

How to use the reference architecture diagram builder for IP co-sell documentation?

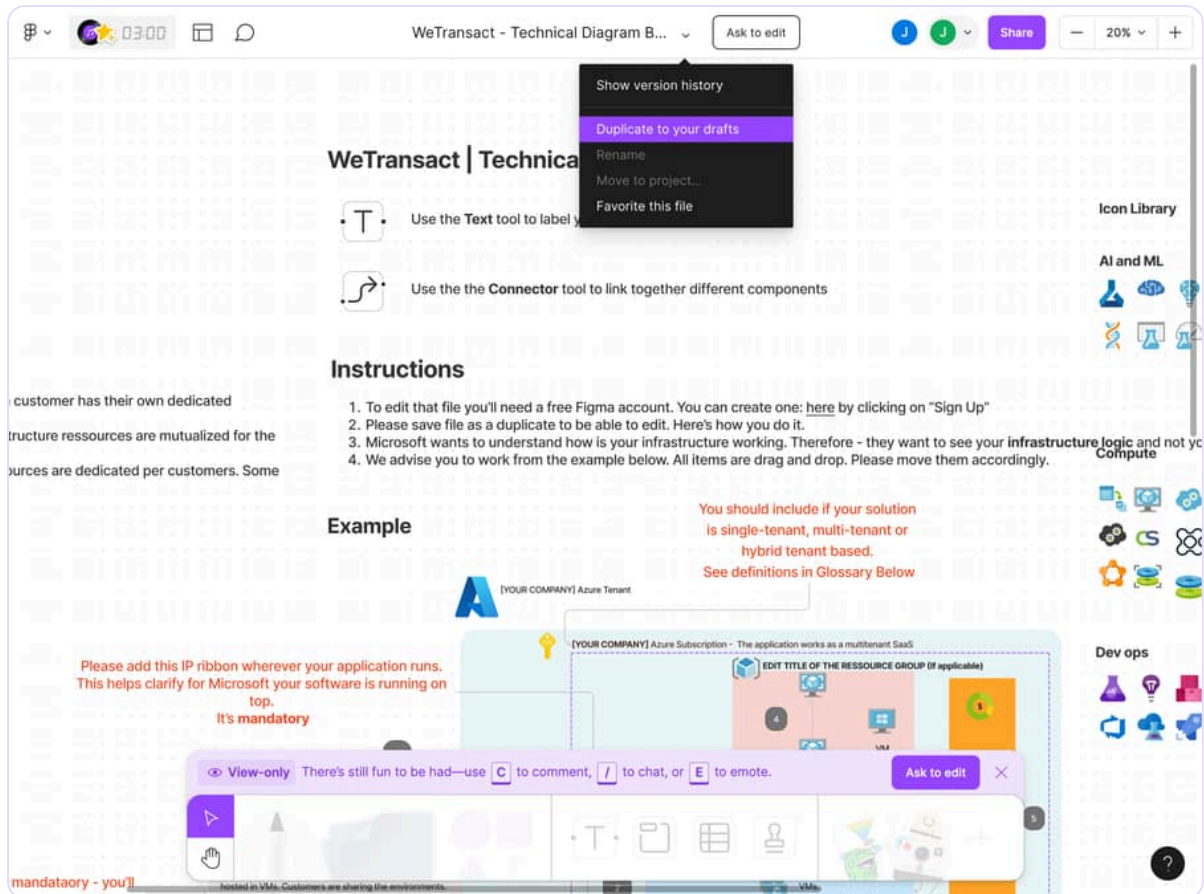

docs.wetransact.io/how-to-use-the-reference-architecture-diagram-builder-for-ip-co-sell-documentation

PWeTransact offers the Technical Diagram Builder to help clients easily create architecture diagrams required for IP Co-sell, ensuring they meet Microsoft's validation requirements and streamline the approval process. Please check the steps below:

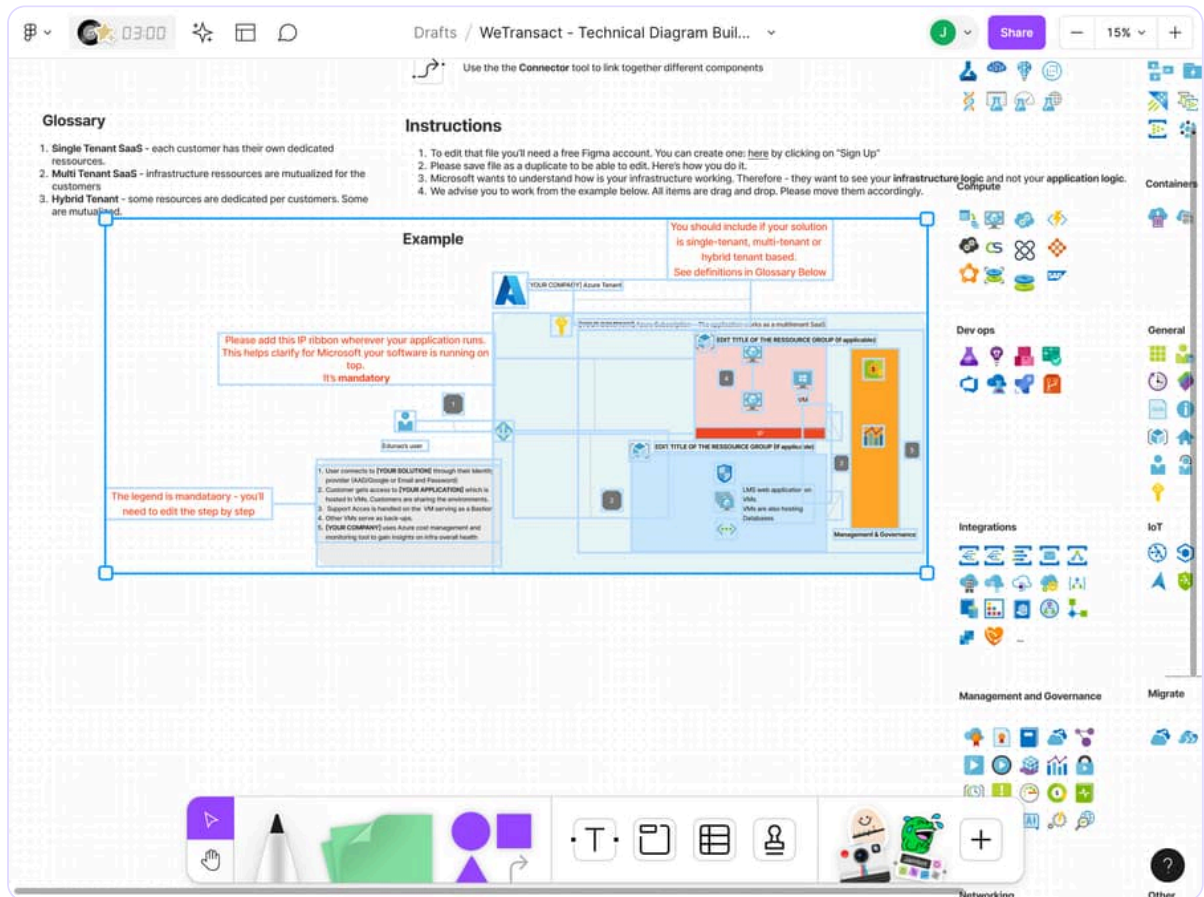

You have opened the "WeTransact | Technical Diagram Builder"

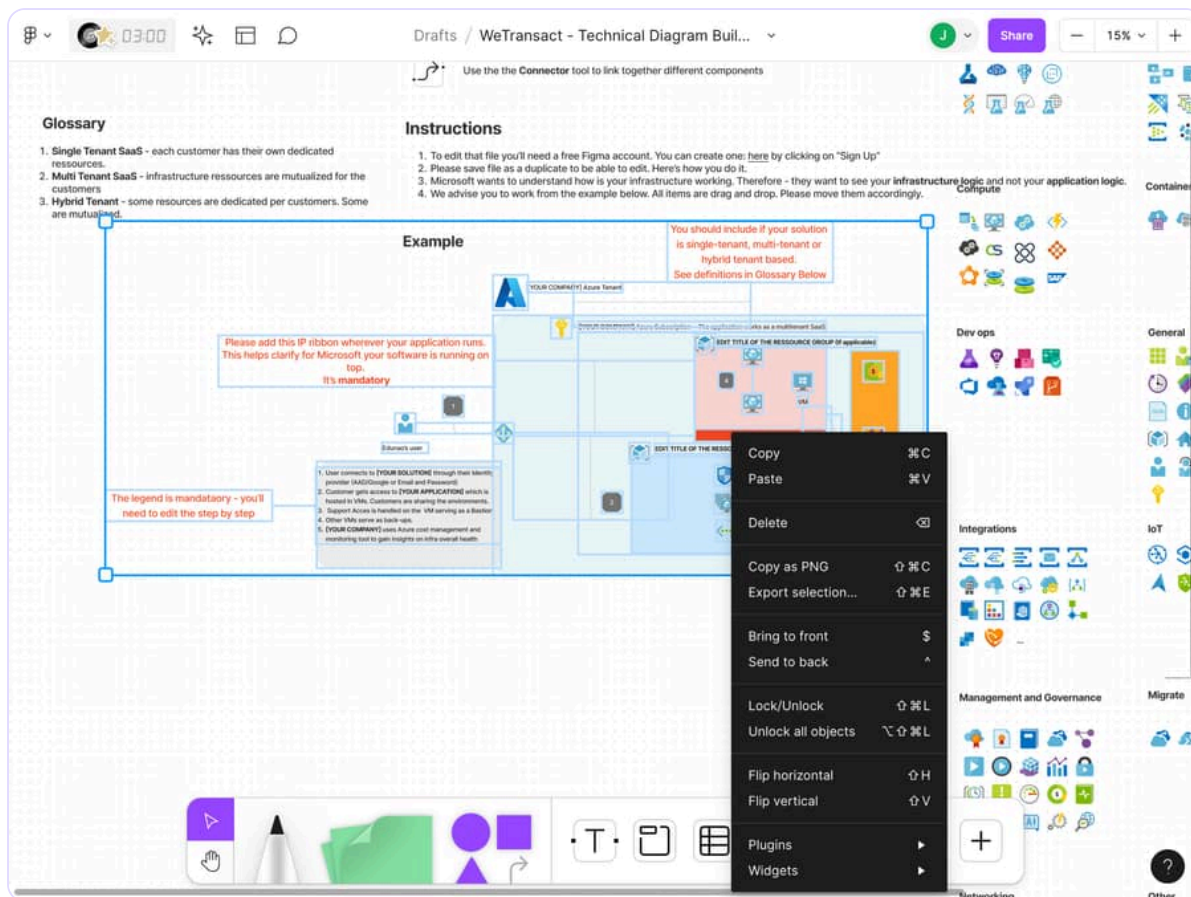

● Click on the little arrow on the title and click to duplicate to your drafts.

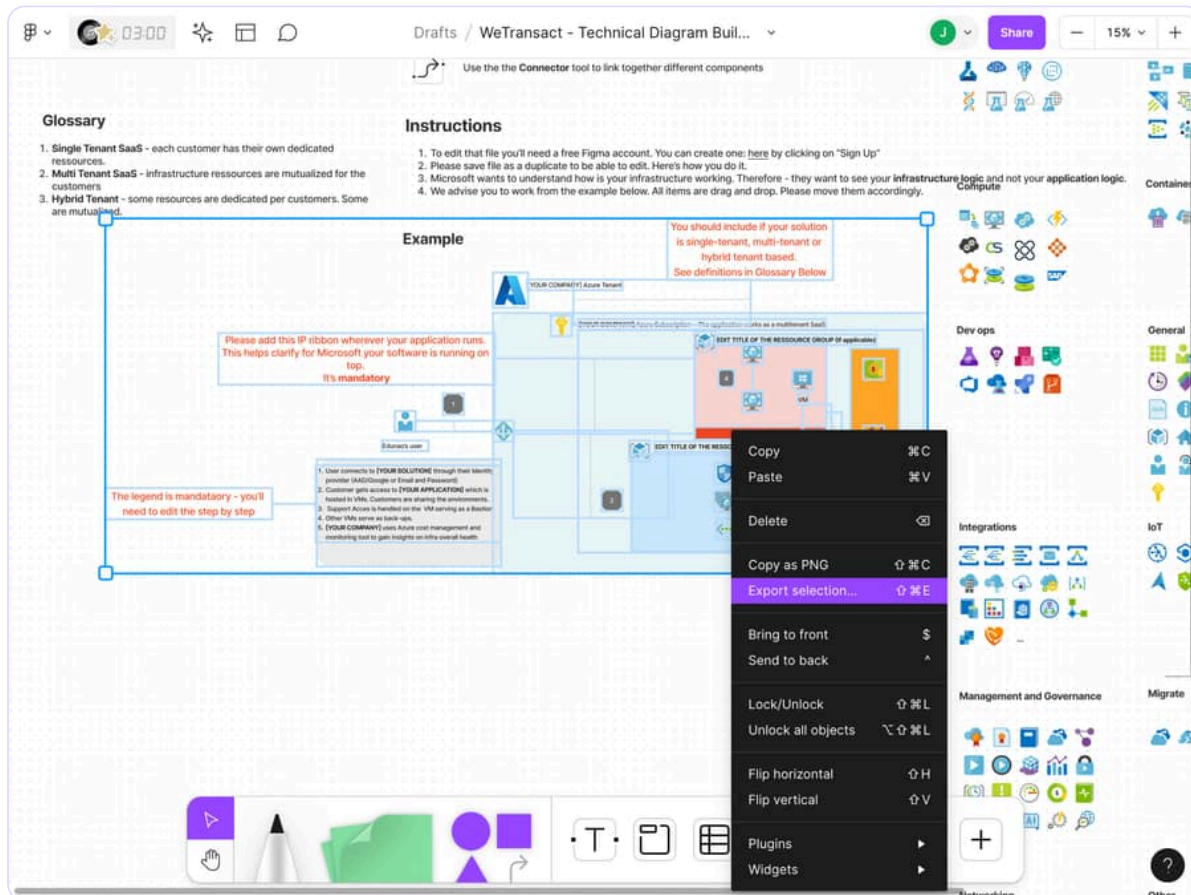

● Once you're done editing - Maintain click-left and select your technical diagram.

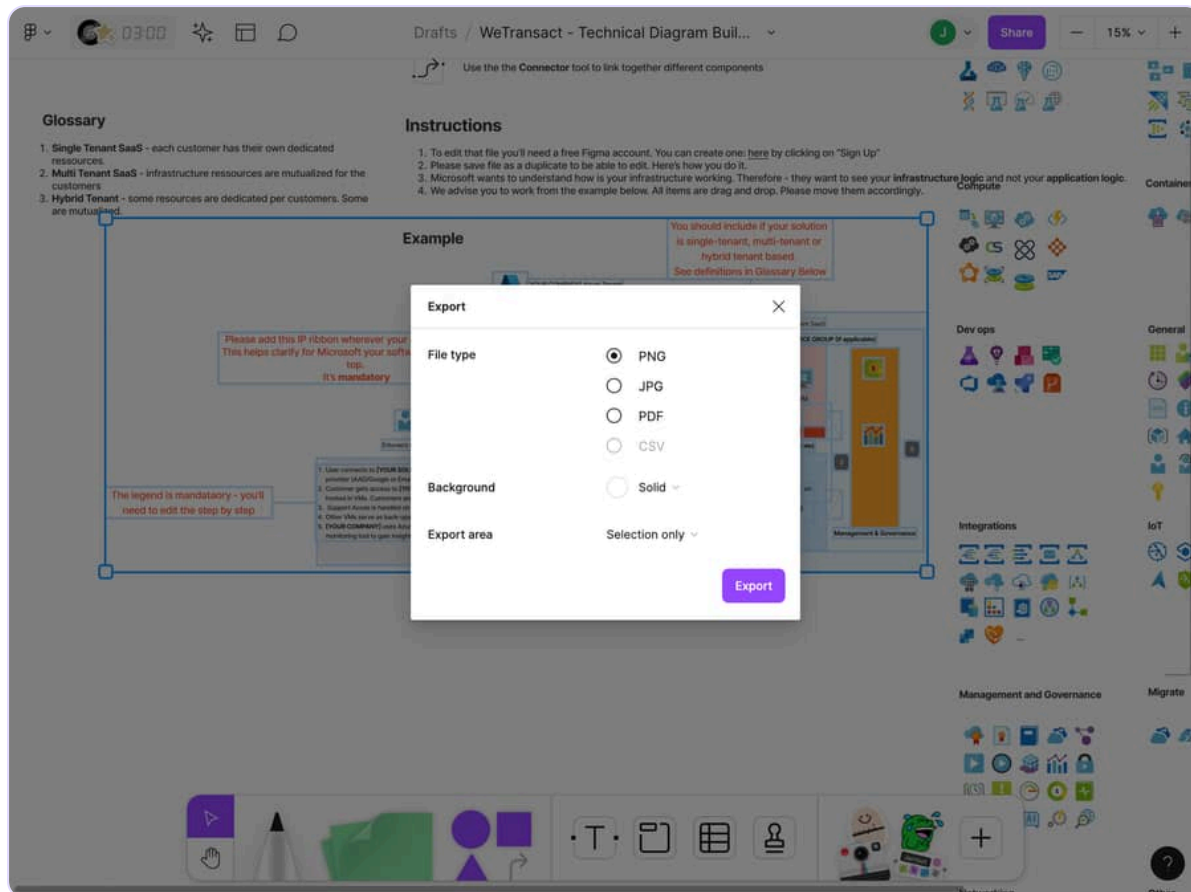

Once selected "click-right" on the selected area.

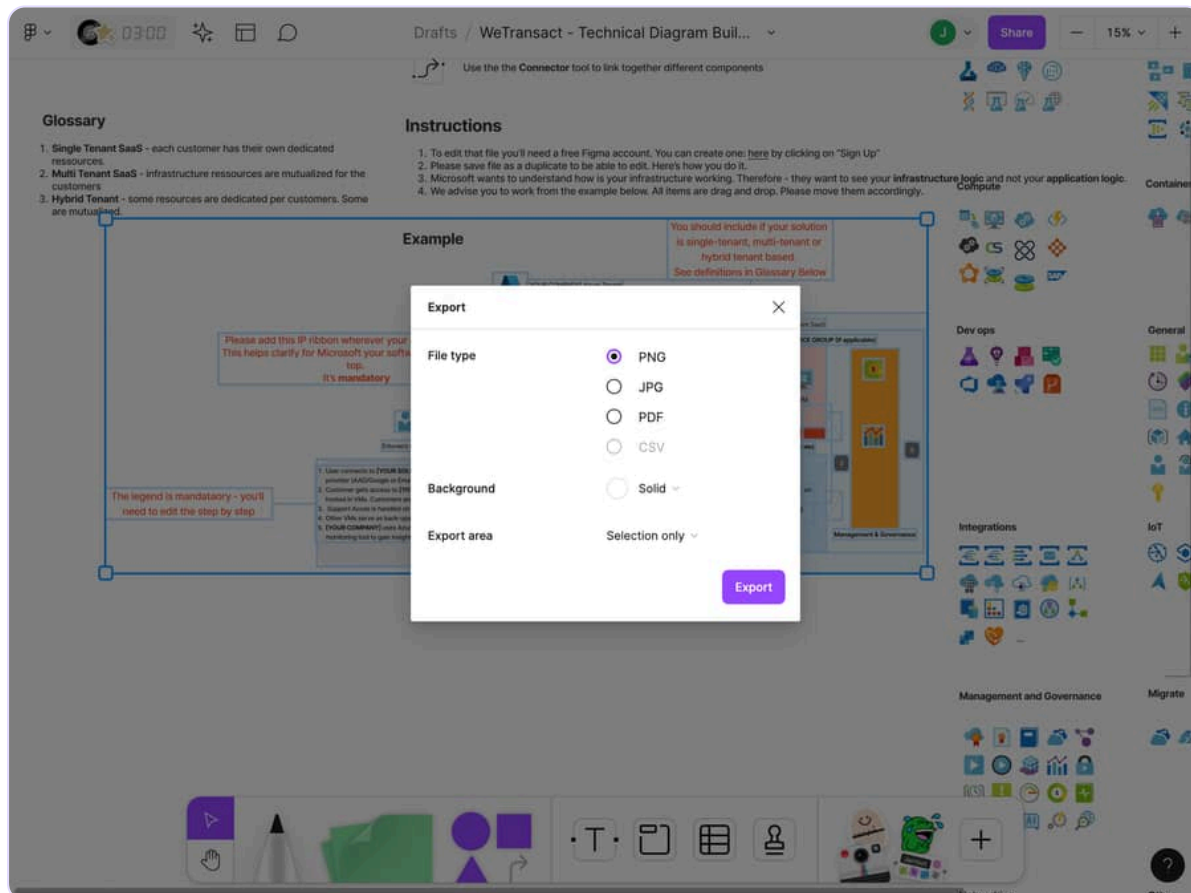

Click on Export selection... ⇧⌘E

Click on PNG

Click on Export - You have your technical diagram ready to be uploaded on WeTransact.
