

Private Plan

docs.wetransact.io/private-plan

Private Plan is a hidden pricing plan within a Marketplace offer that is visible only to selected customers (targeted by Tenant ID). It is mainly used to give a specific customer special pricing or configuration.

Key characteristics

- Targeted using **Tenant ID**.
- Customer discovers and purchases it through Azure Marketplace.
- Supports custom pricing and configurations.
- Customers can leverage MACC.
- Does **not** support CSP private offers or multiparty/channel selling scenarios.
- Limited deal-making and procurement capabilities compared to private offers
