docs.wetransact.io/deal-registration-create-a-new-co-sell-deal

The Deal Registration tab is designed to facilitate the creation and management of Co-sell deals with Microsoft. This tool allows users to input the country and company name to generate a list of potential customers. It reduces the time and effort required to identify and engage with potential customers, particularly those who are managed accounts or MACC eligible.

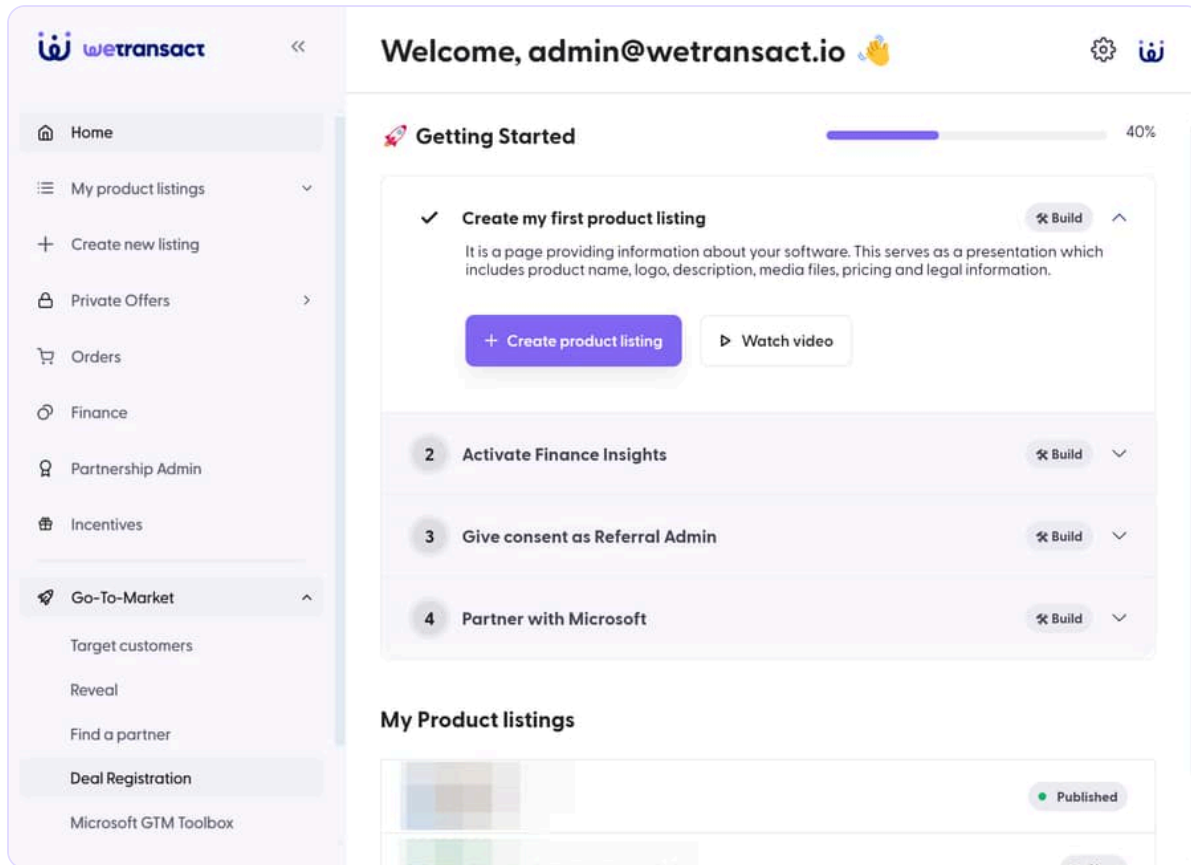

i The Orders Tab should be activated before setting up the Deal Registration Tab. For instructions on activating the Orders tab, go to this link. The user should have a Referral Admin role in Partner center to be able to complete this process.
