Frontier Accelerate for Marketplace: Fixing a Greyed-Out Buy Now Button

docs.wetransact.io/frontier-accelerate-for-marketplace-fixing-a-greyed-out-buy-now-button

If **Buy Now** is greyed out on the Frontier Accelerate for Marketplace offer, your Microsoft billing profile isn't linked to your Partner Center account, or hasn't loaded. Link or re-select it under **Account settings** → **Billing profile**, then buy the no-cost ($0) offer from **Membership offers**.

The issue

After you complete the eligibility form and select **Enroll**, the **Buy Now** button for **Frontier Accelerate for Marketplace** stays greyed out under **Membership** → **Membership offers**.

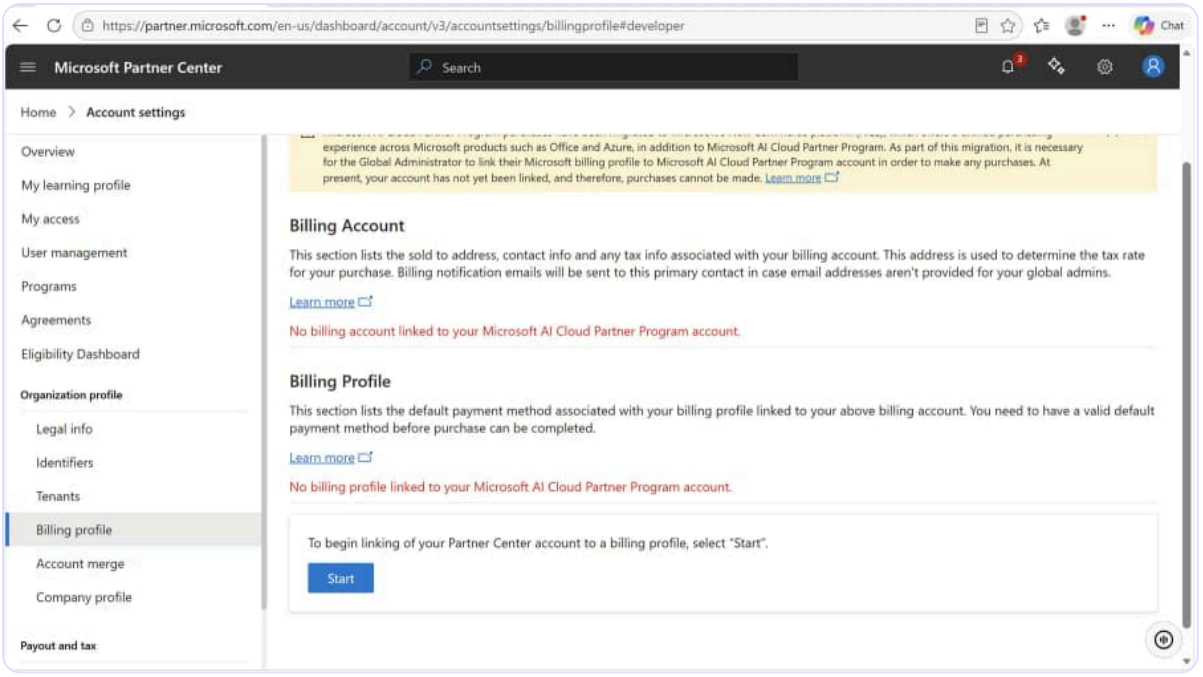

Step 1: Link your billing account and profile

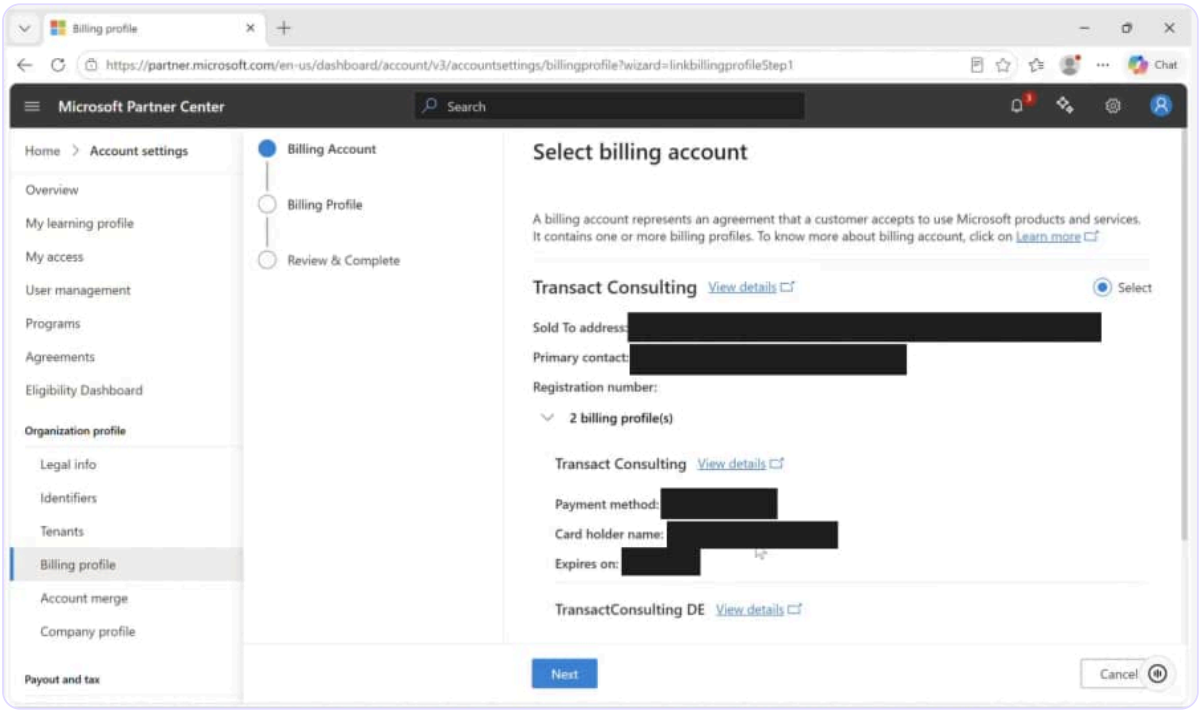

Go to **Account settings** → **Billing profile** (under **Organization profile**). What you see there decides which steps to follow.

If no billing account is linked

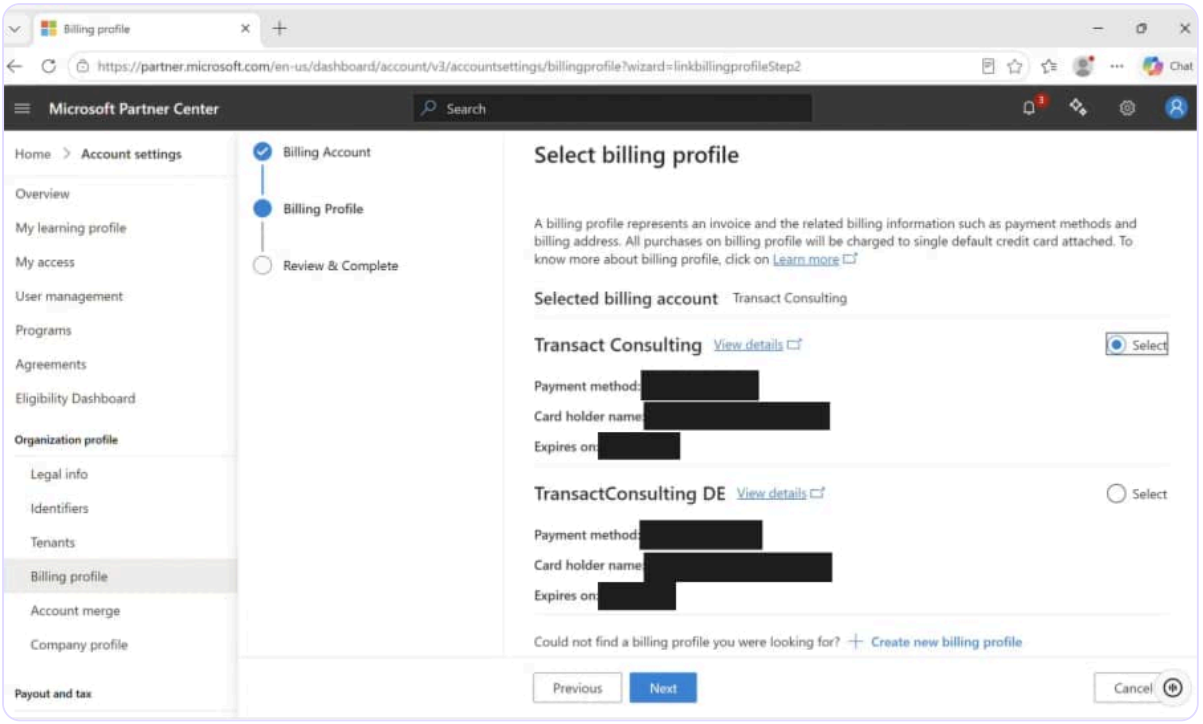

The page shows *No billing account linked* and *No billing profile linked*. Select **Start** to link them.

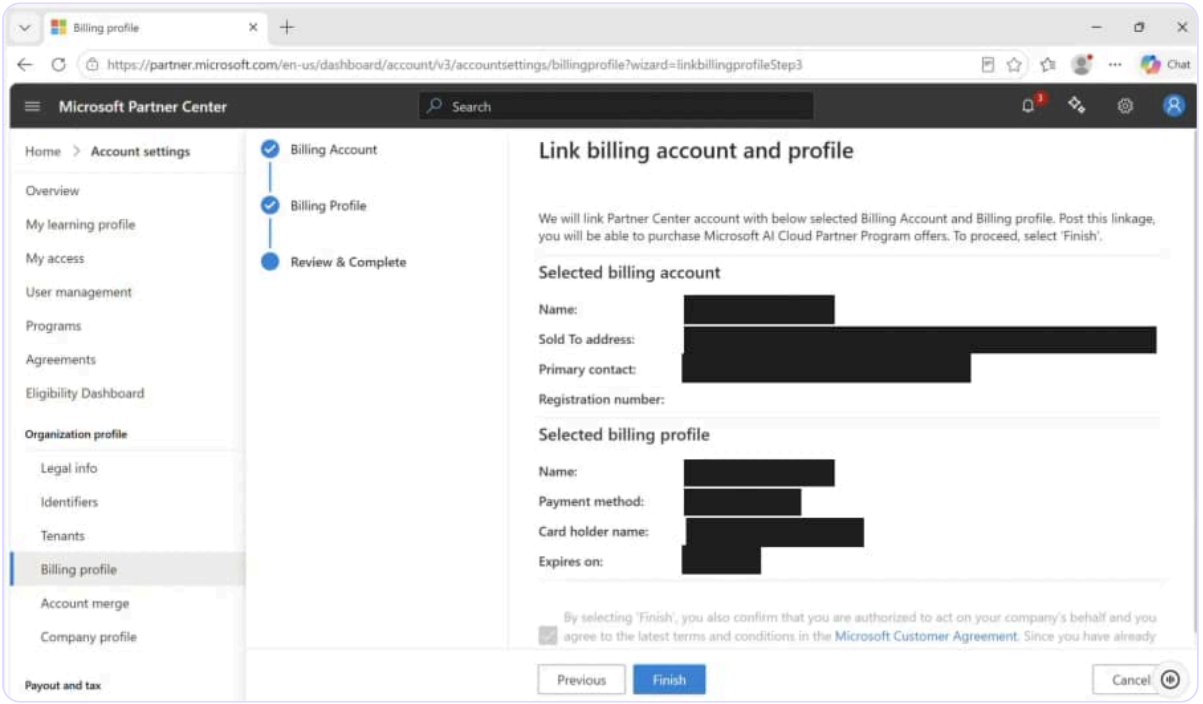

1. Billing Account: select your company's billing account, then select **Next**.

2. Billing Profile: select the billing profile that holds your payment method, then select **Next**.

3. Review & Complete: check the details, then select **Finish**. Once linked, you can purchase Microsoft AI Cloud Partner Program offers.

If a billing profile is already linked

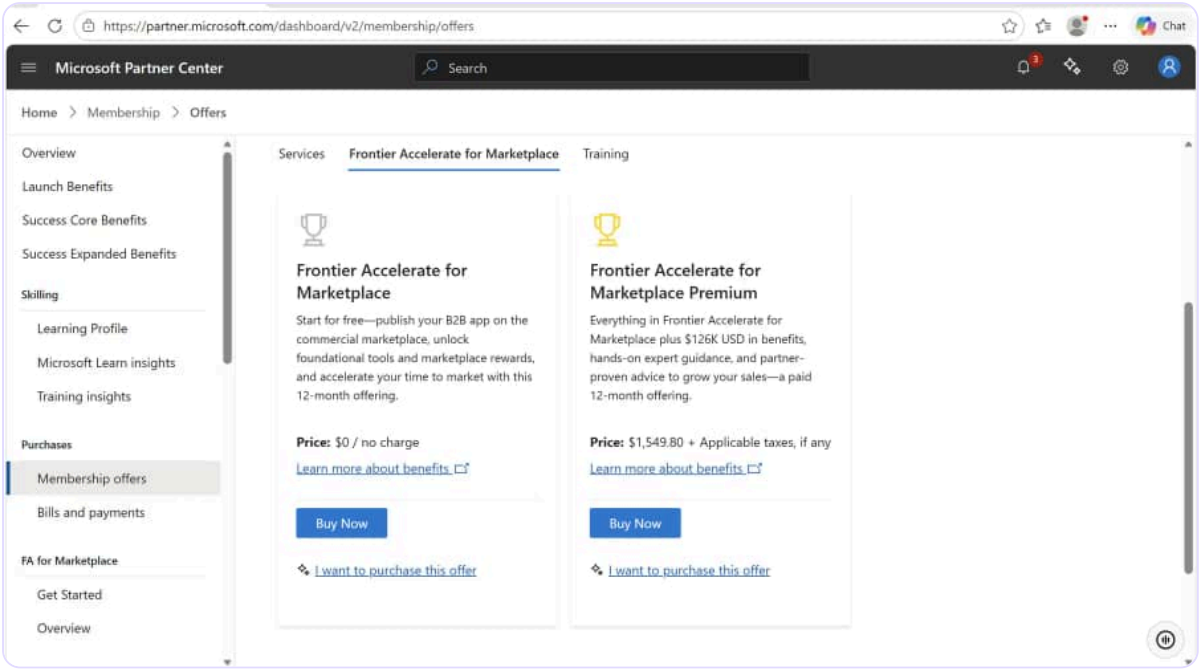

If your billing profile is already linked but **Buy Now** is still greyed out, re-select it to restart the billing profile setup:

1. Go to **Account settings** → **Billing profile**.
2. Select **Change billing account**.
3. Re-select the **same** billing account and billing profile that are already configured.
4. Select **Finish**. This triggers the billing profile setup again.

5. Return to **Membership** → **Membership offers** and refresh the page. Check that the billing details load and **Buy Now** is available.

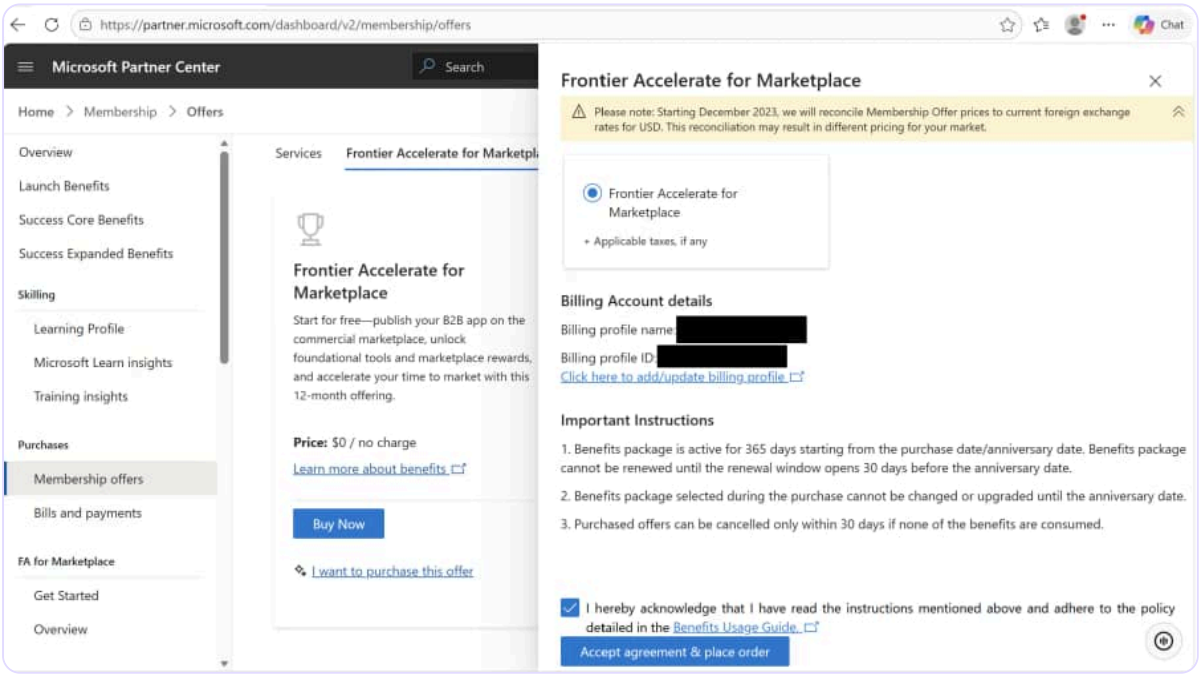

Step 2: Buy the no-cost offer

Return to **Membership** → **Membership offers** and refresh the page. **Buy Now** is now active.

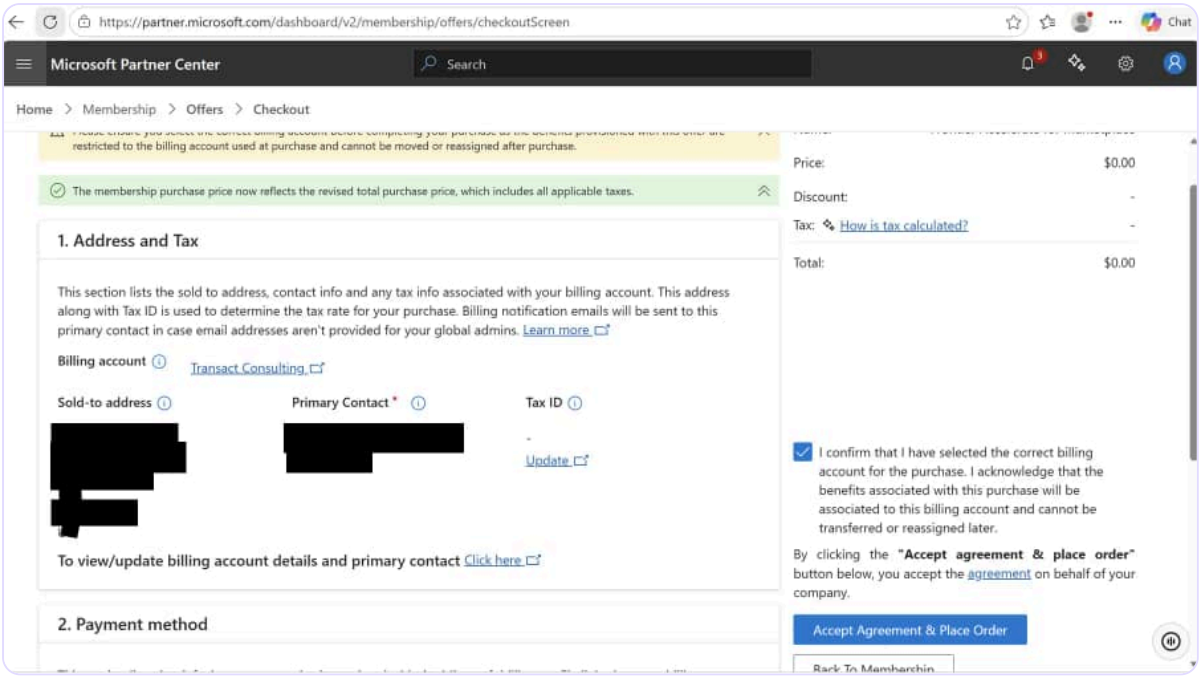

1. Under **Frontier Accelerate for Marketplace** ($0 / no charge), select **Buy Now**.

2. In the side panel, check the billing account details, tick the acknowledgement box, and select **Accept agreement & place order**.

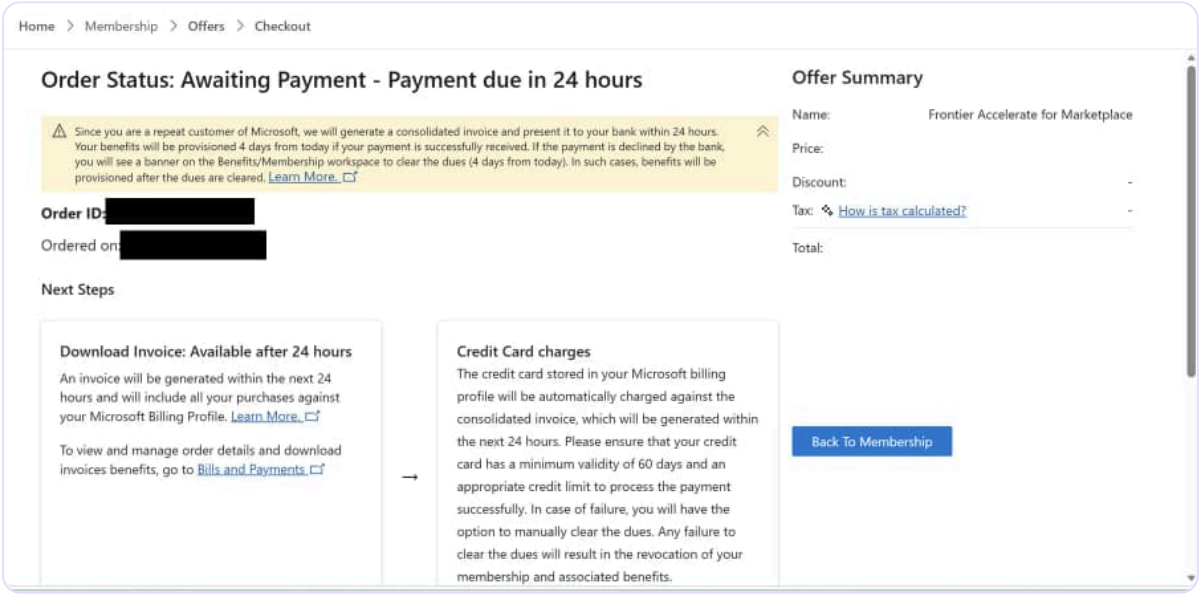

3. On the **Checkout** page, check that the total is **$0.00** and the billing account is correct. Tick the confirmation box, then select **Accept Agreement & Place Order**.

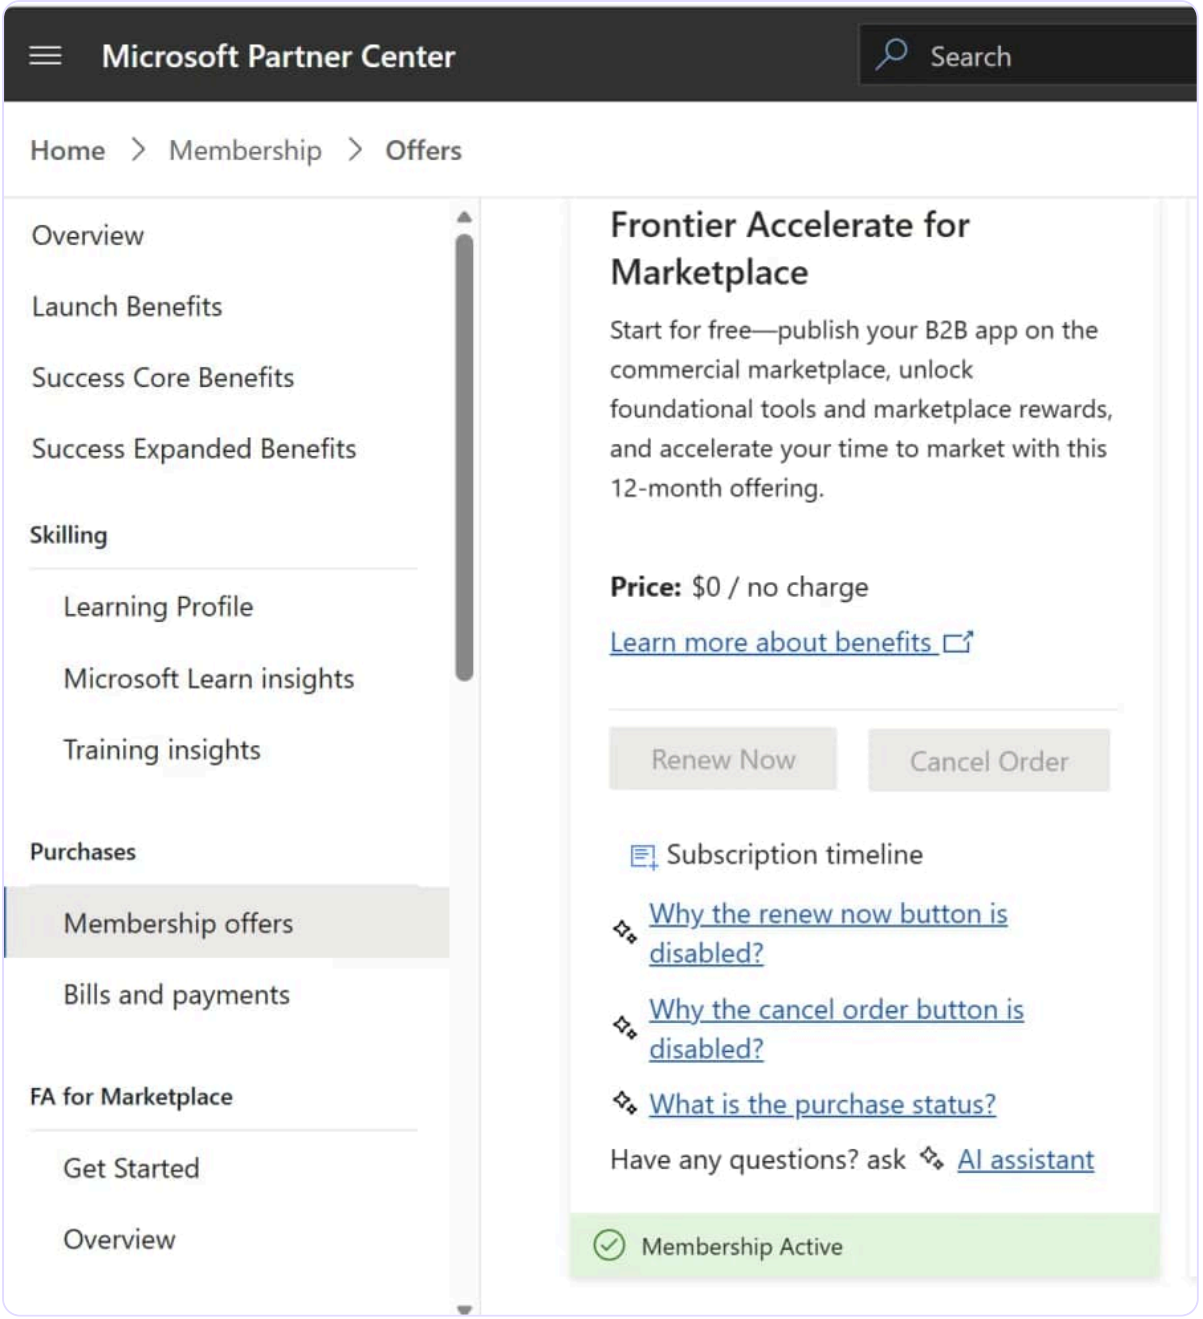

Step 3: Confirm your enrolment

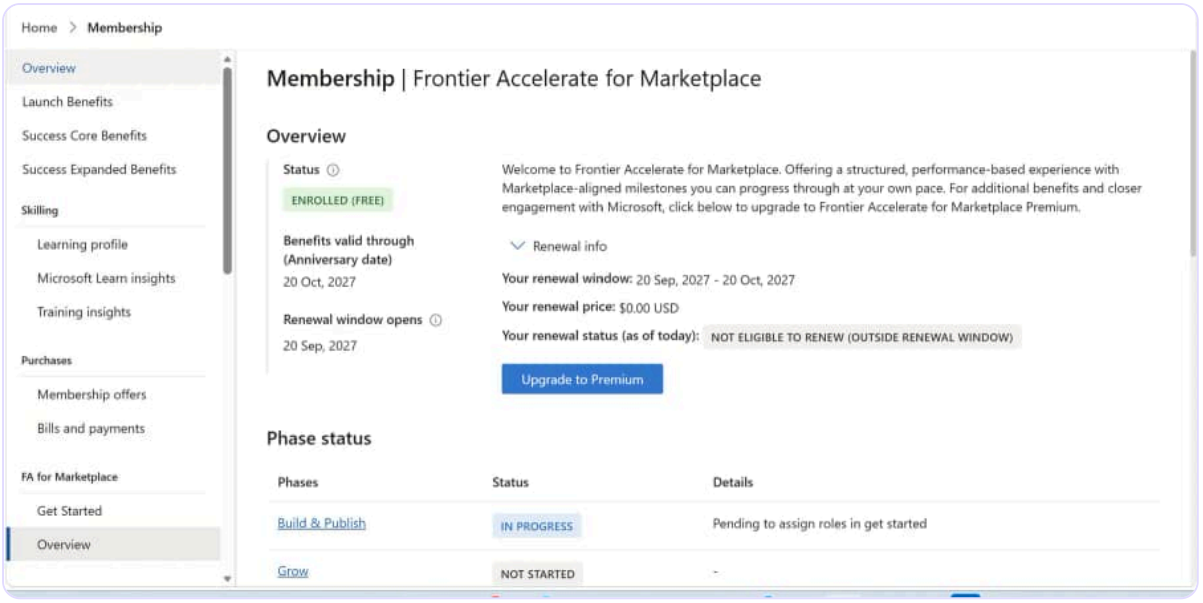

After you place the order, the order page shows **Awaiting Payment**. This is expected for a $0.00 order, as nothing is charged. Microsoft's order page says benefits are provisioned 4 days after the order.

Once the order is processed, **Membership offers** shows **Membership Active** for Frontier Accelerate for Marketplace.

Under **FA for Marketplace** → **Overview**, your status shows **ENROLLED (FREE)**, with benefits valid for 12 months.

Once enrolled, you can resubmit any co-sell validation that failed on Frontier Accelerate enrolment.

Still greyed out? Raise a Partner Center support ticket with screenshots of the **Buy Now** button and your **Billing profile** page: How to create a Partner Center support ticket?
