

How to connect an email account for Outreach campaigns?

docs.wetransact.io/how-to-connect-an-email-account-for-outreach-campaigns

Outreach campaign: If you see an error below 🙄 while connecting the email, the following steps must be completed by your admin (or from an admin account).

Type of accounts

- Microsoft outlook
- Gmails or GSuite accounts

◆ Microsoft Outlook

These steps need to be completed for each user who wants to connect their **Outlook** email account to Outreach campaigns.

● Log in to Microsoft 365 Admin Center

- Go to <https://admin.microsoft.com>
- Sign in using your **admin credentials**

● Go to Active Users

- In the left-hand navigation pane, click on **“Users”**
- Then select **“Active users”**

● Locate the Email Account

- Use the search bar to find the user by name or email address
- Click on the user's name to open their account settings

● Navigate to Mail Settings

- In the user's settings panel, click on **"Mail"**
- Then select **"Manage email apps"**

● Check Authenticated SMTP and IMAP

- In the **Manage email apps** section, look for:
- **Authenticated SMTP**
- **IMAP**
- Make sure the checkboxes are **enabled**

Manage email apps

Choose the apps where Antonio Banganho can access Microsoft 365 email.

- ☒ Outlook on the web
- ☒ Outlook desktop (MAPI)
- ☒ Exchange web services
- ☒ Mobile (Exchange ActiveSync)
- ☒ IMAP
- ☒ Pop
- ☒ Authenticated SMTP

◆ GSuite accounts

These steps only need to be completed once for your Google Workspace administrator.

● Go to Google Admin Console

- Visit <https://admin.google.com>
- Sign in using your **admin account credentials**

● Add an App

- In the Admin Console dashboard, click on **“Security”**
- Then go to **“Access and data control” > “API controls”**
- Click on **“Manage App Access”**
- Click on **“Configure new app”**

Search for the Partner Reach OAuth App

- In the search field, enter the following **Google Client ID**:

310595085974-oejft3ds7pluslj628j52q60a0g60cmm.apps.googleusercontent.com

- Click **Search**

Select the App

- From the search results, select **Partnereach**

● Mark the App as Trusted

- Choose the option to “**Trust**” the app
- Click the **Submit** button

The screenshot shows the 'Configure new app' page in Google Admin. The 'Access to Google data' section is active, and the 'Trusted' option is selected. The 'Trusted' option allows the app to request access to user data in any Google service via OAuth 2.0 scopes. Below this, there are links for 'What to expect with trusted access' and 'What to expect with limited access'. The 'Limited' option is also visible, along with 'Specific Google data' and 'Blocked' options. The 'Specific Google data' option shows a list of services: Gmail (1 scope) and Google sign-in (3 scopes). There is a button to 'Update Google services or scopes'. At the bottom, there are 'Back', 'Cancel', and 'Continue' buttons.

● Finish Setup

- Click the **Finish** button to complete the process

The screenshot shows the 'Review' section of the 'Configure new app' page. It displays the app details: 'Partnersreach' (Web), 'Number of organizations using app: Very low (0-10)', and 'Client ID: 312594081974-ogf32a7pua8k02p0alq60mm.apps.googleusercontent.com'. There is a link to 'View website'. The 'Scope' section shows 'Org unit (1): The Cloud Marketplace Company'. The 'Access to Google data' section shows 'Trusted' and a link to 'What to expect with trusted access'. At the bottom, there are 'Back', 'Cancel', and 'Finish' buttons.

🚀 Final Step

once this is completed please follow this [guide](#) to **Create Warmify Email Rule in Outlook to avoid spam emails.**
