Optimize your list Storefront

When you publish a new listing, expect a few hours of review time by Microsoft's certification team. Your listing will either be published or returned for revisions if necessary.

Our Head of Marketing will walk you through how to make your listing shine on the Marketplace.

Almost there! Let's review a few things.

Before we publish your listing, let's get clear on what pricing plans you would like to send for publication. You'll be able to select from completed drafts or published plans with new edits.

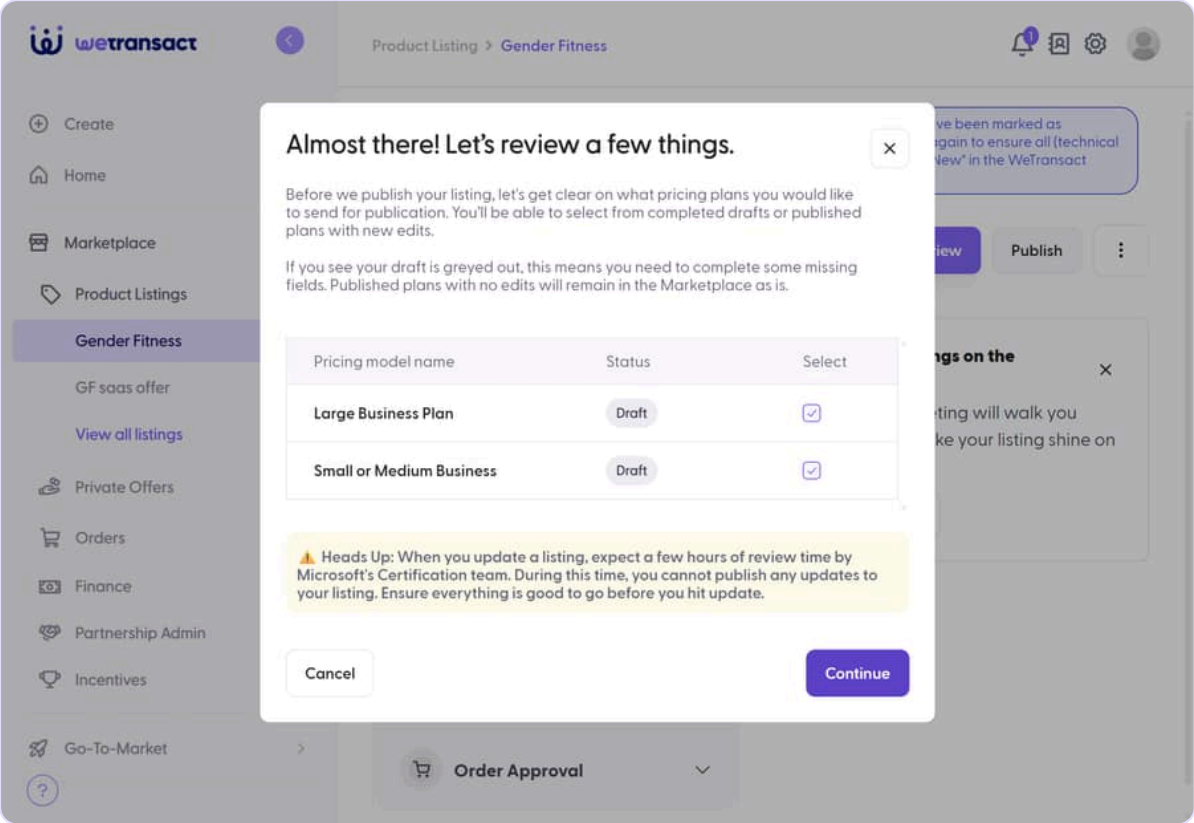

If you see your draft is greyed out, this means you need to complete some missing fields. Published plans with no edits will remain in the Marketplace as is.

Pricing model name	Status	Select
Large Business Plan	Draft	☒
Small or Medium Business	Draft	☒

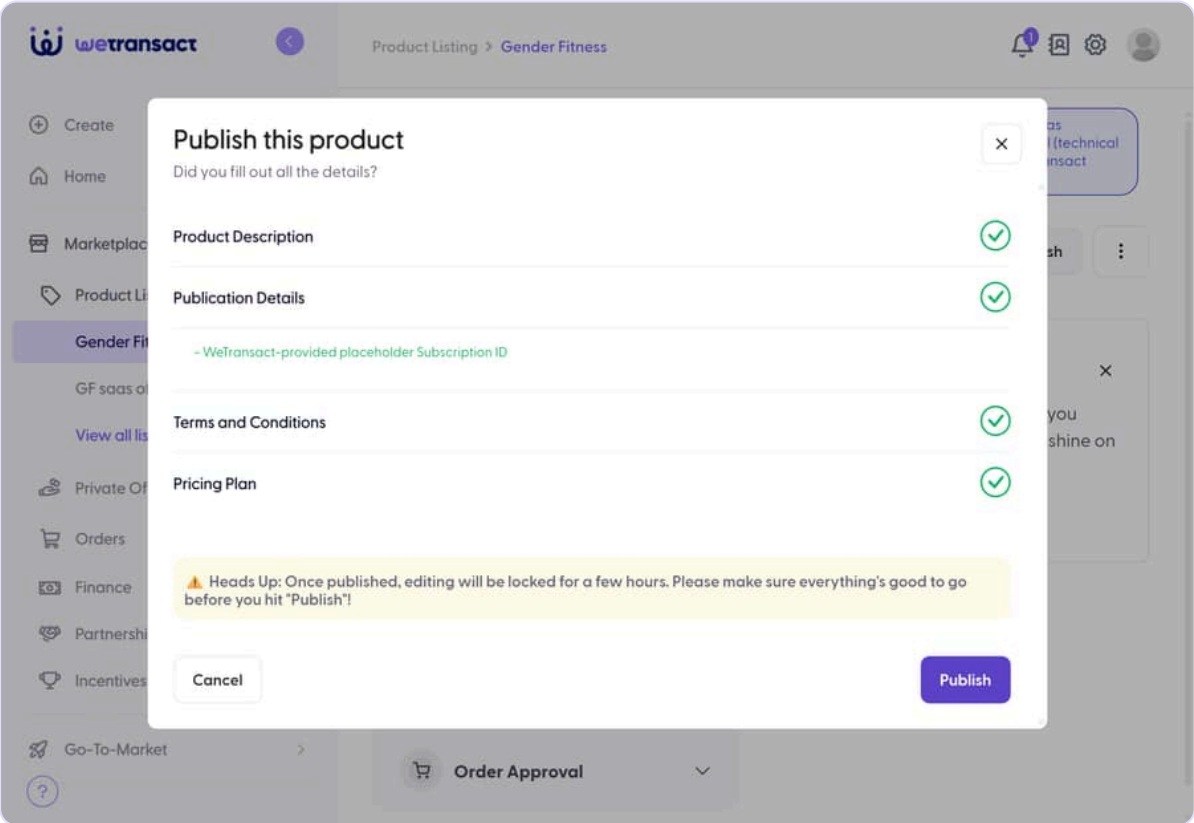

Heads Up: When you update a listing, expect a few hours of review time by Microsoft's Certification team. During this time, you cannot publish any updates to your listing. Ensure everything is good to go before you hit update.
