

SalesForce Installation Guide

docs.wetransact.io/salesforce-installation-guide

This guide is intended for Salesforce Admins or technical users responsible for setting up the WeTransact Salesforce integration. If you're a Sales or Marketing user looking to create Co-Sell deals or Private Offers, please refer to the [Creating Co-Sell Deals & Private Offers in Salesforce](#)

Overview

This package connects Salesforce with WeTransact, enabling automated syncing of Co-Sell and Private Offer records. You'll be able to create offers, retrieve statuses, and keep your data aligned with minimal manual work.

Requirements

Before you begin, make sure you have:

- Salesforce Administrator access
- Access to install AppExchange applications
- Your WeTransact API credentials (provided by WeTransact)

Note

The installation should be completed by a Salesforce Administrator.

Install the Package

Click the [WeTransact Salesforce Installation link](#), install for admin, and wait until complete.

Video : Salesforce WeTransact Installation Demo

The video below provides a full walkthrough of the installation and configuration process.

A step-by-step written guide is also available below.

Step-by-Step

Salesforce Installation Guide

Install the WeTransact Salesforce App and configure it for Co-Sell and Private Offer management.

Step 1: Install the WeTransact App

Open the Salesforce AppExchange listing: [WeTransact Salesforce Installation link](#)

Click Get It Now.

The screenshot shows the AppExchange listing for 'WeTransact for Salesforce'. The page header includes the AgentExchange logo and navigation tabs for Home, Agents, Apps, Collections, Consultants, and Learn. A search bar is located on the right. The main content area features the WeTransact logo and a description: 'Seamlessly Integrate Microsoft Co-Selling and Marketplace Deals'. Below this, a 'Paid Add-On Required' section states 'Payment required for external services or products' and includes a 'Pricing Details' link. A yellow box highlights the 'Get It Now' button, with a 'Try It' button below it. To the right, there are two preview cards: 'Opportunity Page' and 'Co-Sell Wizard Start'. The 'Co-Sell Wizard Start' card includes a 'Co-Sell Wizard' section with a description and a form for entering a search term.

Step 2: Log in to Salesforce

Click Login and authenticate with your Salesforce Administrator account.

The screenshot shows the Trailblazer.me login screen. The header reads 'LET'S GET STARTED'. Below this, there are two options: 'Log in with Trailblazer.me' and 'Don't have an account?'. The 'Log in with Trailblazer.me' option has a red box around the 'Log In' button. The 'Don't have an account?' option has a 'Continue as Guest' button. Below the login options, there is a cartoon character of a cat wearing glasses and a 'Trailblazer' shirt. At the bottom, a disclaimer states: 'By submitting this request, you agree to share your information with Salesforce and the provider of this listing, WeTransact. Listing: WeTransact for Salesforce'.

Step 3: Install the Package

Choose: Install in Production

×

Where do you want to install this package?

Install in a Production Environment

Install this package in the org where you or your users work, including Developer Edition orgs.

Install WeTransact

By WeTransact DevHub

**Installing and granting access to admins Only...**

App Name	Publisher	Version Name	Version Number
WeTransact	WeTransact DevHub	0.14.0	0.14

Description

Integrates WeTransact into your Salesforce org.

Additional Details [View Components](#)

After installation completes, click Done.

Step 4: Verify Installation

Navigate to: **Setup → Installed Packages**. Verify that WeTransact appears in the Installed Packages list.

✓ Success

If the package appears, the installation completed successfully.

Step 5: Assign Permissions

All access is granted through Permission Set Groups (PSGs). Assign the appropriate Permission Set Groups based on the user's role.

💡 **Permission Set Groups**

WeTransact – Admin Access

Grants full administrative access to credentials, logs, flow configuration, and manual execution.

WeTransact Private Offer – User Access

Grants access to create and manage Private Offers from the Opportunity page.

WeTransact Co-Sell – User Access

Grants access to create and manage Co-Sell records from the Opportunity page.

Bulk-Assign Permission Set Groups

Use this method to assign or remove a Permission Set Group for multiple users at once.

💡 **Tip**

Permission Sets can also be assigned individually from each User record.

1. Open Permission Set Groups

Navigate to: **Setup → Permission Set Groups**

2. Open the Permission Set Group

For example: **WeTransact Co-Sell – User Access**

3. Click Manage Assignments

4. Click Add Assignments

5. Select Users

Choose the users that should receive access. Click Next.

The screenshot shows a user selection interface titled "Active Users". It features a search bar, a list of users with checkboxes, and a "Next" button highlighted with a red box.

Full Name	Username	Profile
Chatter Expert	chatty.00dqy00000en...	Chatter Free User
Integration Us	integ	Analytics Cloud Integra...
System Administrator		System Administrator
System Administrator		System Administrator
Security User	sec	Analytics Cloud Securi...

6. Assign Permissions

Click Assign.

The screenshot shows a dialog titled "Select an Expiration Option For Assigned Users". It includes radio buttons for "No expiration date" and "Specify the expiration date", a "Time Zone" dropdown, and a table of "Selected Users". The "Assign" button is highlighted with a red box.

Selected Users

Full Name	Role	Profile	Active	User License	Expires On
		System Adminis...	✓	Salesforce	Never Expires
		System Adminis...	✓	Salesforce	Never Expires

Note

Repeat these steps for the remaining Permission Set Groups if required.

Step 6: Configure the API Connection

The Salesforce App communicates with WeTransact through Named Credentials.

Navigate to: Setup → Named Credentials

Open: WeTransact Named Credential

Click Edit.

Update the endpoint to:

https://api.archera.wetransact.io/api/v1

Click Save.

Next, open: WeTransact External Credential

SETUP > NAMED CREDENTIALS

Edit

Delete

✓ Success

Salesforce is now connected to the WeTransact API.

Step 7: Add the Co-Sell Wizard to Opportunity Pages

Open any Opportunity.

Select: ⚙️ → Edit Page

Search for: Dynamic Related List – Single

Drag it onto the page.

Add the following fields:

- Deal/Offer Name
- Deal/Offer Status
- Sync Status

Replace the New action with: Co-Sell Wizard

Step 8: Add the Private Offer Wizard

Repeat the previous steps. Add another Dynamic Related List – Single.

Use these fields:

- Offer Name
- Offer Status
- Sync Status

Replace the New action with: Private Offer Wizard

Save and Activate the page

Verify the Installation

Open any Opportunity.

You should now see:

- ✓ Co-Sell Wizard
- ✓ Private Offer Wizard

Both should appear and be ready for use.

Installation Complete 🎉

The WeTransact Salesforce App is now installed and fully configured.

Support

We hope you were able to successfully follow the steps outlined above. If you face any issue please do not hesitate in reaching out to your WeTransact representative.
