

Finance – tax, payout and how the money flows

You own the tax and payout profile – the details Microsoft needs to pay the company. It's one form, completed once, alongside the Global Admin in Partner Center.

What to provide (before call 1)

- ☐ **Legal name of the company** – exactly as registered
- ☐ **Beneficiary email and contact**
- ☐ **Legal address** – the registered office
- ☐ **IBAN** / account number for payouts
- ☐ **Company registration no.** – if required
- ☐ **Tax ID** – VAT / tax registration / TIN (US: EIN)

FEES

Microsoft keeps 3% of each transaction – 1.5% on private-offer renewals flagged as renewals. No other Marketplace fees.

TAXES

Microsoft is merchant of record in most countries – it calculates, collects and remits VAT / GST / sales tax based on your end customer's location.

When you get paid

The flow: purchase → Microsoft invoices your customer → the customer pays → Microsoft sends your payout on the **15th of the month after collection**. Timing depends on the customer's contract with Microsoft:

- **Microsoft Customer Agreement (standard):** invoiced immediately – roughly one month from purchase to payout.
- **Enterprise Agreement / pay-as-you-go:** invoiced next billing cycle, net 30 – roughly two months.
- **Through a reseller (CSP):** resellers get 60-day terms – roughly four months.

Track it live: invoice and payout status for every order is visible in your WeTransact portal → **Finance** tab.

WHAT YOUR CSM DOES

Enters these details into Partner Center with your Global Admin on call 1 – you only supply the information above. We answer any payout or fee questions and monitor Microsoft's validation until the profile is approved.
