

Invite External Users in Azure Portal

docs.wetransact.io/invoke-external-users-in-azure-portal

If you are unable to add WeTransact users (support@wetransact.io and bot@wetransact.io) directly in Partner Center – for example, because your account does not yet have the required admin permissions – you can invite them as external users through the Azure Portal instead.

This is the recommended workaround in those cases. Once the users have been added in Azure, you will then return to Partner Center to assign them the appropriate roles, as outlined in the steps below.

● Sign in to Azure portal (<https://azure.microsoft.com>)

● Search Users

The screenshot shows the Microsoft Azure portal interface. The top navigation bar includes the Microsoft Azure logo, a search bar with the text "user", and the Copilot logo. The main content area is divided into several sections:

- Azure services:** Includes a "Create a resource" button, a "Users" icon with a blue arrow pointing to the "Users" dropdown menu, and a "More services" button.
- Services (99+):** A dropdown menu showing options: "All", "Services (99+)", and "More (5)". The "Users" option is selected, showing a list of services: "Users", "User privacy", "User settings", and "Deleted Users".
- Subscriptions:** A section with a yellow key icon and the text "Subscriptions".
- Invoices:** A section with a blue document icon and the text "Invoices".
- Azure DevOps organizations:** A section with a blue cloud icon and the text "Azure DevOps organizations".
- Resources:** A section with a table of resources. The table has columns for "Name", "Type", and "Last Viewed".

Name	Type	Last Viewed
testleyaruby	SaaS	2 weeks ago
324243324324	SaaS	2 weeks ago

Click on New user

The screenshot shows the Microsoft Azure portal interface. At the top, there's a navigation bar with the Microsoft Azure logo, a search bar, and a Copilot button. Below the navigation bar, the 'Users' page is displayed. On the left, there's a sidebar with various user management options. The main area shows a list of users with columns for 'Display name', 'User principal name', 'User type', 'Is Agent', and 'On-premises'. A blue arrow points to the '+ New user' button in the top toolbar.

Click on Invite external user...

The screenshot shows the Microsoft Azure portal interface. The '+ New user' button in the top toolbar is clicked, and a dropdown menu is displayed. The menu contains two options: 'Create new user' and 'Invite external user'. A blue arrow points to the 'Invite external user' option. The background shows the same list of users as the previous screenshot.

Type 'support@wetransact.io' and click on 'review + invite'

The screenshot shows the 'Invite external user' page in the Microsoft Azure portal. The page has a blue header with the 'Microsoft Azure' logo and a search bar. Below the header, there's a breadcrumb trail 'Home > Users >'. The main title is 'Invite external user' with a subtitle 'Invite an external user to collaborate with your organization'. There are four tabs: 'Basics', 'Properties', 'Assignments', and 'Review + invite'. The 'Basics' tab is selected. The page contains several form fields: 'Email' (with a dropdown arrow), 'Display name', 'Invitation message', 'Send invite message' (a checkbox), 'Message', 'Cc recipient', and 'Invite redirect URL'. The 'Email' field is filled with 'support@wetransact.io'. At the bottom, there are three buttons: 'Review + invite' (highlighted with a red box and an arrow), '< Previous', and 'Next: Properties >'. A 'Give feedback' link is also present.

Type 'bot@wetransact.io' and click on 'review + invite'

This screenshot is identical to the one above, showing the 'Invite external user' page in the Microsoft Azure portal. The only difference is that the 'Email' field is now filled with 'bot@wetransact.io'. The 'Review + invite' button is still highlighted with a red box and an arrow.

Once you add the users, Sign in to Partner center (<https://partner.microsoft.com/>) to assign roles to these external users

Go to Partner center and sign In, follow the steps below.

● Click on Settings

● Click on Account settings

● Click 'User mangement' and Search 'support@wetransact.io' in the search bar and click on the email 'support@wetransact.io'

● Scroll down on this page and assign the roles, 'developer,business and finance' and click on 'Update'

● Click 'User mangement' and Search 'bot@wetransact.io' in the search bar and Click on the email.

● Scroll down on this page and assign the roles, 'developer,business and finance' and click on 'Update'
