

Retrieving the ID – Managed Application

docs.wetransact.io/retrieving-the-id-managed-application

Retrieving the Managed Application ID allows you to identify and reference the specific deployment of your solution in Azure for management, support, or integration purposes. Please check below:

See all

Click on the Managed app we created yesterday (below is just for illustration)

The screenshot shows the Microsoft Azure portal interface. At the top, there's a search bar and navigation icons. Below the header, the page title is "Managed applications" with a sub-header "WeTransact (wetransact.io)". There are buttons for "Create", "Manage view", "Refresh", "Export to CSV", "Open query", and "Assign tags". A filter bar shows "Subscription equals all", "Resource group equals all", and "Location equals all". Below the filter bar, it says "Showing 1 to 2 of 2 records." and has dropdowns for "No grouping" and "List view". The table below has columns: Name, Kind, Subscription, Resource group, and Location. It lists two applications: "joausssen" and "Proventeq", both of kind "MarketPlace", under the "Microsoft Azure Sponsorship" subscription, in the "marketplacepurchase" resource group, located in "North Europe". At the bottom, there are pagination controls showing "Page 1 of 1" and a "Give feedback" link.

Name	Kind	Subscription	Resource group	Location
joausssen	MarketPlace	Microsoft Azure Sponsorship	marketplacepurchase	North Europe
Proventeq	MarketPlace	Microsoft Azure Sponsorship	marketplacepurchase	North Europe

Click on JSON View

The screenshot shows the Microsoft Azure portal interface for a specific Managed application named "joausssen". The left sidebar contains a navigation menu with options like Overview, Activity log, Access control (IAM), Tags, Settings, Parameters and Outputs, Authorizations, Identity, Properties, Locks, Monitoring, Alerts, Automation, Tasks (preview), Export template, and Help. The main content area is titled "joausssen Managed application" and has a "JSON View" link. Below the title, there's a "Delete" button and a "Search" bar. The "Essentials" section displays key properties: Resource group (marketplacepurchase), Location (North Europe), Subscription (Microsoft Azure Sponsorship), and Subscription ID (343ebc84-7a85-45fc-8fce-82ca0b358784). To the right, there's a "Managed resource group" section with details: mrg-proventeq-multi-vm-20231122141149, Support name (Proventeq Support), Support email (pma.support@proventeq.com), Support phone (+44 118 907 9296), and Support link (http://www.proventeq.com). Below this, there's a "Welcome to your Managed Application" message with a brief description of Managed Applications and a "Learn more" link.

joausssen Managed application

Essentials

- Resource group: [marketplacepurchase](#)
- Location: North Europe
- Subscription: [Microsoft Azure Sponsorship](#)
- Subscription ID: 343ebc84-7a85-45fc-8fce-82ca0b358784

Managed resource group

- Managed resource group: [mrg-proventeq-multi-vm-20231122141149](#)
- Support name: Proventeq Support
- Support email: pma.support@proventeq.com
- Support phone: +44 118 907 9296
- Support link: <http://www.proventeq.com>

Welcome to your Managed Application

Managed Applications provide out-of-the-box applications and services that live in your subscription and can be maintained by you or a Managed Application Publisher.

Your Managed Application Publisher has access to maintain the resources, so you do not need to maintain application-specific domain knowledge of running the service. [Learn more](#)

● Copy the Resource ID + JSON Content and send them over by email.

The screenshot displays the Microsoft Azure portal interface. On the left, the 'Managed applications' section is visible, showing a list of applications including 'joausсен' and 'Proventeq'. The main pane shows the 'joausсен' application details, including a search bar and a sidebar with navigation options like Overview, Activity log, Access control (IAM), Tags, Settings, Parameters and Outputs, Authorizations, Identity, Properties, Locks, Monitoring, Alerts, Automation, Tasks (preview), Export template, and Help. The right pane, titled 'Resource JSON', displays the Resource ID and the corresponding JSON content for the application. The Resource ID is: `/subscriptions/343ebc84-7a85-45fc-8fce-82ca0b358784/resourceGroups/marketplacepurchase/providers/Microsoft.Solutions/applications/joausсен`. The JSON content is a complex object representing the application's configuration, including details like 'name', 'type', 'kind', 'location', 'plan', 'etag', 'properties', 'parameters', 'skuName', 'skuCapacity', and 'storageAccountName'.
