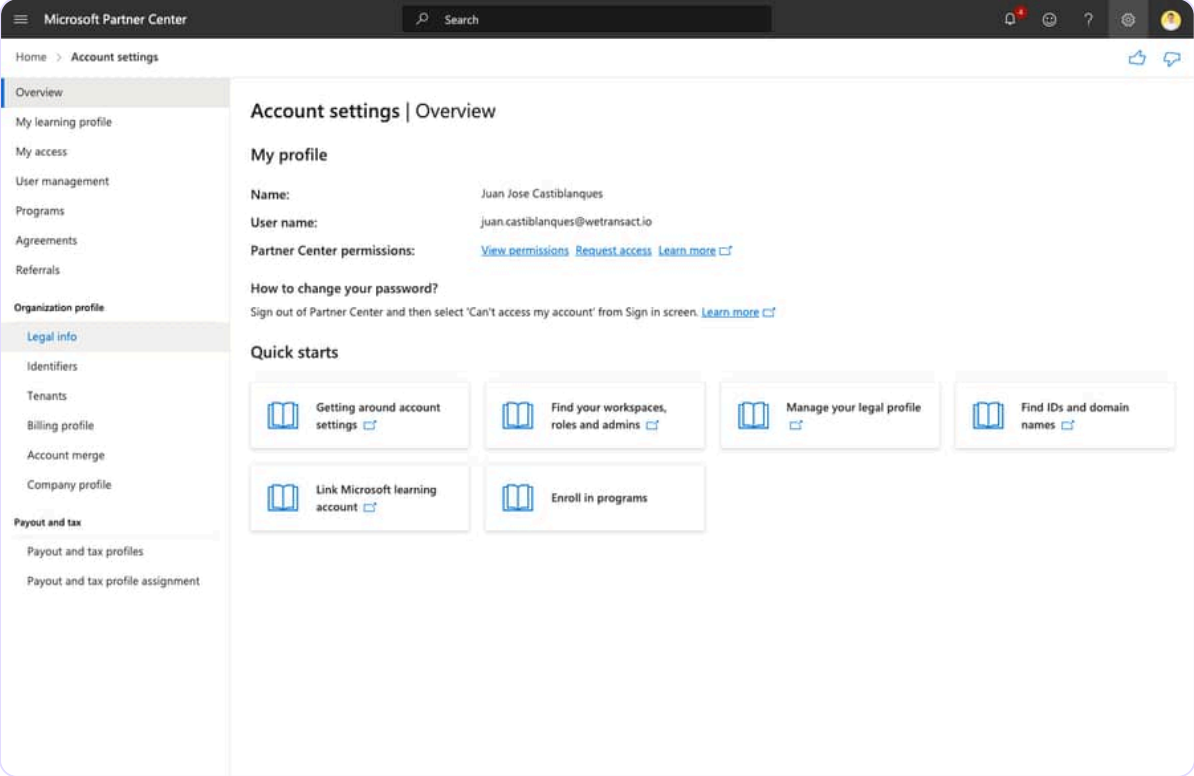

● Click on Settings

● Click on Account settings

● Click on Legal info

Click on Developer Tab

The screenshot shows the Microsoft Partner Center interface. The left sidebar contains a navigation menu with categories: Overview, My learning profile, My access, User management, Programs, Agreements, Referrals, Organization profile, Legal info (highlighted), Identifiers, Tenants, Billing profile, Account merge, Company profile, Payout and tax, Payout and tax profiles, and Payout and tax profile assignment. The main content area is titled 'Account settings | Legal info' and includes a sub-header 'Each tab displays details for aspects of your business.' Below this are three tabs: Partner, Reseller, and Developer (selected). The 'Legal business profile' section is active, showing 'Account details' with the following information: Account type: Company; Vetting status: Authorized; Publisher IDs: Symantec ID (with a 'Learn more' link), Seller ID: 82468570, User ID: 168444300, Windows publisher ID: WeTransact.io, MPN ID: 6660670, Azure AD tenants: wetransact.io, Commercial Marketplace, Publisher ID: wetransactio1669903183521, and Publisher name: - with an 'Update' link. A 'Contact info' section is partially visible at the bottom.

Look for MPN ID

This screenshot is identical to the one above, showing the Microsoft Partner Center 'Account settings | Legal info' page with the Developer tab selected. The 'MPN ID' is clearly visible as 6660670 under the 'Publisher IDs' section.
