

Invite External Users in Azure Portal

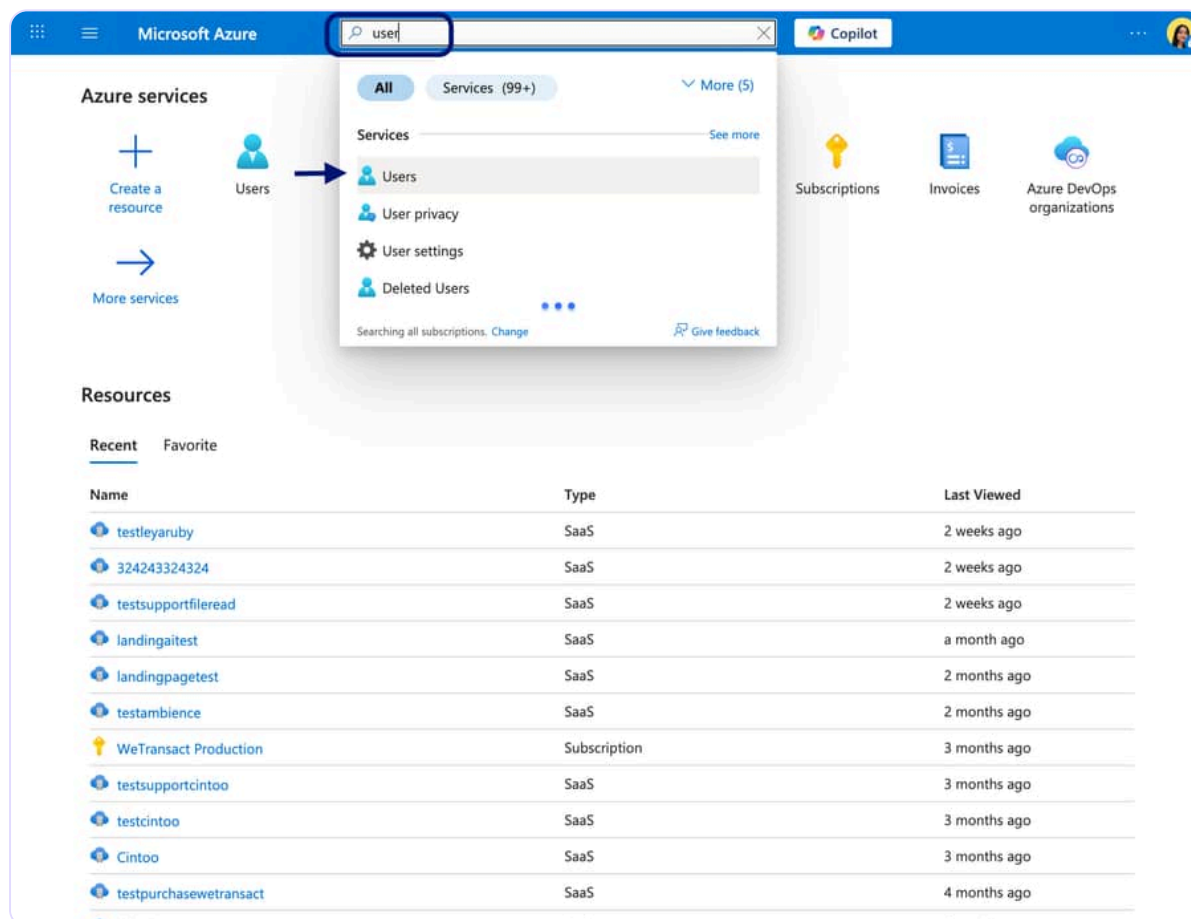

docs.wetransact.io/invite-external-users-in-azure-portal

If you are unable to add WeTransact users (support@wetransact.io and bot@wetransact.io) directly in Partner Center – for example, because your account does not yet have the required admin permissions – you can invite them as external users through the Azure Portal instead.

This is the recommended workaround in those cases. Once the users have been added in Azure, you will then return to Partner Center to assign them the appropriate roles, as outlined in the steps below.

● Sign in to Azure portal (<https://azure.microsoft.com>)

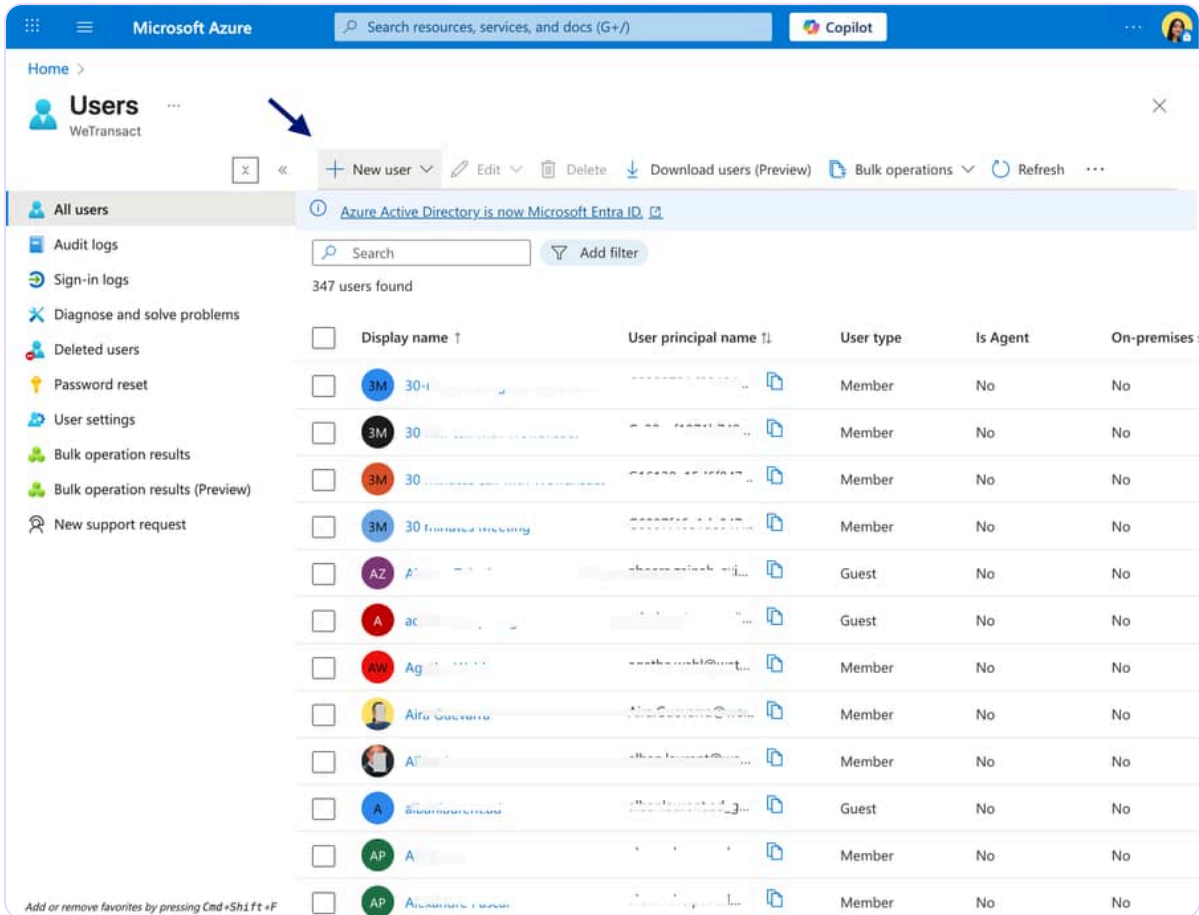

● Search Users

The screenshot shows the Microsoft Azure portal interface. At the top, the search bar contains the text 'user'. Below the search bar, a dropdown menu is open, showing a list of services. The 'Users' service is highlighted. Below the dropdown, a table of resources is displayed. The table has columns for Name, Type, and Last Viewed. The resources listed include various test accounts and the 'WeTransact Production' subscription.

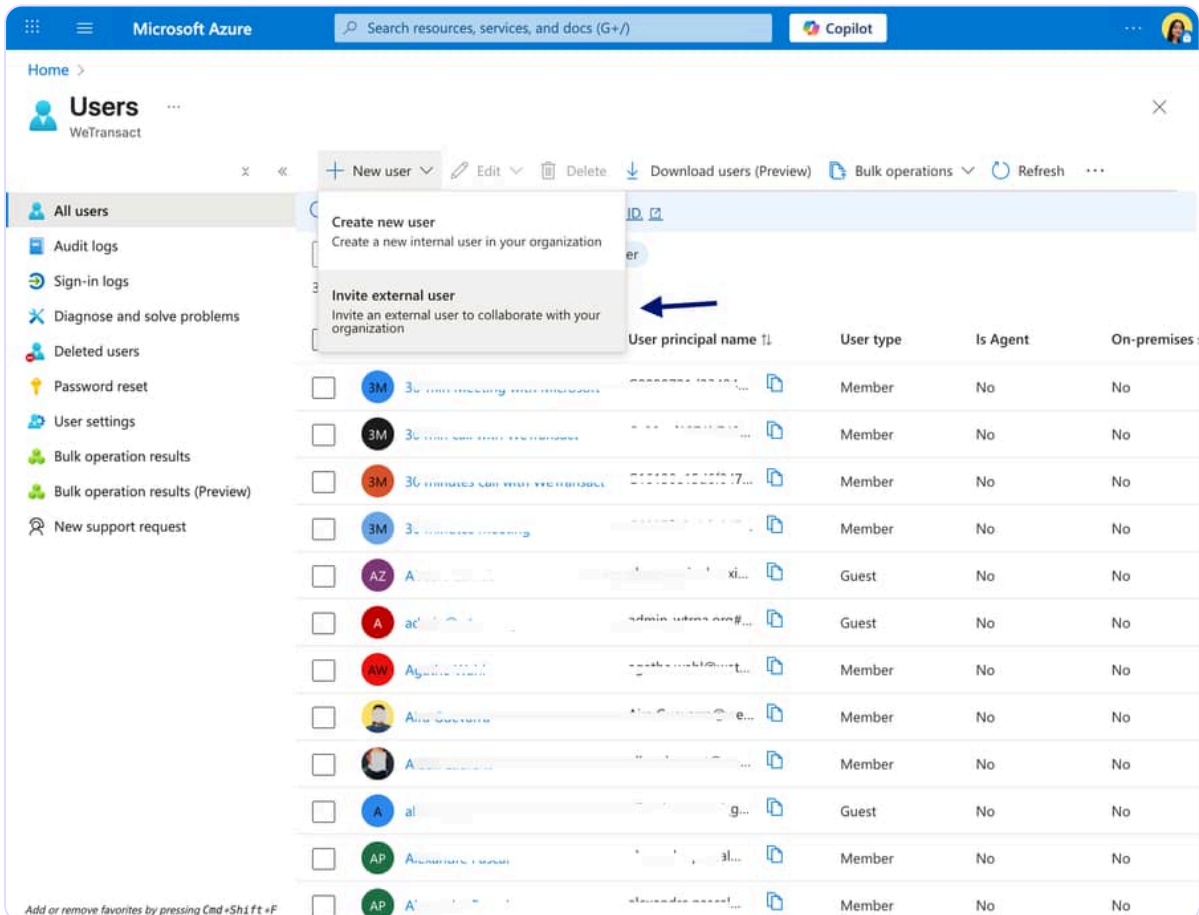

Name	Type	Last Viewed
testleyaruby	SaaS	2 weeks ago
324243324324	SaaS	2 weeks ago
testsupportfileread	SaaS	2 weeks ago
landingaitest	SaaS	a month ago
landingpagetest	SaaS	2 months ago
testambience	SaaS	2 months ago
WeTransact Production	Subscription	3 months ago
testsupportcintoo	SaaS	3 months ago
testcintoo	SaaS	3 months ago
Cintoo	SaaS	3 months ago
testpurchasewetransact	SaaS	4 months ago

Click on New user

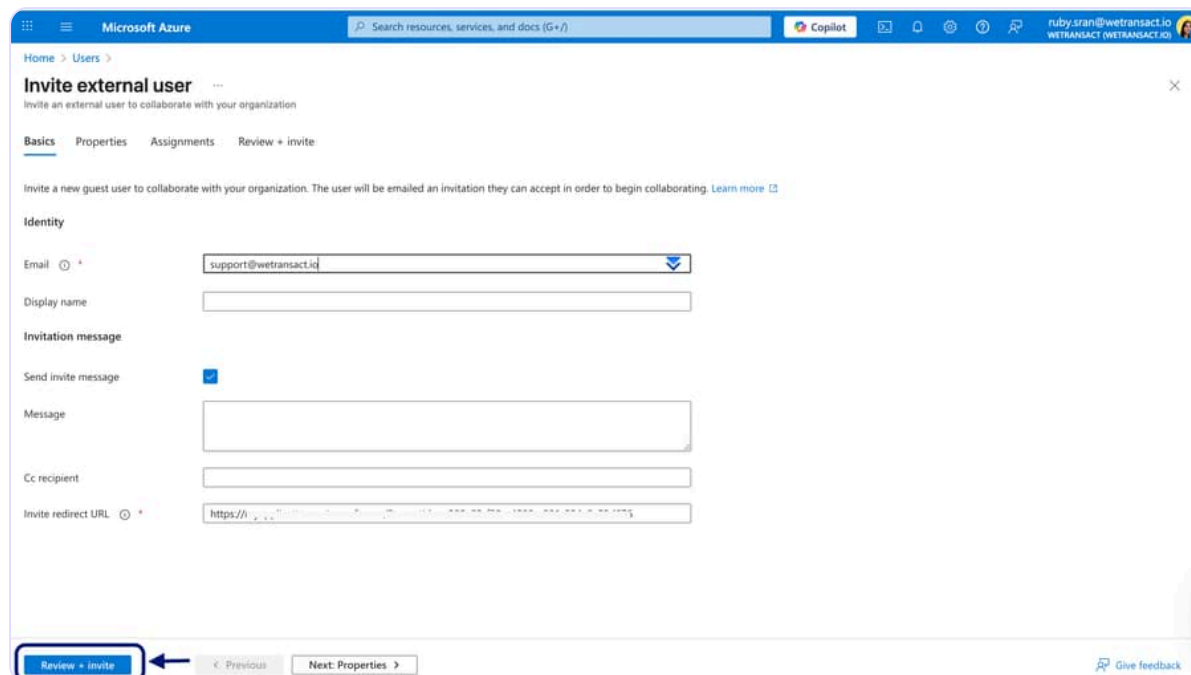

The screenshot shows the Microsoft Azure portal interface. At the top, there's a navigation bar with the Microsoft Azure logo, a search bar, and a Copilot button. Below the navigation bar, the 'Users' page is displayed for the 'WeTransact' subscription. The page title is 'Users' with a dropdown menu. A blue arrow points to the '+ New user' button in the top toolbar. The toolbar also includes 'Edit', 'Delete', 'Download users (Preview)', 'Bulk operations', and 'Refresh' buttons. On the left sidebar, there's a list of user management tasks: 'All users', 'Audit logs', 'Sign-in logs', 'Diagnose and solve problems', 'Deleted users', 'Password reset', 'User settings', 'Bulk operation results', 'Bulk operation results (Preview)', and 'New support request'. The main content area shows a list of users with columns: 'Display name', 'User principal name', 'User type', 'Is Agent', and 'On-premises'. A message at the top of the list states 'Azure Active Directory is now Microsoft Entra ID'. The list shows 347 users found. The first few users are listed with their display names, user principal names, and user types (Member or Guest).

Click on Invite external user...

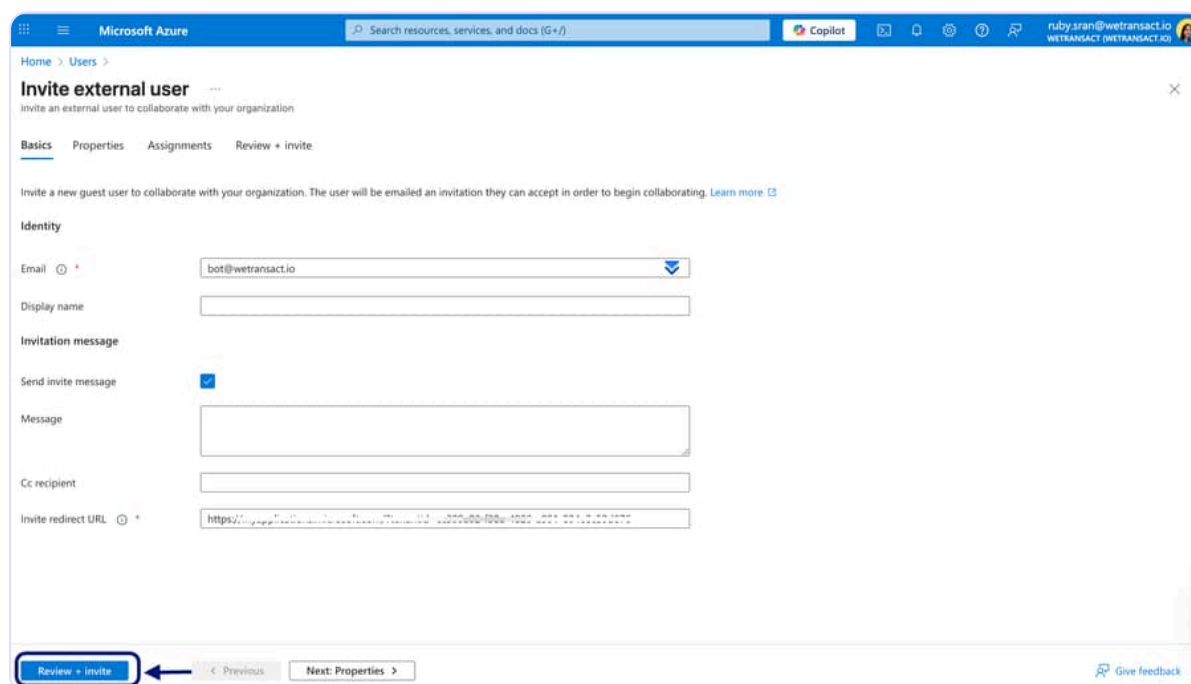

The screenshot shows the Microsoft Azure portal interface, similar to the previous one. The 'New user' button in the top toolbar is clicked, and a dropdown menu is visible. The dropdown menu has two options: 'Create new user' (with a subtext 'Create a new internal user in your organization') and 'Invite external user' (with a subtext 'Invite an external user to collaborate with your organization'). A blue arrow points to the 'Invite external user' option. The rest of the page, including the left sidebar and the user list, remains the same as in the previous screenshot.

● Type 'support@wetransact.io' and click on 'review + invite'

The screenshot shows the 'Invite external user' page in the Microsoft Azure portal. The 'Email' field is filled with 'support@wetransact.io'. The 'Display name' field is empty. The 'Invitation message' section has 'Send invite message' checked. The 'Message' field is empty. The 'Cc recipient' field is empty. The 'Invite redirect URL' field is filled with 'https://...'. At the bottom, the 'Review + invite' button is highlighted with a red box and an arrow pointing to it. The 'Previous' button is disabled, and the 'Next: Properties' button is visible.

● Type 'bot@wetransact.io' and click on 'review + invite'

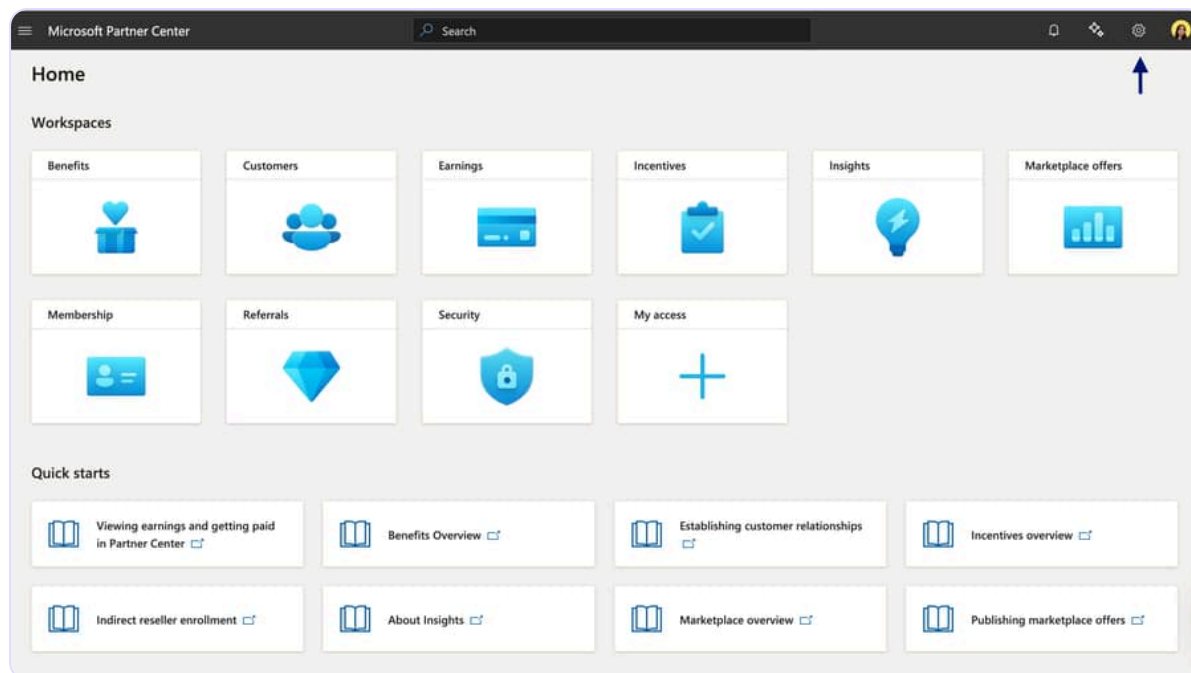

The screenshot shows the 'Invite external user' page in the Microsoft Azure portal. The 'Email' field is filled with 'bot@wetransact.io'. The 'Display name' field is empty. The 'Invitation message' section has 'Send invite message' checked. The 'Message' field is empty. The 'Cc recipient' field is empty. The 'Invite redirect URL' field is filled with 'https://...'. At the bottom, the 'Review + invite' button is highlighted with a red box and an arrow pointing to it. The 'Previous' button is disabled, and the 'Next: Properties' button is visible.

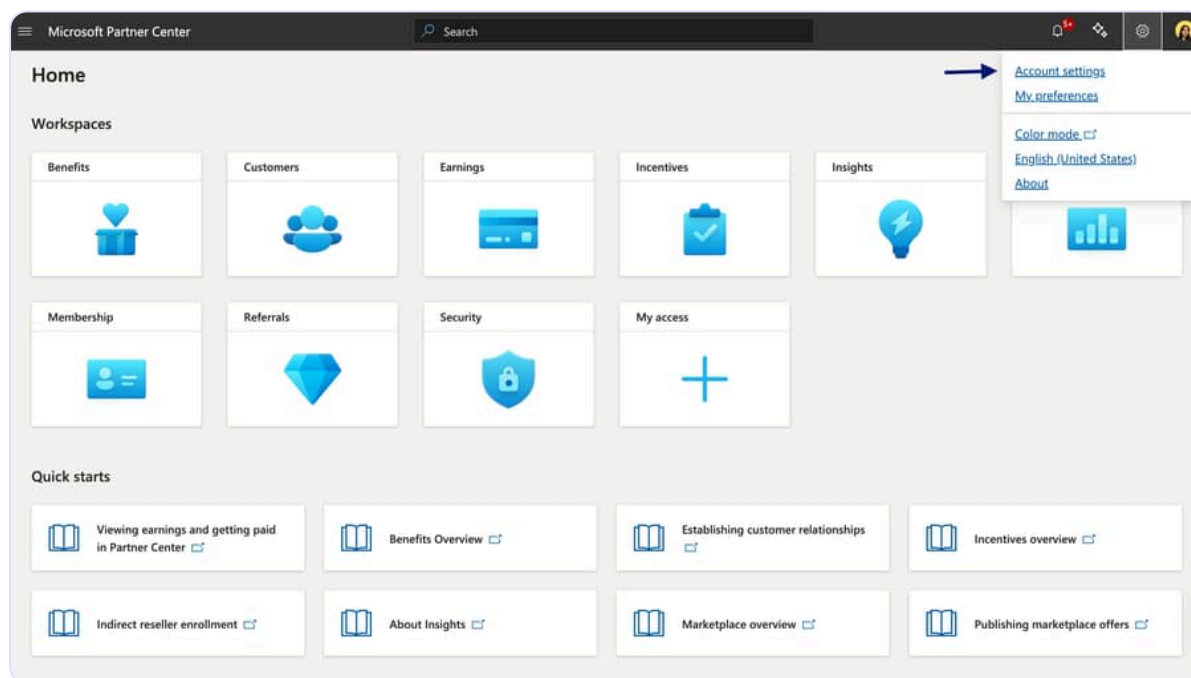

Once you add the users, Sign in to Partner center (<https://partner.microsoft.com/>) to assign roles to these external users

Go to Partner center and sign In, follow the steps below.

● Click on Settings

● Click on Account settings

● Click 'User mangement' and Search 'support@wetransact.io' in the search bar and click on the email 'support@wetransact.io'

● Scroll down on this page and assign the roles, 'developer,business and finance' and click on 'Update'

● Click 'User mangement' and Search 'bot@wetransact.io' in the search bar and Click on the email.

● Scroll down on this page and assign the roles, 'developer,business and finance' and click on 'Update'
