WETRANSACT DOCS

Create Azure Support Request for Invoice Payment

docs.wetransact.io/create-azure-support-request-for-invoice-payment

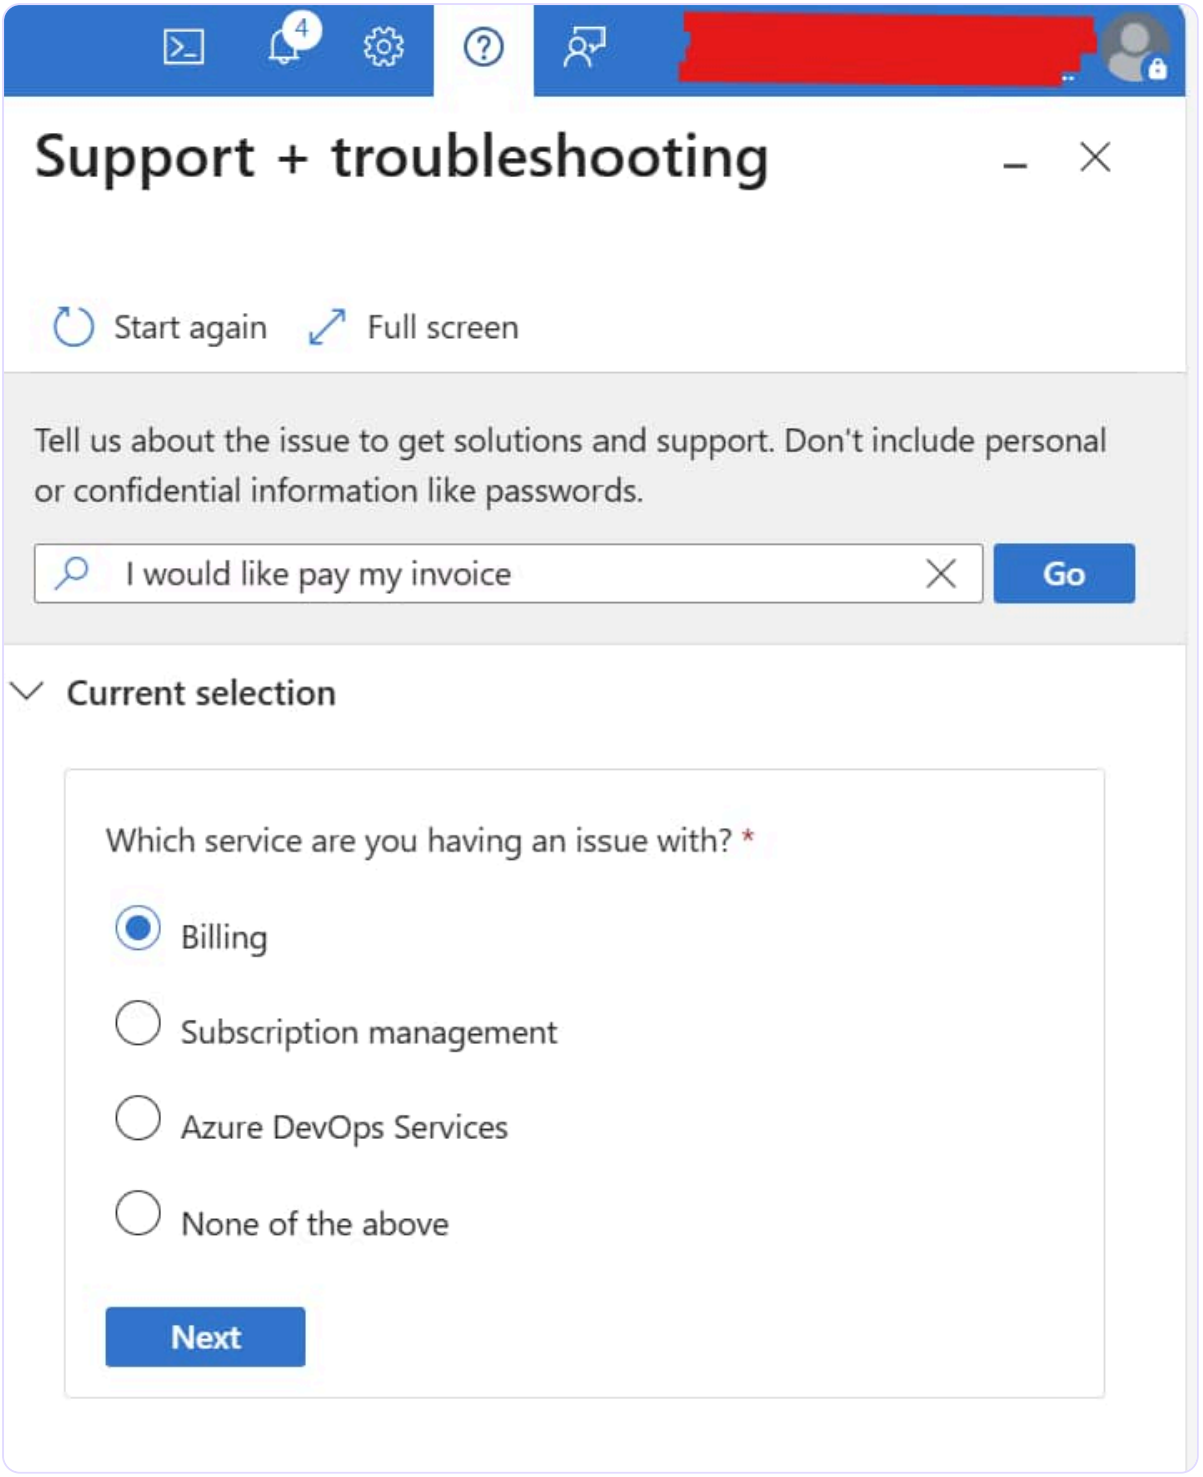

This guide walks through the steps to create an Azure support request for invoice payment using bank transfer.

It is intended for scenarios where credit card payment fails or is not an option due to card limits.

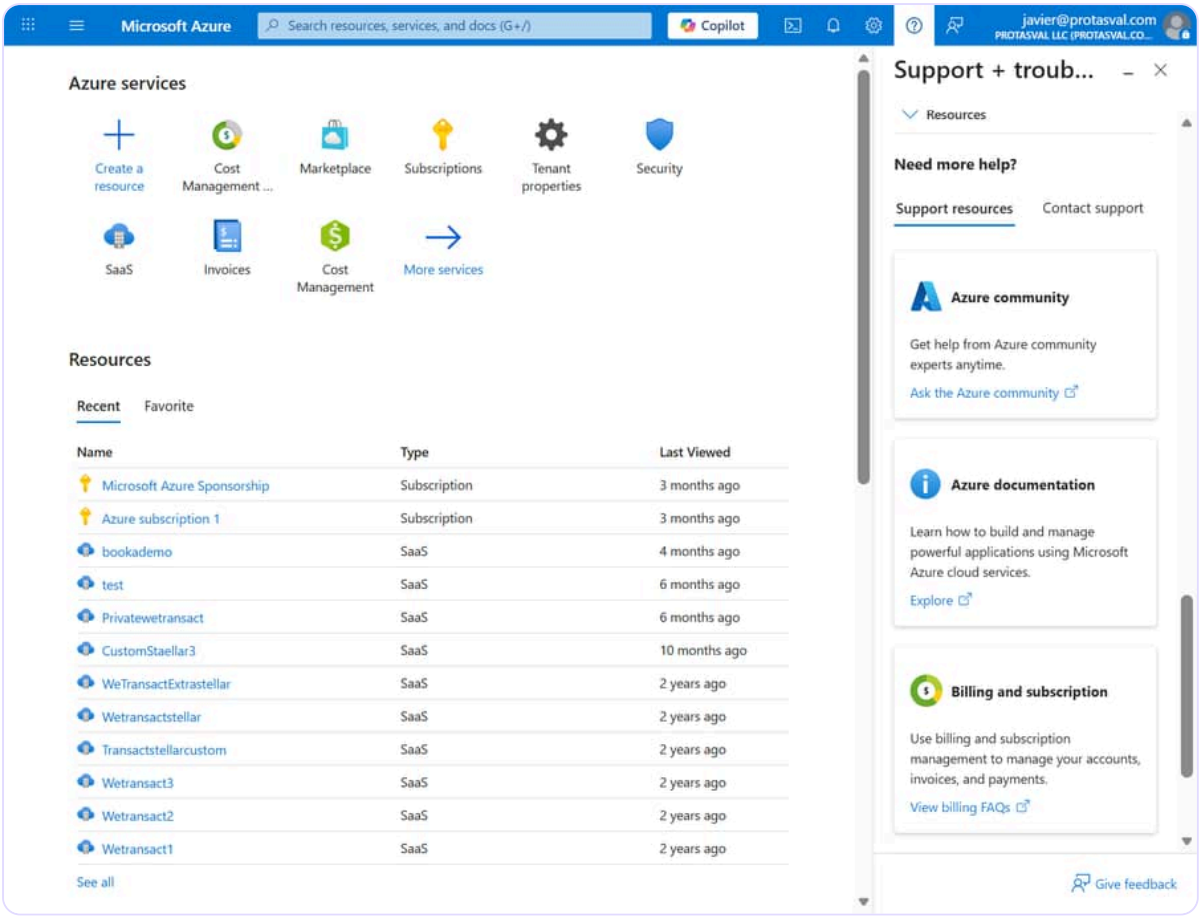

The process is completed directly in the Azure Portal by submitting a billing support ticket. Once submitted, a Microsoft support engineer will contact you to assist with the payment.

Sign in to your Azure portal.

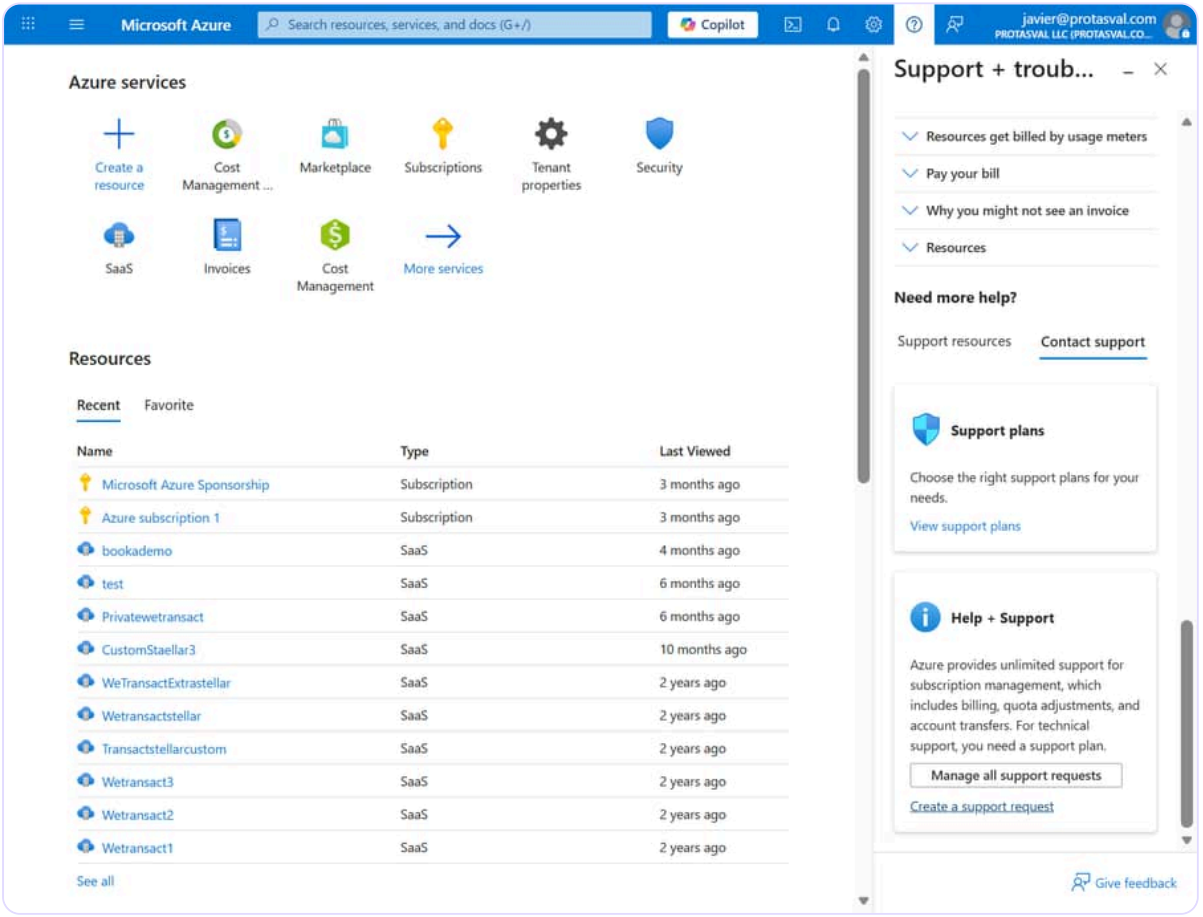

🟣 **Go to the question Mark**

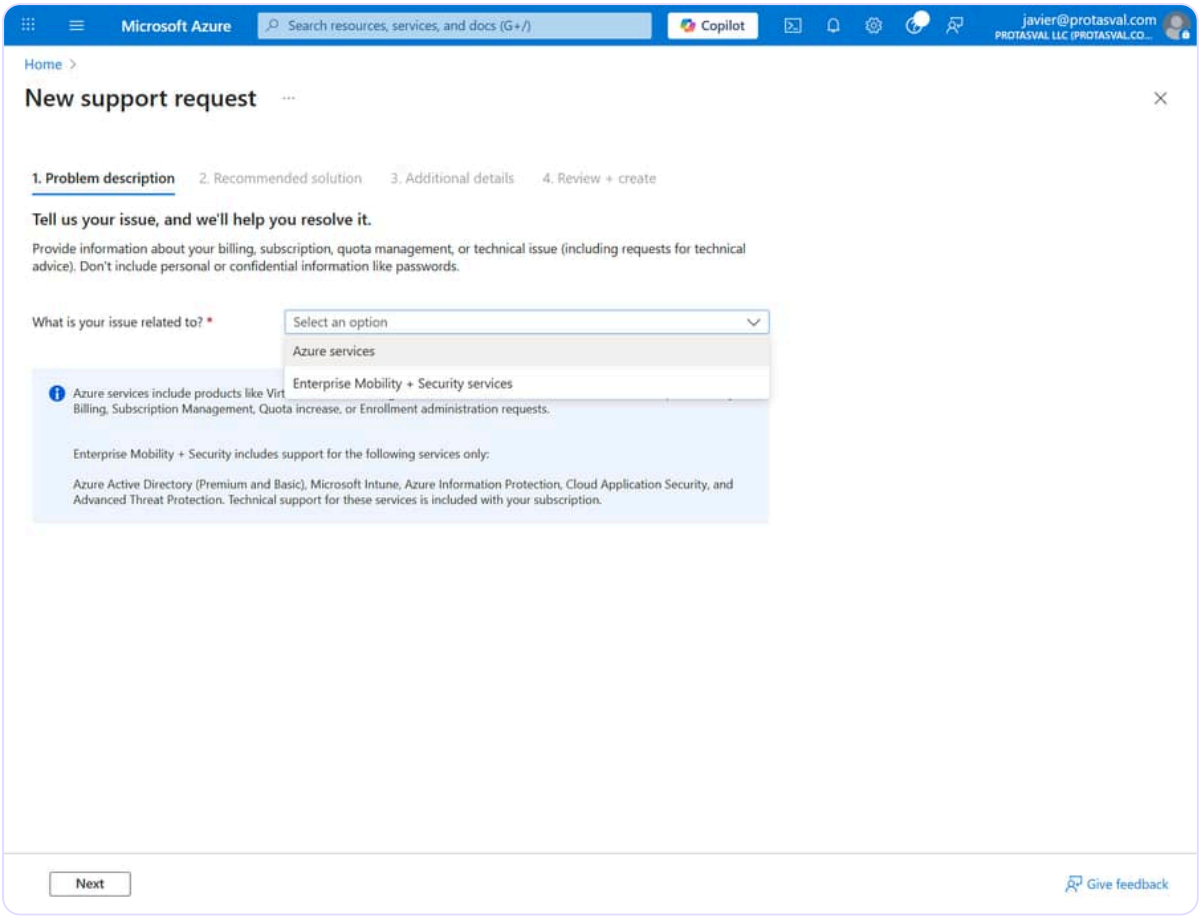

Click on Contact support

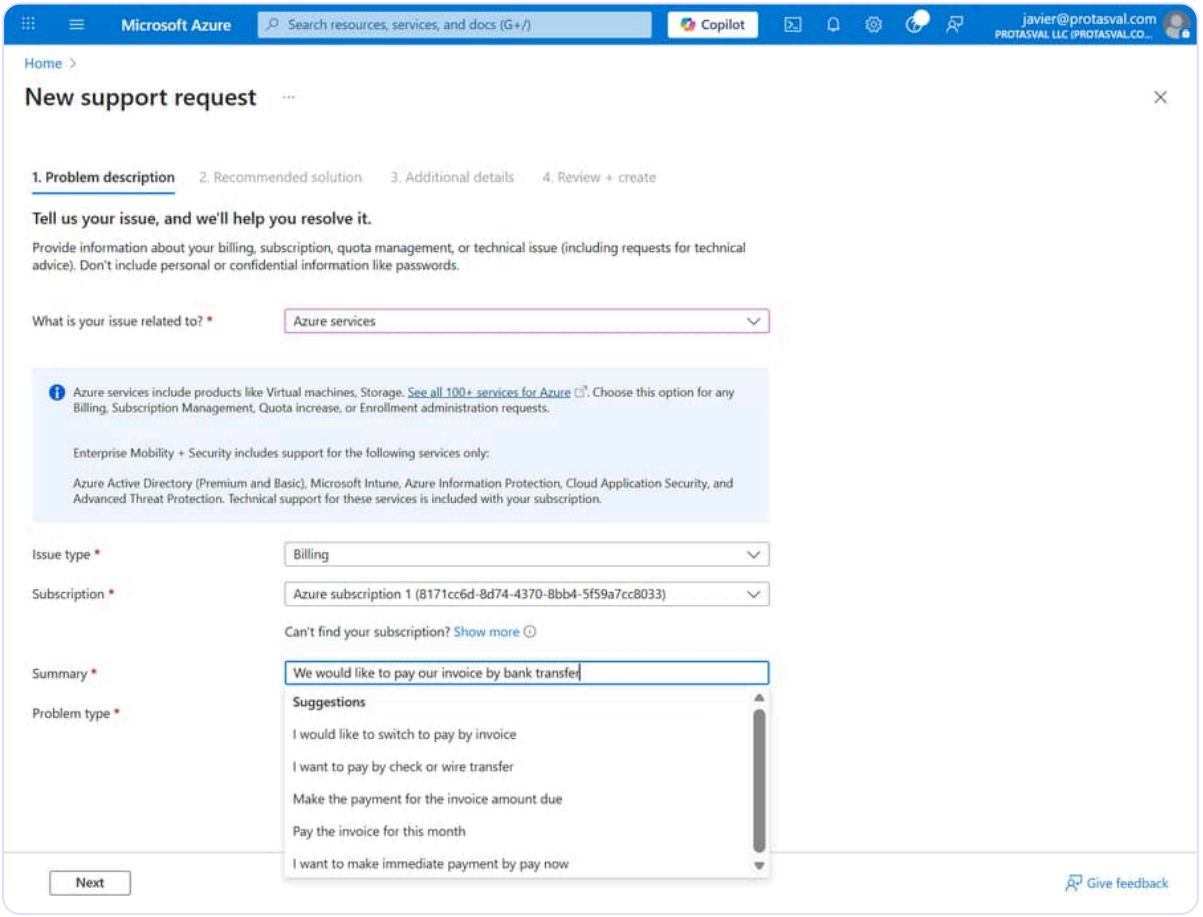

Click on Create a support request

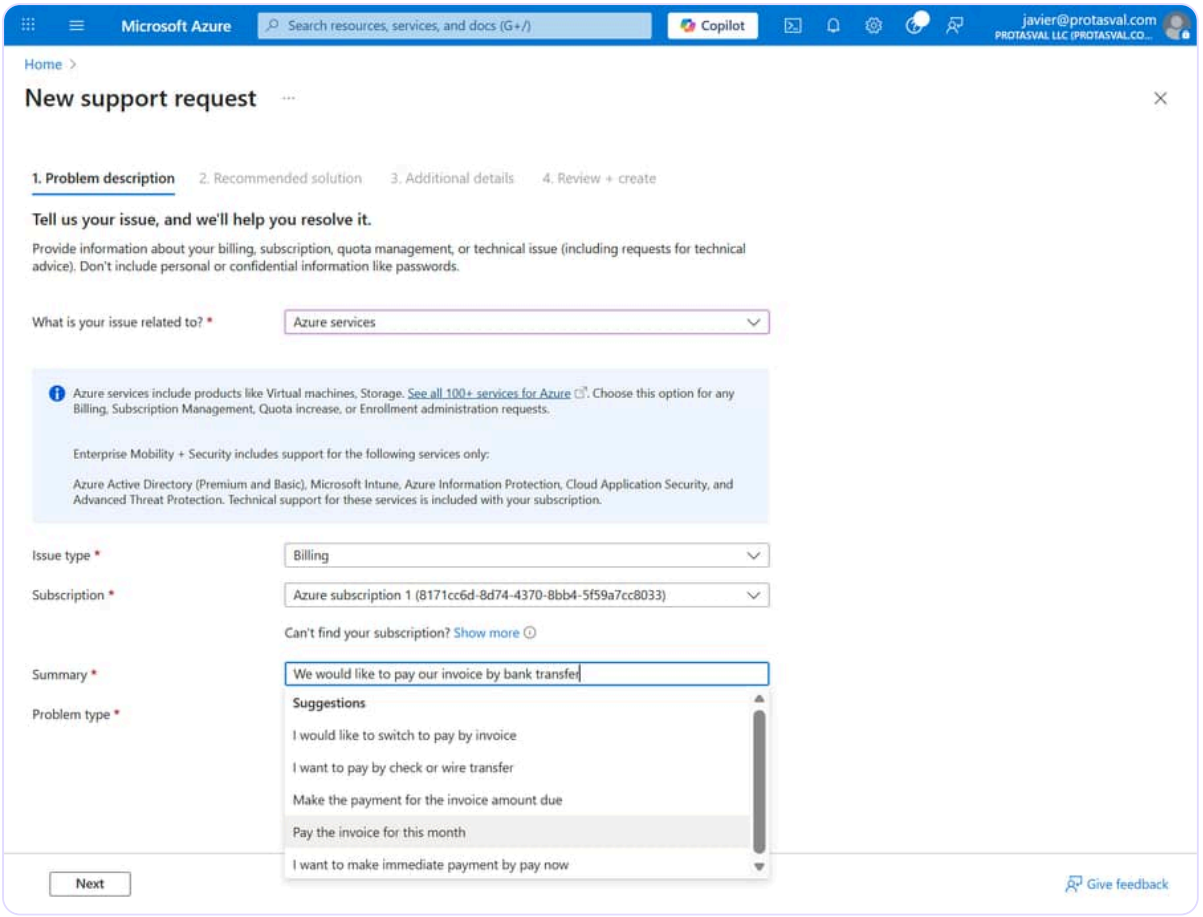

Issue related to: Azure services

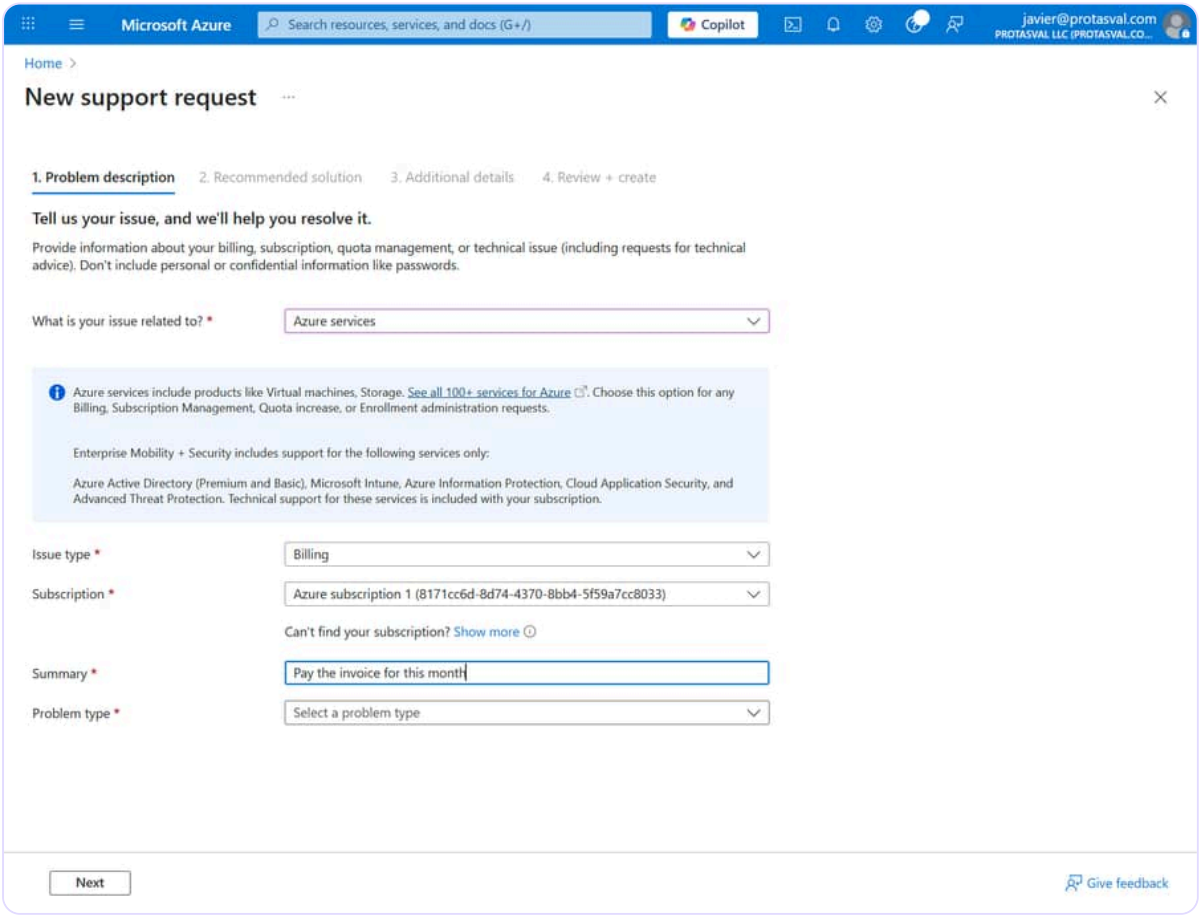

Type "We would like to pay our invoice by bank transfer"

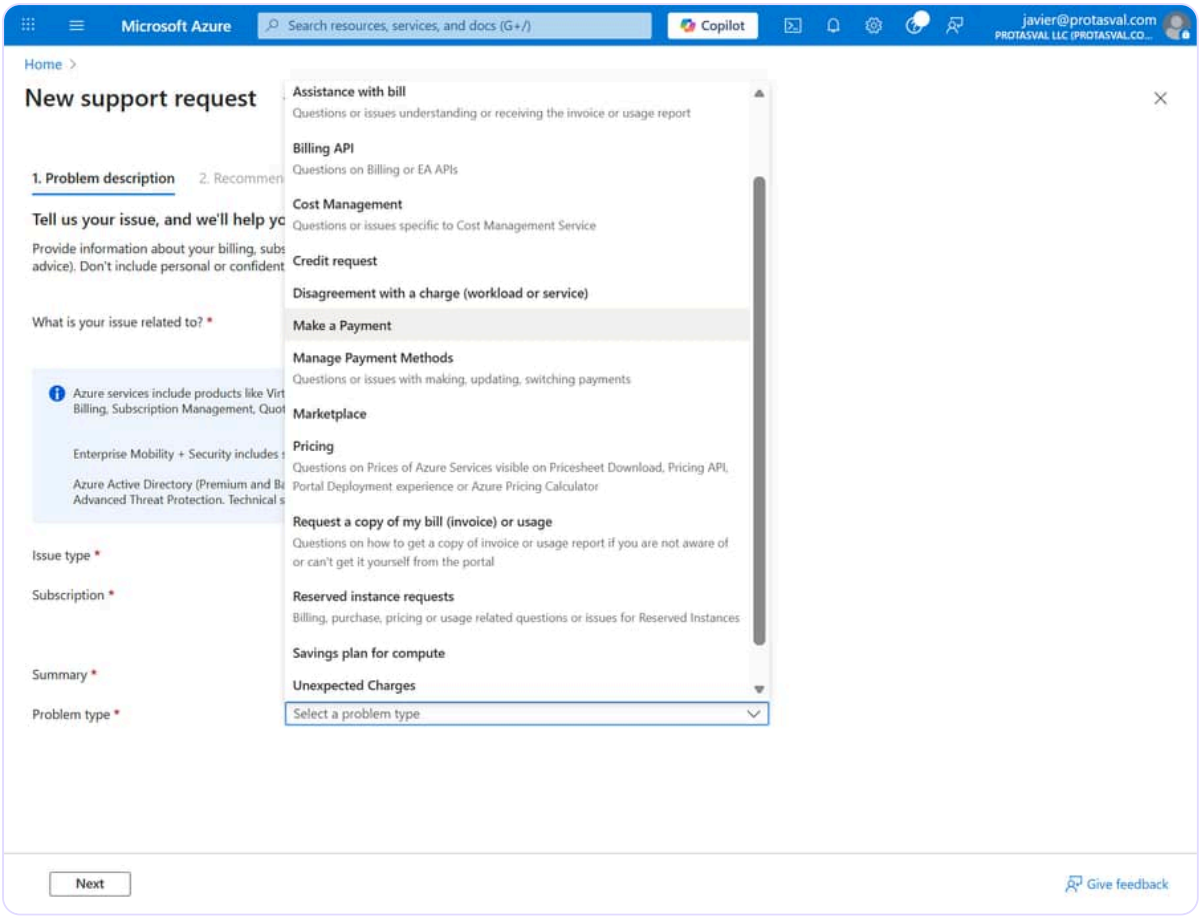

Click on Pay the invoice for this month

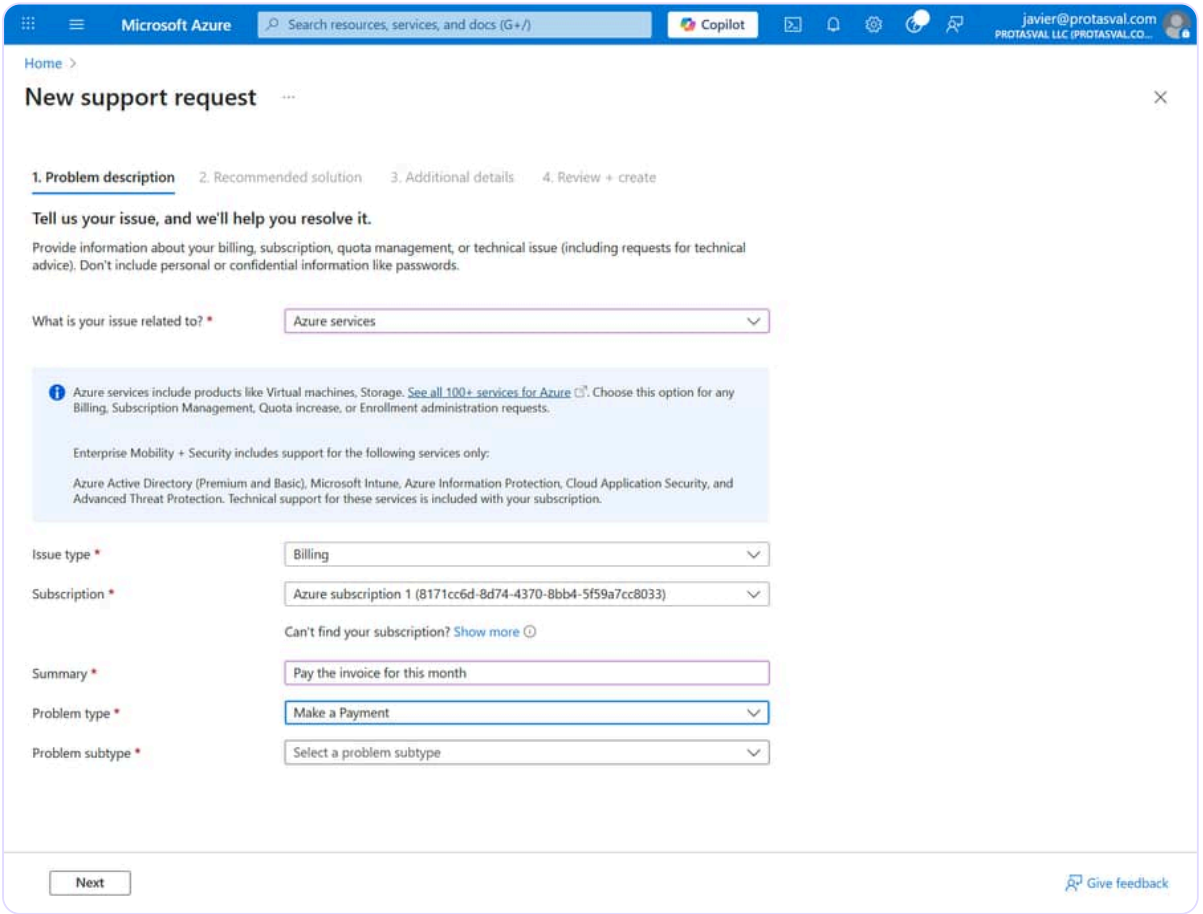

Click on Problem type
